Incarnate Word Academy: 2022 – 2023 Course Selection Guide

The curriculum of Incarnate Word Academy is centered on the core subject areas: English, Mathematics, Science, Social Studies, Theology, and World Language. IWA’s rigorous college-preparatory core curriculum, with numerous honors and Advanced Placement options, is complemented with wide-ranging electives that challenge students to find their strengths and develop skills to impact their communities. IWA frequently reviews and revises course offerings to meet the needs of students and prepare them for college and our global society.

The class of 2023 and 2024 are required to take the following 27.5 credits for graduation:

4	Theology		1	Fine Arts
4	English		1	Physical Education*
4	Mathematics		.5	Computer Science
4	Science		.5	Health
3	Social Studies		.5	Leading with Character & Academics**
.5	Government		1	Academic Elective
.5	Economics			
3	World Language			

The class of 2025 and those that follow are required to take the following 28 credits for graduation:

4	Theology		1	Fine Arts
4	English		1	Physical Education*
4	Mathematics		.5	Computer Science
4	Science		.5	Health
3	Social Studies		1	Leading with Character & Academics**
.5	Government		1	Academic Elective
.5	Economics			
3	World Language			

*½ credit of Physical Education can be earned by satisfactorily completing a season of an IWA sport, St. Thomas High School Cheerleading or IWA dance team. The other ½ Physical Education credit must be taken as a course on campus, such as weight training, PE and/or dance class.

** Beginning with the Class of 2025, students will earn one credit for completion of Leading with Character and Academics. These classes will be taken as a cohort during Freshman year. Students in grades 10-12 who do not yet have credit for Leading with Character will be allowed to substitute Leading with Service in place of Leading with Character.

75 service learning hours are required for graduation. See IWA’s Service Learning program for guidelines.

Concentrations & Endorsements

As affirmed by the Texas Education Agency (TEA), endorsements allow students to focus on a particular academic area of interest and earn recognition on their transcript by completing the requirements for that endorsement.

1. IWA students may earn a **STEM endorsement** (Science, Technology, Engineering & Math) by completing four credits in math and science AND **one** of the following:

1. Placing out of Algebra I and completing Geometry, Algebra II plus taking two additional math courses.
 2. Taking Algebra I, II, Geometry, Precalculus and an additional math elective such as AP Statistics or AP Computer Science A.
 3. Complete five credits in science by taking Biology, Chemistry, Physics and two other science electives.
2. IWA students may earn an **Arts and Humanities Endorsement** by completing **one** of the following:
1. Complete four (4) credits in the same level of World Language.
 2. Complete five (5) credits in Social Studies by either:
 - a. Taking two half credit humanities courses (Ancient Greek & Roman Culture, Contemporary U.S. Women’s History, Current Events, Intro to Philosophy, Intro to Psychology, Sociology, The Works of C.S. Lewis, War & Revolution: Europe between 1914 & 1945)
 - OR
 - b. Taking one full credit humanities course (Creative Writing)
 3. Complete one full credit in two areas of fine or performing arts (music, theater, art, dance, publications)
3. IWA students may earn the **Distinguished Leader** distinction by completing the following:
1. DL Portfolio
 2. Three courses of leadership classes
4. IWA students may earn a **Leadership Endorsement** by completing **one** of the following:
1. Three courses of leadership classes

Course Selection Process:

Each student meets with their Academic Advisor during the spring semester to discuss course selections for the following year. At this meeting, the Academic Advisor will present the core classes for which the student is recommended for based on the department’s honors/AP enrollment prerequisites. Honors courses are preparatory for AP courses, offering an increased pace, content and workload. Students considering AP courses are required to attend an AP interest meeting in January and review the AP Course Expectation Guide. Students requesting more than four Honors/AP courses will be required to obtain approval from the AP teachers as well as a Parent/Guardian. (A form for this request will be given during course selection.) Being mindful of a balanced and healthy workload, students should keep in mind their extracurricular activities, jobs and other responsibilities when making scheduling decisions. Students are required to pay the AP exam fee and take the AP exam in May.

Preliminary Honors/AP core course placement will be made using the student’s 1st semester grade. Course placement is re-evaluated at the end of the fourth quarter by the student’s core teachers, and final placement is based on each department’s honors/AP enrollment prerequisites and 2nd semester grades. Each student’s core courses are approved by the student’s current teachers when schedules are distributed to students; therefore, if a student questions her core course placement, she should discuss the placement with her current teacher.

The Counselor and Academic Dean make every effort to place students in the electives they requested, but if a requested course conflicts with another class, the student will be enrolled in another elective option. Student schedules are not created or changed based on requests for specific teachers or specific semesters.

Course Change Requests:

Course selections made during the spring course selection period and registration are considered permanent for the following academic year. During the first week of each semester, students will be allowed to make changes only if there is a scheduling conflict or a special circumstance. Examples of a special conflict include double scheduled for a class, missing a required course, repeating a course, etc. Students requesting to change their courses must email the Academic Dean.

Computer Science

IWA's Computer Science program builds upon each student's technology experience to build current, in-demand technology skills and inspire and interest in technology and computer programming. These courses offer practical, hands-on practice with relevant software and offer students the opportunity to tailor their coursework to their individual interests.

Course: Introduction to Computer Science (9, 10, 11, 12)

0.5 Credit

Description: This course provides an introduction to the world of Computer Science. Students will gain a practical understanding of various programming languages including Java and Python. Students will practice the fundamentals of industry standard programming language to build a platform of knowledge that can be applied to future Computer Science courses. *Students will have an intermediate level of understanding of the Python language upon completion of this course.*

Offered: May take fall or spring semester

Course: 3D Modeling and Game Design (10, 11, 12)

0.5 Credit

Description: This course covers the basics of game design, including (but not limited to) 3D modeling, intro to animation in 3DS Max, the design and creation of characters/storylines, the effects of gaming in society, as well as ethical discussions of why gamification of society may or may not be necessary. In addition, this class will include additional material such as programming and computer concepts and conceptual design to broaden their skill set. Students will complete a portfolio as part of their final grade, displaying the knowledge and skills they learn during the semester.

Prerequisite: Introduction to Computer Science and Digital Design

Offered: May take fall or spring semester

Course: Digital Design and Media Production (10, 11, 12)

0.5 Credit

Description: This course will give students knowledge and skills in layout, design, photography, animation, and digital video as they create projects combining these forms of media in complete projects. Students will learn how different technology works together to create engaging and creative presentations. Students will learn several software applications from the Adobe Suite. Throughout the course, students will be given opportunities to use their skills in promotional media for school event use. Students will complete an end of semester portfolio displaying the knowledge and skills they learn during the semester.

