CURRICULUM OVERVIEW

KINDERGARTEN TO GRADE 11

PROGRAMME D'ÉTUDES

MATERNELLE À SECONDAIRE V

ELEMENTARY SCHOOL

(BILINGUAL PROGRAMME)

THE STUDY'S MISSION

We empower each Study girl to reach her full potential by fostering academic excellence in an innovative English and French environment grounded in tradition.

LA MISSION DE THE STUDY

The Study donne à chaque fille les moyens d'atteindre son plein potentiel en cultivant l'excellence scolaire dans un environnement anglophone et francophone à la fois novateur et riche de ses traditions.

The Study's bilingual mother tongue programme begins in Kindergarten. Students have both an English and a French homeroom teacher and spend their days fully immersed in both languages. The goal is to establish fluency and accuracy in both languages by offering **mother tongue programmes in both English and French**. The curriculum is organized into themes and subjects are interrelated through learning activities with a central focus of interest. Learning situations are process-oriented with the intention of encouraging the children to explore, experiment, solve problems and absorb new ideas and concepts. Computer technology is widely integrated at all levels through the use of class sets of laptops and/or iPads.

L'école The Study offre le programme bilingue dès la maternelle. Le mandat de l'école est de créer un environnement propice à l'acquisition des **deux langues maternelles** simultanément. Les élèves rencontrent les deux enseignants dans la journée. Une journée se déroule en français et l'autre en anglais. La mission de la classe de maternelle est fondée sur une orientation développementale, sur l'apprentissage par le jeu et sur une pratique respectueuse du rythme et du style d'apprentissage de l'enfant. Les filles explorent, expérimentent, solutionnent des problèmes et apprennent de nouveaux concepts. L'usage de la technologie est grandement répandue à tous les niveaux. Les élèves utilisent soit des ordinateurs portables, soit des iPads.

SENIOR SCHOOL

In the Senior School, students follow an enriched programme of studies. At each grade level, students take enriched French language courses and are offered at least two other subjects in French. A compulsory third language option (Mandarin or Spanish) is also a curriculum requirement for grades 7, 8 and 9. Each student is provided with her own laptop to take advantage of technological resources to enrich her learning.

A l'école secondaire, les élèves suivent un programme d'études enrichi. À chaque niveau, les élèves suivent des cours de français enrichi, et sont offertes au moins deux autres matières en français. L'option obligatoire d'une troisième langue est aussi une exigence du programme pour le secondaire I, II et III. Chaque élève dispose de son propre ordinateur portable sans fil pour profiter des ressources technologiques pour enrichir son apprentissage.

*Advanced placement (AP) streaming begins. The AP programme offers students the opportunity to study college level curricula in secondary school. Students who obtain high scores on AP exams may receive college and university credits. Due to the demanding nature of these courses, only students in strong academic standing are admitted into the program.

**AP exam offered

CLUBS & CO-CURRICULAR ACTIVITIES

Elementary School students have an opportunity to take part in a variety of co-curricular activities. This allows the students to enrich their experiences and to participate fully in the life of the school.

ELEMENTARY SCHOOL
