

Isolation for the General Public³

"Isolation" is for people who have a positive COVID-19 test or who have symptoms and are waiting for the results of a COVID-19 test.

Isolation is the same for everyone, regardless of whether they are unvaccinated, vaccinated, or boosted.

	Symptoms, Waiting for Test Result	No Symptoms, Positive Test	Symptoms, Positive Test	Hospitalized for COVID-19 or Immunocompromised
Duration of Isolation	Until test result is received or 5 days, whichever is first. If test result is negative,	5 days (day 0 is the day the test was collected; isolation ends <u>after</u> day 5). 10 days if unable to wear a well-	Minimum of 5 days (day 0 is the day symptoms start; isolation ends <u>after</u> day 5). <u>and</u> when fever-free for 24 hours without fever-reducing medication	
	isolation can end. If test result is positive, see "Symptoms, Positive Test"	fitting mask; except children can attend childcare/early childhood education after day 5.	and symptoms have improved 10 days if unable to wear	10 - 20 days, consult healthcare provider
	column.	If symptoms develop after testing positive, start 5-day count again with day 0 being the day symptoms started.	a well-fitting mask; except children can attend childcare/early childhood education after day 5 if they meet symptom criteria above.	
Antigen Test Timing at the End of Isolation	N/A	Optional. If testing is done, it should be on at least day 5 of isolation.	Optional. If testing is done, it should be on at least day 5 of isolation (when fever free for 24 hours and symptoms have improved).	Consult healthcare
		If positive, isolate through day 10. If negative, isolation can end but continue to wear a mask through day 10.	If positive, isolate through day 10. If negative, isolation can end but continue to wear a mask through day 10.	provider