Prerequisite: Introduction to Computer Science

Offered: May take fall or spring semester

Course: Web Design (10, 11, 12) **0.5 Credit**

Description: This course will give students the knowledge and skills to create quality web-related content. Students will create web pages and web sites themselves by coding in HTML and CSS. Students will also learn about HTML5, animation for the web, *and current web design trends*.

Prerequisite: Introduction to Computer Science

Offered: May take fall or spring semester

Course: AP Computer Science Principles (10, 11, 12) **1 Credit**

Description: This course develops computational thinking vital for success across multiple disciplines and introduces students to the central ideas of computer science: creativity, abstraction, data & information, algorithms, programming, the Internet, and the global impact. It is comparable to a first-semester introductory college computing course. Computing affects almost all aspects of modern life and all students deserve access to a computing education that prepares them to pursue the wide array of intellectual and career opportunities that computing has made possible. This course is not a tour of current events and technologies. Rather, it seeks to provide students with a “future proof” foundation in computing principles so that they are adequately prepared with both the knowledge and skills to live and meaningfully participate in our increasingly digital society, economy, and culture. Sitting for the AP Exam is a course requirement. This course is offered every other year, alternating with AP Computer Science A.

Prerequisite: Introduction to Computer Science

Course: AP Computer Science A (11, 12) **1 Credit**

Description: This course is an introductory college-level computer science course. Students cultivate their understanding of coding through analyzing, writing, and testing code as they explore concepts like modularity, variables, and control structures. The course introduces students to computer science using the industry-standard Java programming language and presents fundamental topics that include problem solving. AP Computer Science A is equivalent to a first-semester, college-level course in computer science for CS majors. Sitting for the AP Exam is a course requirement. This course is offered every other year, alternating with AP Computer Science Principles.

Prerequisite: Introduction to Computer Science & an 85 or higher in Algebra II

English

The English department curriculum is a four-year program designed to prepare students for college-level reading, writing, and critical thinking regardless of their college course of study. All English courses include extensive analytical writing and address the principles of organization and grammar. Additionally, all levels of the English curriculum at IWA focus on refining critical reading skills and building vocabulary knowledge. All English courses at IWA have a summer reading assignment which students are required to complete before school begins in August. Students also expect an assessment on the book. Students who meet department standards may qualify for college-level AP instruction in their junior and senior year.

Course: English I (9)**1 Credit**

Description: The course's objective is to develop writing skills and enable students to recognize and appreciate various genres of literature. There is an emphasis on refining grammar and language aptitude. The students write multiple paragraph essays and compositions, with special emphasis placed on the literary analysis essay where attention to matters of substance, organization and correctness are highlighted. The course provides a comprehensive study of World Literature as it has been expressed in novels, short stories, and drama from Shakespearean times to the present.

Course: Honors English I (9)**1 Credit**

Description: This course's objective is to develop writing skills and enable students to recognize and appreciate various genres of literature. There is an emphasis on refining grammar and language aptitude. The students write multiple paragraph essays and compositions, with special emphasis placed on the five-paragraph essay where attention to matters of substance, organization and correctness are highlighted. The course provides a comprehensive study of World Literature as it has been expressed in novels, short stories, essays, poems and drama from the Shakespearean era to the present. Plot, characterization, theme, setting, irony, symbolism and analogy will be understood through reading comprehension and literary analysis.

Prerequisites: For incoming 9th graders, Academic Advisors use middle school grades, entrance test scores, teacher recommendation, and admissions essay for placement into this course.

Course: English II (10)**1 Credit**

Description: In this course, we focus on strengthening students' close reading and writing skills through discussion, analysis, and frequent writing assignments. Students read a wide variety of literary genres, including memoir, poetry, short fiction, a Shakespearean comedy, and a classical Greek drama. Students will learn how to write various types of essays. Throughout the year, we work on refining grammar and language aptitude and critical analysis skills.

Prerequisite: English I

Course: Honors English II (10)**1 Credit**

Description: In this course, we focus on strengthening students' close reading and writing skills through discussion, analysis, and frequent writing assignments. Students read a wide variety of literary genres, including poetry, short fiction, a nineteenth-century novel, a Shakespearean comedy, and a classical Greek drama. Students will learn how to write various types of essays, including an annotated bibliography. Throughout the year, we work on critical analysis skills in preparation for AP English III and college readiness.

Prerequisites: To be eligible for placement into Honors English II, students must meet the following requirements:

1. The final grade must average an 88 or higher in Honors English I or must average a 93 or higher in English 1. This average includes all four quarters as well the semester exams and final grades for both semesters.

2. The student's current English teacher will determine the quality of the student's participation in her current English class. Students scoring an A or B on the English department participation rubric will be eligible for Honors English II. Students scoring below a B will not be eligible for Honors, regardless of overall course grade.

Course: English III (11)

1 Credit

Description: Students study movements within American Literature. Students explore the literary movements that molded and transformed the American literary landscape. Each movement is examined in historical perspective and a wide variety of examples are examined. The course focuses on the novels, plays, and poetry that have shaped the American literary canon. Students write in a variety of styles to improve their composition and research skills progressively throughout the course. In addition, students will write an end of term research essay in collaboration with Theology III.

Prerequisite: English II

Course: AP English III, Advanced Placement Language and Composition (11)

1 Credit

Description: AP English III is a college-level course in which students study rhetoric and composition along with American literature. This blending of fiction and non-fiction includes works from the 17th through the 21st centuries and encompasses speeches, essays, articles, novels, short stories, poetry, and plays. The student explores the relationship between the writer's purpose and the rhetorical devices utilized to convey meaning. In addition to close reading, students write in a variety of rhetorical modes and practice AP Exam strategies. Sitting for the AP Exam is a course requirement.

Prerequisites: To be eligible for placement into AP English III, students must meet the following requirements:

1. The final grade must average an 88 or higher in Honors English II or must average a 93 or higher in English II. This average includes the final grades for both semesters.
2. The student's current English teacher will determine the quality of the student's participation in her current English class. Students scoring an A or B on the English department participation rubric will be eligible for AP English. Students scoring below a B will not be eligible for AP, regardless of overall course grade.

Course: English IV (12)

1 Credit

Description: In English IV, students study novels, plays, and poetry from American, British, and world authors ranging from Elizabethan drama to the 21st century. Through close reading and critical analysis, students explore the methods authors use to convey meaning and aesthetics. As reading, students consider a work's structure, style, and themes as well as various other elements such as the use of figurative language, imagery, symbolism, and tone. Each movement is examined in historical perspective, and a wide variety of examples are examined. Students write in a variety of styles to improve their composition and research skills progressively throughout the course.

