DIGITAL AUDIO 2

This course is designed to provide students with the basic knowledge and skills related to audio broadcasting and production with the focus being Radio and Podcasting. Students will create audio programming intended to be distributed through traditional radio, online radio, or distributed through podcasting.

- Students will identify and explain the history of radio and the regulation of audio broadcasting.
- Students will demonstrate correct use of audio recording equipment and develop a recording workflow.
- Students will identify the difference between commercial and non-commercial broadcasting.
- Students will develop show management and broadcasting skills.
- Students should collaborate and produce different types of audio.
- Students will be able to understand and obey basic copyright laws applicable to all media.
- Students will understand the importance of career readiness and participate in a related CTSO.
