

Summer 2022: DP ESS

The following portions of the IA need to be completed before you come back to school.

(If you finished these before you left for the summer, then you are all set and do not have summer work.)

Identifying the Context (Research Question/Packet #1)

Your question should be done and approved by me. Do not proceed if you have not been approved.

Do any revisions to make it a stronger question by adding any needed details to the independent and dependent variables.

Research Question and environmental issue (Packet #2)

- Variables identified and explained
- Environmental issue identified and explained (p.7)
- RQ and environmental issue linked (p.10)
- RQ and environmental issue revised (p.10)

Planning (Packet #3)

- Variables identified and explained; edit and refine what you had in packet #2
- Method written out step by step
- Justification of method (p. 4)
- Materials list (with quantities and sizes)
- Risk assessment and ethical consideration (p.5)

IA template filled in (found in IA folder)

This is a template you can use to write your IA. Replace/delete anything in green. All other formatting can remain and will help to guide you.

With this summer work complete, so is half of your IA. You have half of the IA written and will be prepared to complete the IA during the beginning of the next school year. Please put all of your packets and documents in a safe place (preferably in the folders/tabs you created at the start of the IA).