Prerequisite: English III

Course: AP English IV, Advanced Placement Literature and Composition (12) **1 Credit**

Description: AP English IV is a college-level course in which students study novels, plays, and poetry from American, British, and world authors ranging from Elizabethan drama to the 21st century. Through close reading and critical analysis, students explore the methods authors use to convey meaning and aesthetics. As reading, students consider a work's structure, style, and themes as well as various other elements such as the use of figurative language, imagery, symbolism, and tone. Sitting for the AP Exam is a course requirement.

Prerequisites: To be eligible for placement into AP English IV, students must meet the following requirements:

1. The final grade must average an 88 or higher in AP English III or must average a 93 or higher in English III. This average includes the final grades for both semesters.
2. The student's current English teacher will determine the quality of the student's participation in her current English class. Students scoring an A or B on the English department participation rubric will be eligible for AP English. Students scoring below a B will not be eligible for AP, regardless of overall course grade.

Course: Creative Writing (10, 11, 12) **1 Credit**

Description: This course is an elective intended as a survey of Creative Writing. Areas emphasized include (1) poetry (2) fiction (3) playwriting (4) creative nonfiction. Creative Writing I, a rigorous composition course, asks high school students to demonstrate their skill in such forms of writing as personal essays, short stories, poetry, and drama. The student writes for a variety of audiences and purposes to develop versatility as a writer. The student compiles a portfolio of personal work, representative of many styles of writing or a larger body of one genre. The student learns the process of editing, rewriting, and revision. The student's evaluation of her own writing as well as the writing of others ensures that students completing this course are able to analyze and discuss published and unpublished pieces of writing, develop and apply criteria for effective writing, and set their own goals as writers.

Prerequisite: Sophomore must be concurrently enrolled in or successfully completed English II.

Course: Debate (9, 10, 11, 12) **1 Credit**

Description: This full year elective course gives students the opportunity to explore high school speech and debate activities. Current events and a variety of debate formats are studied. Students will build the skills and self-confidence necessary to debate in local, state and national venues. Students will also explore research methods and persuasive writing techniques. This class teaches students to analyze facts and bias, creating strong arguments to support their viewpoint. Attendance at debates will be explored.

Course: The Works of C.S. Lewis (10, 11, 12) **0.5 Credit**

Description: This class would begin with C.S. Lewis's great apologetics *The Screwtape Letters*, *Mere Christianity*, and *The Great Divorce*. Particular focus will be given to C.S. Lewis's own journey of Christian conversion and his close friendship with devout Catholic, J.R.R. Tolkien. Once versed in Lewis's personal theology, the instructor will lead the class in exploring that theology in all 7 *Chronicles of Narnia* novels read in publication, not chronological order. The three existing *Narnia* films will be incorporated in class as well, as clips from *Walking with C.S. Lewis* and Tolkien. The works of C.S. Lewis will naturally lend themselves to fruitful

discussions on the nature of belief, the incarnation of Christ, sin and redemption, and eschatology.

Prerequisite: English I

Offered: May take fall or spring semester

Course: Publications - Yearbook I (10, 11, 12) 1 Credit

Description: This is the level one yearbook course. Students will work as a team to create the yearbook. Students will develop real-world skills including time management, budgeting, design, editing, marketing, social media and working collaboratively while creating publications using industry standard software. As members of the yearbook staff, students in this course will be expected to cover after-school activities, as assigned, and participate in an advertising campaign that includes selling advertisements to students, student groups, parents and businesses in the community.

Course: Advanced Publications - Yearbook II (11, 12) 1 Credit

Description: This is the level two yearbook course. Students will work as a team to create a yearbook. Students will further develop real-world skills including time management, budgeting, design, editing, marketing, social media and working collaboratively while creating publications using industry standard software. As members of the yearbook staff, students in this course will be expected to cover after-school activities, as assigned, and participate in an advertising campaign that includes selling advertisements to students, student groups, parents and businesses in the community.

Prerequisite: Yearbook I

Course: Advanced Publications - Yearbook III (12) 1 Credit

Description: This is the level three yearbook class. Students will work as a team to create a yearbook. Students will refine real-world skills including time management, budgeting, design, editing, marketing, social media and working collaboratively while creating publications using industry standard software. Students will lead the staff as editors, section editors or senior staff members. As members of the yearbook staff, students in this course will be expected to cover after-school activities, as assigned, and participate in an advertising campaign that includes selling advertisements to students, student groups, parents and businesses in the community. This level is for yearbook editors. Editors will work collaboratively to plan deadlines, layout and design and content ideas as well as other responsibilities of producing the yearbook.

Prerequisite: Yearbook II

Fine and Performing Arts

Students are required to take at least two semesters of fine arts courses, developing and polishing their creative abilities, gaining an appreciation for the arts, and expanding their talents and skills. Fine arts students are also given the opportunity to perform or exhibit their talents through theatre productions, concerts, and competitions on the regional and state levels.

Course: Dance I: Fundamentals of Dance (9, 10, 11, 12) **0.5 Credit**

Description: In this class, students will learn the fundamental elements and techniques of dance including ballet, modern & jazz. Students may also choreograph a short dance routine and perform their original compositions. The student will develop kinesthetic awareness, movement memory, creative abilities and aesthetic appreciation of various dance forms. Dance can count as one semester of fine arts OR one semester of PE. This course is open to students with all levels of prior dance experience.

Offered: May take fall or spring semester

Course: Dance II: Creativity in Dance (10, 11, 12) **0.5 Credit**

Description: In this class, students will dive deeper into the elements and techniques of ballet, modern & jazz as well as explore other dance genres. Students will take a greater exploration into the choreographic process of dance by both learning and composing a full length dance piece. Students will create a dance covering all elements from storyline, intentions, and expression. Students will develop a greater understanding of the body as it moves through space, connectivity with music, and how to express their creative side. Dance can count as one semester of fine arts OR one semester of PE.

Prerequisites: Dance I: Fundamentals of Dance

Offered: May take fall or spring semester

Course: Fundamentals of Art (9, 10, 11, 12) **0.5 Credit**

Description: This course is the study of the Elements and Principles of Art and how students express their individual thoughts and ideas creatively, with the knowledge of media and tools. Students will explore 2D with the knowledge learned of these different components of art and be able to create unique pieces of artwork. Students will explore the relationship of art and the artist's role in shaping history and or being shaped by history. Students will develop respect for the traditions and contributions of diverse cultures. This course may be taken both semesters for a full credit to satisfy the fine arts requirement.

Offered: May take fall and/or spring semester

Course: Textile Art (9, 10, 11, 12) **0.5 Credit**

Description: In Textile Art, students study fabric arts including quilting, weaving, and other cloth-related work. Students also study women artists who turned some crafts into art. Through this course, students challenge their imaginations, foster critical thinking, collaborate with others, and build reflective skills. While exercising meaningful problem-solving skills through textile arts, students develop the lifelong ability to make informed judgments and appreciate

and understand artistic expression. This course may be taken both semesters for a full credit to satisfy the fine arts requirement.

