

Certified EKG/ECG Technician

INDUSTRY-BASED CERTIFICATION DESCRIPTION

EKG Technicians carry the responsibility of administering electrocardiogram tests, which help practitioners understand the state of a patient's heart.

Technicians ensure proper electrode placement on the patient, record the EKG/ECG, prepare the report for the physician, ensure patient comfort and safety, and troubleshoot abnormalities with the recording. In addition, EKG/ECG technicians set up and administer stress tests.

Candidates should be familiar with performing Holter monitoring and stress testing, medical terminology, understanding the anatomy and physiology of the heart, diseases and disorders of the heart, electrocardiography, pharmacology, and general patient care.

The competencies above may be measured by the entities below. Please see the individual websites for exam specifics.

The following certifying entities have competencies required to earn this certification. Districts should choose the exam provider who is best aligned with their regional employers.

For additional information, please visit each entity's website.