Offered: May take fall or spring semester

Course: Advanced Art (10, 11, 12)

1 Credit

Description: This year-long course is the continuing study of Art, its application and its history. Art will be practiced with emphasis in learning more about all disciplines. Students may experiment in 2-dimensional and or 3-dimensional art with a concentration in either a particular media, discipline, or both.

Prerequisite: Fundamentals of Art

Course: Theater I: Fundamentals of Theatre (9, 10, 11, 12)

0.5 Credit

Description: Fundamentals of Theatre is an introductory course for students new to theatre and the arts. Students will study the history of theatre through plays, monologues and viewing performances. Students will draw connections to historical moments that occurred simultaneously to plays that were written and produced. Skills such as proper terminology, developing stage presence and evoking expression will be a focus in this course. Students will work together to hone characters' essence and creatively put individual spin on traditional monologues. In addition to performance skills, technical theater skills will be explored and cultivated. Students will explore creating a full production of a play and work together to create an original concept. Students will complete this course with an overall knowledge of the fundamentals of theater.

Offered: May take fall or spring semester

Course: Theater II: Advanced Theater (10, 11, 12)

0.5 Credit

Description: This semester-long class is designed for students who have taken Fundamentals of Theater. Course content for advanced theater rotates by semester and is determined by the instructor at course placement. Students will dive into a wider range of terminology, honing in their stage performance skills, and achieve a greater range of emotional interpretation. Students will also learn principles of stage design and begin creating conceptual scenery. Students will design and adapt these designs for the plays read in consultation with a student director doing a full concept design. At the end of this course, students will have a greater understanding of theater production and confidence in their performing skills.

Prerequisite: Theater I: Fundamentals of Theatre

Offered: May take fall or spring semester

Course: Band (9, 10, 11, 12)

1 Credit

Description: This year-long course is for students with no previous musical training. Band provides a supportive, motivating setting which allows the student to develop the skills necessary to perform at the more advanced level of the St. Thomas Eagle Band. This class meets before school at St. Thomas High School and requires participation at events outside of the school

day (ex. Football games & competitions). This full year course may be repeated and counts towards the fine art requirement.

Course: Choir (9, 10, 11, 12)

1 Credit

Description: This year-long class is a performing vocal ensemble that represents the school at public functions and concerts along with school Masses. The students are taught a variety of music with emphasis centering on correct notes and rhythms, tonal production, vowel formations, diction, posture, and concert etiquette. Students participate in at least two concerts yearly as well as performing at school functions. Additionally, students participate in regional and state vocal competitions. This course meets from 7:00 – 7:50 a.m. four days a week. This full year course may be repeated and counts towards the fine art requirement.

Leadership

IWA is proud to offer an innovative, unique character and leadership curriculum to empower our students to develop as bold, authentic servant leaders. The curriculum consists of one required year-long freshman course, Leading with Character & Academics, and three semester-long electives. Students who complete three leadership courses will earn the Concentration in Leadership Studies. The courses have been developed based on principles derived from university materials, character development curriculum, and globally recognized leadership experts.

Course: Leading with Character & Academics (9)

1 Credit

Description: The main objective of Leading with Character & Academics is to begin students on a journey of personal development, character formation, and academic excellence. In Leading with Character & Academics, students will be challenged to lean into their fears and to begin identifying, verbalizing, and honing their unique skill sets and developing practices that will shape them into excellent students and leaders. These objectives are achieved through personal growth challenges, regular written and verbal reflections, personal strengths assessments, and a variety of projects, discussions, and activities around the character traits of integrity, responsibility, courage, adaptability, perseverance, and empathy.

Course: Leading with Service (10, 11, 12)

0.5 Credit

Description: Leading with Service introduces a foundation for how to lead to get extraordinary results. The main objectives of the course are to provide each student: (1) an understanding of the authentic meaning of leadership, (2) a set of nationally recognized leadership practices, (3) the opportunity and space to apply the practices in the community, and (4) a feeling of empowerment to lead and serve in a comfortable role of an authentic, bold servant leader as she sets off to college. The Five Practices of Exemplary Leaders defined in the *The Student Leadership Challenge* (Posner/Kouzes) will provide the framework to guide classroom discussion and will be the methodology to guide the completion of a social change service project.

Prerequisite: Leading with Character & Academics

Offered: May take fall or spring semester

Course: Leading with Business (11, 12) **0.5 Credit**

Description: Leading with Business is an introduction to entrepreneurship and business management. This hand-on class applies previously learned leadership principles in a business context. Students will learn how businesses innovate, operate, advertise, manage personnel, and track finances. The semester's capstone project is a unique student developed business which applies what they have learned and creates profits for a local non-profit organization. This course combines short lectures and significant time creating their business. Upon completion students will have a hands-on appreciation for the role of an entrepreneur, the intricacies of managing a business, the importance of project management, the value of collaboration, and the confidence that comes with accomplishing a stretch goal.

Prerequisites: Leading with Service

Offered: May take fall or spring semester

Course: Leading with Personal Finance (11, 12) **0.5 Credit**

Description: Leading with Personal Finance provides students with a solid foundation in understanding and managing their finances with a focus on concepts, knowledge, and tools useful for college students and young professionals. Student projects will simulate future financial decisions about colleges and careers, investment and savings, and budgeting. Key topics include career choices, college and financial aid, saving and investment, banking, credit and debt, insurance, taxes, and budgeting. At IWA, financial literacy is part of our leadership curriculum because the foundation of good money management is rooted in character attributes such as discipline, vision, self-control, perseverance, humility, and generosity which are the foundations of great leadership, and throughout the semester, students will reflect on how their personal values and priorities influence their financial decisions.

Prerequisite: Leading with Character & Academics

Offered: May take fall or spring semester

Mathematics

The mathematics department curriculum is a four-year program, starting with Algebra 1, Honors Algebra 1, and/or Honors Geometry in 9th grade. All four years prepare students for college work through a variety of problems that focus on building analytical thinking skills.

Course: Algebraic Applications (9) **1 Credit**

Description: Algebraic Applications is intended for students who need to strengthen a basic understanding of how to perform Algebra operations. This course will benefit current Algebra I students who need to know how to perform basic Algebra operations which involve simplifying, factoring, or solving equations in the form of inequalities, fractions, exponents and word problems. Math study-skills and practice will be emphasized. This course does not count towards the STEM endorsement nor does it fulfill the required four courses in math.

Prerequisite: by recommendation only; student must be enrolled concurrently in Algebra I

Course: Algebra I (9) **1 Credit**

Description: Algebra I develops basic algebraic skills and concepts through operations and problem solving. Topics include real number operations, rational and irrational numbers, polynomials, factoring, quadratic equations, functions and relations, and systems with two variables.

Course: Honors Algebra I (9) **1 Credit**

Description: Honors Algebra I is designed for students with previous exposure to Algebra. While the objectives and topics covered are the same as Algebra I, this course is more rigorous and designed for those interested in working toward higher level mathematics. Honors Algebra I develops basic algebraic skills and concepts through operations and problem solving. Topics include solving equations and inequalities, linear equations and functions, exponential functions, solving quadratic equations and functions, polynomials, factoring and piecewise functions.

Prerequisite: For incoming 9th graders, Academic Advisors use middle school grades, entrance test scores, teacher recommendation, and the IWA Math placement exam for enrollment in this course.

Course: Geometry (10) **1 Credit**

Description: Geometry reinforces algebraic skills while introducing geometric concepts and relationships. Topics include lines and planes, angle relationships and angle measures, congruent figures, similar figures, circles and polygons, plane and solid figures, area, perimeter, circumference, volume, and introduction to right triangle trigonometry. Students use geometric proofs and study geometric theorems as they apply to geometric concepts.

Prerequisite: Algebra I

Course: Honors Geometry (9, 10) **1 Credit**

Description: Honors Geometry reinforces algebraic skills while introducing geometric concepts and relationships. Topics include lines and planes, angle relationships and angle measures, congruent figures, similar figures, circles and polygons, plane and solid figures, area, perimeter, circumference, volume, and introduction to right triangle trigonometry. Students use geometric proofs and study geometric theorems as they apply to geometric concepts. Honors Geometry includes the same content as Geometry plus additional concepts, such as coordinate geometry, points of concurrency of a triangle, proving multiple pairs of triangles congruent and inductive vs. deductive reasoning. Proofs are also used more extensively and honors students work more complicated proofs than those in Geometry.

Prerequisites: To be eligible for placement into Honors Geometry, students must meet the following requirements:

1. Rising sophomores grade must average 85 or higher in Honors Algebra 1 or must average 93 or higher in Algebra 1. This average includes all four quarters as well the midterm and final exams for both semesters.

2. For incoming 9th graders, Academic Advisors use middle school grades, entrance test scores, teacher recommendation, and the IWA Math placement exam for enrollment in this course.

*Select rising Sophomores who qualify for Honors Geometry, may also enroll in Honors Algebra II.

Course: Algebraic Reasoning (11) **1 Credit**

Description: Algebraic Reasoning is intended for students who need to strengthen a basic understanding of how to perform advanced Algebra operations. Algebra II students will strengthen their skills in performing relations and functions, graphing linear equations, quadratic and polynomial functions. College ready math skills and practice will be emphasized. This course does not count towards the STEM endorsement nor does it fulfil the required four courses in math.

Prerequisite: by recommendation only; student must be enrolled concurrently in Algebra II

Course: Algebra II (10, 11) **1 Credit**

Description: This course includes a thorough review of Algebra I skills and introduces new topics. Continued study of relations and functions, graphs and equations of linear and quadratic functions and polynomials. Topics introduced are rational exponents, complex numbers, logarithms, probability and conic sections.

Prerequisites: Algebra I and Geometry

Course: Honors Algebra II (10, 11) **1 Credit**

Description: This course includes a review of Algebra I skills, and introduces new topics. Continued study of relations and functions, graphs and equations of linear, quadratic, and polynomial functions. Topics introduced are algebraic sequences and series, rational expressions and functions, radical functions, exponential functions, complex numbers, logarithms, and conic sections. Probability and geometric sequences and series will be introduced if time allows.

Prerequisites: To be eligible for placement into Honors Algebra II, students must meet the following requirements:

1. The final grade must average 85 or higher in Honors Geometry or must average 93 or higher in Geometry. This average includes all four quarters as well the midterm and final exams for both semesters.
2. For freshmen taking both Honors Algebra I & Honors Geometry, the final grade must average 85 or higher in both courses. This average includes all four quarters as well the midterm and final exams for both semesters.

Course: Pre-Calculus (11, 12) **1 Credit**

Description: This course applies and reviews the topics learned in Geometry and Algebra II. Topics include families of functions, matrices and analytic geometry. Solving polynomial, rational, exponential, and logarithmic functions. Select Trigonometry topics are covered such as:

graphing Sine and Cosine, solving Sine and Cosine equations, proving trigonometric identities.

Prerequisites: Algebra II

Course: Honors Pre-Calculus (11, 12)

1 Credit

Description: This course applies the topics learned in Honors Geometry and Honors Algebra II. Topics include families of functions, polar coordinates, trigonometric functions and their graphs, vectors, powers and roots of complex numbers, polynomial, rational, exponential, logarithmic functions and their graphs, analytic geometry, limits, derivatives and series. Graphical and numerical methods are used to solve a variety of real-world problems. This class provides a foundation for future course work in Calculus.

Prerequisites: To be eligible for placement into Honors Pre-Calculus, students must meet the following requirements:

1. The final grade must average 85 or higher in Honors Algebra II. This average includes all four quarters as well the midterm and final exams for both semesters.
2. For sophomores taking both Honors Geometry and Honors Algebra II, the final grade must average 85 or higher in both courses. This average includes all four quarters as well the midterm and final exams for both semesters.

Course: Calculus (12)

1 Credit

Description: This course is an integrated study of Calculus including the study of algebraic and transcendental functions, limits, continuity, differentiation, and integration. This course is primarily concerned with developing the students' understanding of the concepts of calculus and providing experience with its methods and applications. The course emphasizes a multi-representational approach to calculus, with concepts, results, and problems being expressed.

Prerequisite: To be eligible for placement into Calculus, students must meet the following requirements:

1. Completed Pre-Calculus.
2. OR have completed Honors Pre-Calculus.

Course: AP Calculus AB (12)

1 Credit

Description: This course is an integrated study of Calculus including the study of algebraic and transcendental functions, limits, continuity, differentiation, integration, differential equations, and applications of integrations. AP Calculus AB is roughly equivalent to a first semester college course devoted to topics in differential and integral Calculus. The course consists of a full high school academic year of work. This course is primarily concerned with developing the students' understanding of the concepts of calculus and providing experience with its methods and applications. The course emphasizes a multi-representational approach to calculus, with concepts, results, and problems being expressed graphically, numerically, analytically, and verbally. The connections among these representations also are important. Sitting for the AP Exam is a course requirement.

Prerequisite: To be eligible for placement into AP Calculus AB, students must meet the following requirements:

1. The final grade must average 95 in Pre-Calculus. This average includes all four quarters as well the midterm and final exams for both semesters.
2. OR have completed Honors Pre-Calculus.

Course: AP Calculus BC (12) **1 Credit**

Description: In addition to AB content, this course also examines different types of equations and introduces the topic of sequences and series. The AP Calculus BC course consists of a full high school academic year of work and is roughly comparable to two semesters of a calculus course in colleges and universities. This course is primarily concerned with developing the students' understanding of the concepts of calculus and providing experience with its methods and applications. The course emphasizes a multi-representational approach to calculus, with concepts, results, and problems expressed graphically, numerically, analytically, and verbally. The connections among these representations also are important. Sitting for the AP Exam is a course requirement.

Prerequisite: To be eligible for placement into AP Calculus BC, students must meet the following requirements:

1. The final grade must average a 95 in Honors Pre-Calculus. This average includes all four quarters as well the midterm and final exams for both semesters.

Course: AP Statistics (12) **1 Credit**

Description: The purpose of this course is to introduce the major concepts and tools for collecting, analyzing, and drawing conclusions from data. Students are exposed to four central concepts: 1. Exploring Data: Describing patterns and departures from patterns, 2. Sampling and Experimentation: Planning and conducting a study, 3. Anticipating Patterns: Exploring random phenomena using probability and simulation, and 4. Statistical Inference: Estimating population parameters and testing hypotheses. Sitting for the AP Exam is a course requirement.

Prerequisite: To be eligible for placement into AP Statistics, students must meet the following requirements:

1. Rising seniors must average 80 or higher in Algebra II. This average includes all four quarters as well the midterm and final exams for both semesters.
2. OR have completed Pre-Calculus.
3. Students cannot be currently enrolled in Pre-Calculus.

Physical Education

Incarinate Word Academy students take two semesters of physical education* and one semester of health. Students have the option of completing one season of an IWA sport, including St. Thomas High School cheerleading, for one semester of credit. The physical education department seeks to teach health and wellness skills, stress management, teamwork, and leadership through physical fitness.

Course: Physical Education (9, 10, 11, 12) **0.5/1.0 Credit**

Description: Physical Education emphasizes health-related fitness and an appreciation for teamwork and fair play through team and individual sports and fitness activities. Designed to introduce

students to a wide variety of fitness activities, students participate in aerobic fitness, yoga, weight training and fitness games, including Volleyball, Badminton, Flag Football, Ultimate Frisbee, Hockey and Agility/AB Workouts. Activity may include daily exercises, flexibility, drills, tournaments, skills assessments and written tests. Students will also have the opportunity to assess various aspects of their own fitness levels. This course may be taken both semesters for a full credit to satisfy the physical education requirement.

Offered: May take fall or spring semester

Course: Weight Training (10, 11, 12)

0.5/1.0 Credit

Description: This course is designed to give students the opportunity to learn weight training concepts and techniques used for obtaining optimal physical fitness. Students will benefit from comprehensive weight training and cardio respiratory endurance activities. Students will learn the basic fundamentals of weight training, strength training, aerobic training, and overall fitness training and conditioning. Key components to this course include weight room safety, warm-up/cool-down procedures, flexibility, lifting technique and safety, major muscle identification, and individual goal setting. Students will be empowered to make wise choices, meet challenges, and develop positive behaviors in fitness, wellness, and movement activity for a lifetime. This course may be taken both semesters for a full credit to satisfy the physical education requirement.

Offered: May take fall or spring semester

Science

The science curriculum is designed to encourage students to explore the fundamental laws of nature and how these laws relate to society, technology and industry. Students will develop critical thinking skills by conducting inquiry-based labs and solving problems using their knowledge of the laws of nature. By building the curriculum around curiosity and inquiry, students will develop the skills needed to solve problems in their daily lives now and in the future. Students are required to take Biology, Chemistry and Physics. Apart from these three core sciences, students may elect to take one or more of the following courses to satisfy the graduation requirements: Anatomy and Physiology, Forensic Science, AP Chemistry, AP Biology or Honors Engineering Design.

Course: Biology (9)

1 Credit

Description: Biology is the science of life. Students in biology will develop a conceptual framework for modern biology. IWA has created an interdisciplinary and hands-on approach designed to help students see biology as an active process rather than as an accumulation of facts. The course will be a survey of the most important topics in Biology, giving the student an appreciation for the depth and complexity of the Natural World. Students will learn about all of the Metabolic Pathways and the way cells perform all of the myriad chemical reactions that allow life to continue. Students will study Genetics and Evolution to see how traits are passed down from generation to generation. Students will survey living things, with particular emphasis on plants, animals and how living things relate to and affect each other. This will include our responsibility for being good stewards of our world. A number of methods will be used throughout the course including lecture, demonstrations, lab activities, discussions, projects, and active writing assignments.

Course: Honors Biology (9)**1 Credit**

Description: Honors Biology is a challenging course designed to prepare the students for AP Biology. Biology is the science of life. Students in biology will develop a conceptual framework for modern biology and an appreciation of science as a process. IWA has created an interdisciplinary and hands-on approach designed to help students see biology as an active and living process rather than as an accumulation of facts. The course will be a survey of the most important topics in Biology, giving the student an appreciation for the depth and complexity of the Natural World. Students will learn about all of the Metabolic Pathways and the way cells perform all of the myriad chemical reactions that allow life to continue. Students will study Genetics and Evolution to see how traits are passed down from generation to generation across the millennia. Students will survey living things, with particular emphasis on plants, animals and how living things relate to and affect each other. This will include our responsibility for being good stewards of our world. A number of methods will be used throughout the course including lecture, demonstrations, lab activities, discussions, projects, and active writing assignments. This course places emphasis on research, critical thinking, scientific writing, and real world application of knowledge. This course involves hands-on exploration of the Natural World through research projects, and lab inquiries, including designing student directed experiments to accurately test individualized hypotheses.

Prerequisites: For incoming 9th graders, Academic Advisors use middle school grades, entrance test scores, teacher recommendation, and admissions essay for placement into this course.

Course: Chemistry (10)**1 Credit**

Description: Chemistry introduces students to a range of topics addressing the chemical composition of the world around us. Basic chemistry concepts include stoichiometry, chemical reactions as described in chemical equations, atomic structure, bonding, acid and base solutions, and gas laws. Students will develop and execute laboratory procedures, manipulate data, and interpret results from scientific investigations designed to supplement scientific concepts. Students will become skilled in critical thinking and scientific problem solving. A TI -84 calculator is required.

Prerequisites: Biology and Algebra I

Course: Honors Chemistry (10)**1 Credit**

Description: Honors Chemistry introduces students to a physical science that relies heavily upon mathematical analysis. Basic chemistry concepts include stoichiometry, bonding, atomic structure, chemical reactions, chemical equations, solutions, acids & bases and gases. Students will develop procedures, manipulate data and interpret laboratory results. Developing critical thinking and problem solving skills are specific objectives of the course. Honors Chemistry is designed to provide a comprehensive chemical foundation in preparation for an introductory college chemistry course. A TI-84 calculator is required.

Prerequisites: To be eligible for placement into Honors Chemistry, students must meet the following requirements:

1. The final grade must average an 86 or higher in Honors Biology or must average a 93 or higher in Biology. This average includes the final grades for both semesters.

2. The final grade must average an 86 or higher in their most recent honors math class or must average a 93 or higher in their most recent on-level math class. This average includes the final grades for both semesters.

Course: Health and Wellness (10, 11, 12)

0.5 Credit

Description: This course is to prepare young women for an ever-changing society; in particular learning skills directly exceeding expectations relating to high school, college and life experience. Examples include improving communication techniques, developing time management proficiency, implementing techniques to cope with emotions and stressors, gaining an understanding of the effect relationships have on overall health, and learning to react in emergency situations.

Offered: May take fall or spring semester

Course: Anatomy and Physiology (11, 12)

1 Credit

Description: This two-semester course provides an introductory study of the structure and function of the human body. In Anatomy and Physiology, students will build a strong foundational knowledge of the human body including the mechanisms and processes that operate to maintain homeostasis. Students will explore these concepts through laboratory dissections, hands-on activities, and demonstrations. Upon completion, students should be able to demonstrate an understanding of the fundamental principles of anatomy and physiology and the relationship between the two disciplines.

Prerequisites: Biology and Chemistry

Course: Forensic Science (11, 12)

1 Credit

Description: Forensic Science is an upper level science course based on lab investigation, activities and exploration which applies many disciplines of scientific study such as biology, chemistry, physics, and environmental science to legal matters, such as solving crimes. This course will focus on the skills and concepts behind crime scene investigation, including the collection, identification and analysis of crime scene evidence. Laboratory exercises will include fingerprinting, handwriting analysis, blood spatter analysis, DNA profiling, hair and fiber examination and forensic anthropology, among others. Case studies and current events will be explored.

Prerequisites: Biology and Chemistry

Course: Physics (12)

1 Credit

Description: This course is an inquiry-based program that combines conceptual and mathematical descriptions of physical phenomena to construct a framework for understanding broader physics topics. Each new concept is introduced through connections to real world applications in the form of lab activities, calculations, and reading in the text. Critical thinking skills are emphasized in labs and problem sets as students build their ability to analyze different physical situations. Students in this course will use a combination of mathematical analysis and critical thinking to interrogate phenomena observed in nature while building data interpretation skills. A TI-84 calculator is required.

Prerequisites: Completion of Algebra, Biology, Geometry, Chemistry and Algebra II.

Course: Honors Physics (11, 12)

1 Credit

Description: This course is an inquiry-based program that combines conceptual and mathematical descriptions of physical phenomena to construct a framework for understanding broader physics topics. Each new concept is introduced through connections to real world applications in the form of lab activities, calculations, and reading in the text. In honors physics, students are held to a more rigorous set of academic expectations (more difficult concepts and problems in class, on homework, and on tests; more detail required for lab write-ups; formula sheets and constants must be on a 3" x 5" index card for tests) compared to the regular physics course. Critical thinking skills are emphasized in labs and problem sets as students build their ability to analyze different physical situations using a common set of skills. A TI-84 graphing calculator is required.

Prerequisites: To be eligible for placement into Honors Physics, students must meet the following requirements:

1. The final grade must average an 86 or higher in their previous honors or AP science course or must average a 93 or higher in their previous on level science course. This average includes the final grades for both semesters.
2. The final grade must average an 86 or higher in their most recent honors math class or must average a 93 or higher in their most recent on-level math class. This average includes the final grades for both semesters.
3. Have completed Algebra II.

Course: Honors Engineering Design and Problem Solving (11, 12)

1 Credit

Description: Design is the creative process of solving problems by identifying needs and then devising solutions. This solution may be a product, technique, structure, process, or many other things depending on the problem. Science aims to understand the natural world, while engineering seeks to shape this world to meet human needs and wants. Engineering design takes into consideration limiting factors or "design under constraint." Various engineering disciplines address a broad spectrum of design problems using specific concepts from the sciences and mathematics to derive a solution. The design process and problem solving are inherent to all engineering disciplines. Engineering Design and Problem Solving reinforces and integrates skills learned in previous mathematics and science courses. This course emphasizes solving problems, moving from well-defined toward more open ended, with real-world application. Students apply critical-thinking skills to justify a solution from multiple design options. Additionally, the course promotes interest in and understanding of career opportunities in engineering. This course is intended to stimulate students' ingenuity, intellectual talents, and practical skills in devising solutions to engineering design problems. Students use the engineering design process cycle to investigate, design, plan, create, and evaluate solutions. At the same time, this course fosters awareness of the social and ethical implications of technological development.

Prerequisites: To be eligible for placement into Honors Engineering, students must meet the following requirements:

1. The final grade must average an 86 or higher in their previous honors or AP science

- course or must average a 93 or higher in their previous on level science course. This average includes the final grades for both semesters.
2. The final grade must average an 86 or higher in their most recent honors math class or must average a 93 or higher in their most recent on-level math class. This average includes the final grades for both semesters.
 3. Must have completed Geometry or Honors Geometry and either Chemistry or Honors Chemistry.

Course: AP Biology (11, 12)

1 Credit

Description: AP Biology is designed to be the equivalent of a two-semester college introductory biology course usually taken by biology majors during their first year, and therefore the curriculum parallels that of a freshman level biology course. The AP Biology course is designed to be taken after completion of a first course in high school biology and chemistry. The course aims to provide students with the conceptual framework, factual knowledge, and analytical skills necessary to deal critically with the rapidly changing science of biology. Sitting for the AP Exam is a course requirement.

Prerequisites: To be eligible for placement into AP Biology, students must meet the following requirements:

1. The final grade must average an 86 or higher in their previous honors or AP science course or must average a 93 or higher in their previous on level science course. This average includes the final grades for both semesters.
2. The final grade must average an 86 or higher in their most recent honors math class or must average a 93 or higher in their most recent on-level math class. This average includes the final grades for both semesters.
3. Must be enrolled in Algebra II or higher level math class.
4. If a student is enrolled in two science courses, she must meet the prerequisite criteria in both courses in order to qualify for an AP Course.

Course: AP Chemistry (11, 12)

1 Credit

Description The purpose of Advanced Placement Chemistry is to provide a college level course in chemistry and to prepare the student to seek credit and/or appropriate placement in college chemistry courses. Inorganic chemistry concepts are covered in depth with aspects of organic chemistry included. This course meets regularly plus extra time per cycle during flextime and after school for extended laboratory time. Laboratories include qualitative and quantitative chemistry with a focus on detailed observations and analysis of data. Complete laboratory reports are required. Summer assignments include reading and on-line homework covering a review of Chemistry I. A TI-84 calculator is required. Sitting for the AP Exam is a course requirement.

Prerequisites: To be eligible for placement into AP Chemistry, students must meet the following requirements:

1. The final grade must average an 86 or higher in their previous Honors Chemistry course. This average includes the final grades for both semesters.
2. The final grade must average an 86 or higher in Honors Algebra II or must average a 93 or higher in Algebra II. This average includes the final grades for both semesters.
3. If a student is enrolled in two science courses, she must meet the prerequisite criteria in both courses in order to qualify for an AP Course.

Social Studies

The social studies department aims to inspire student curiosity towards human development, culture and ideas. As freshmen and sophomores, students take an integrated world history and geography class to gain a broad understanding of the world. As juniors and seniors, students will focus on American history, government, and economics in their journey towards becoming active citizens. Beginning junior year, students may qualify for AP instruction in U.S. History and Government. These AP classes are rigorous, have high expectations in analysis, synthesis, and evaluation in order to best prepare all students for the AP exam in May. In addition, the department offers students numerous one semester elective classes to enhance the IWA graduate's analytical skills and knowledge of the world around them.

Course: World History and Geography to 1500 CE (9)

1 Credit

Description: "The tapestry of history is woven of many threads"--Jacqueline Carey. This class is an integrated introduction to World History and Geography over two years, beginning with prehistory and ending in the late modern era. World History and Geography to 1500 begins with an overview of the principles of geography and each unit utilizes the themes of geography to analyze the development of civilizations and the subsequent political, social, and economic factors that define each era. Students will study the growth of civilization from prehistory through the early Renaissance. History topics include major events and people, political and economic evolutions, religious changes and conflicts, social and cultural movements, and intellectual developments. The goal of this course is to provide a general understanding of geographic factors and human motivations, which drive cultural development. Students will develop basic research and document analysis skills, short essay writing, note taking, and study skills.

Course: Honors World History and Geography to 1500 CE (9)

1 Credit

Description: "The tapestry of history is woven of many threads"--Jacqueline Carey. This class is an integrated introduction to World History and Geography over two years, beginning with prehistory and ending in the late modern era. World History and Geography to 1500 begins with an overview of the principles of geography and each unit utilizes the themes of geography to analyze the development of civilizations and the subsequent political, social, and economic factors that define each era. Students will study the growth of civilization from pre-history through the early Renaissance. History topics include major events and people, political and economic evolutions, religious changes and conflicts, social and cultural movements, and intellectual developments. The goal of this course is to provide a general understanding of geographic factors and human motivations, which drive cultural development. The rigor and thematic content analysis of this course is at an advanced level. Additionally students learn document based query analysis, introduction to college level essay writing, and fundamentals of historical research and analysis. The unit pacing is similar to on-level, but the level of thematic analysis, primary source usage, and student products are much more advanced. Students will practice document analysis skills, advanced essay writing, and note taking from lecture skills. This course will develop students' reading, writing, and analytical skills in preparation for advancement to Honors level World History and Geography from 1500 in their sophomore year and provides a foundation for Advanced Placement courses in social studies.

Prerequisites: For incoming 9th graders, Academic Advisors use middle school grades, entrance test scores, teacher recommendation, and admissions essay for placement into this course.

Course: World History and Geography from 1500 CE (10) **1 Credit**

Description: “History is indeed the witness of the times, the light of truth”—Cicero. This class is an integrated World History and Geography class beginning with the modern world, around 1500 CE. Students will study the development of world nations and cultures during this time, including major events, political structures, religions, cultural movements, wars, and intellectual developments. Students will also be able to analyze how geographical features and population impact history. This course prepares students with research and analytical skills, and helps them contextualize the modern world.

Prerequisite: World History and Geography to 1500 CE

Course: AP World History: Modern (10) **1 Credit**

Description: In AP World History students will work to develop their understanding of global history by investigating significant events, individuals, developments, and processes. The course will focus on historical events from 1500 C.E to the present. Students develop and use the same skills, practices, and methods employed by historians: analyzing primary and secondary sources; developing historical arguments; making historical connections; and utilizing reasoning about comparison, causation, and continuity and change over time. This course helps to prepare students not only for the Advanced Placement World History exam, but for Advanced Placement U.S. History in junior year. Students will be exposed to challenging historical concepts, critical analysis of primary and secondary sources, and complex essay writing. Sitting for the AP Exam is a course requirement.

Prerequisites: To be eligible for placement into Honors World History and Geography from 1500 CE, students must meet the following requirements:

1. The final grade must average an 88 or higher in Honors World History and Geography to 1500 CE or must average a 93 or higher in World History and Geography to 1500 CE. This average includes the final grades for both semesters.

Course: U.S. History (11) **1 Credit**

Description: “A people without knowledge of their past history, origin, and culture are like a tree without roots”—Marcus Garvey. Students will learn about the development of the United States as a nation, significant places and people, and the development of important legal and political concepts within the nation. In addition, students will be exposed to a variety of primary sources and use them to further their understanding of United States history. The first semester will trace the growth of America as a nation from its colonial status to the divisions caused by the Civil War. The second semester will pick up after Reconstruction and follow America’s growth as a world power to its current status in the present.

Prerequisite: World History and Geography from 1500 C.E.

Course: AP U.S. History (11) **1 Credit**

Description: “A people without knowledge of their past history, origin, and culture are like a tree without roots”—Marcus Garvey. Students will learn about the development of the United States as a nation, significant places and people, and the development of important legal and political concepts within the nation, as well as the effects and causes of the American economic development. The first semester will trace the growth of America as a nation from its

colonial status to the divisions caused by the Civil War. The second semester will pick up after Reconstruction and follow America's growth as a world power to its current status in the present. In addition, students will be exposed to a variety of primary sources and use them to further their understanding of United States history. The course is designed to be similar to a college-level course, and upon completion of the course, students should be sufficiently prepared to take the AP exam. Students will prepare for the exam by writing regular in-class essays using primary and secondary documents. Sitting for the AP Exam is a course requirement.

Prerequisites: To be eligible for placement into AP U.S. History, students must meet the following requirements:

1. The final grade must average an 88 or higher in Honors World History and Geography from 1500 CE or must average a 93 or higher in World History and Geography from 1500 CE. This average includes the final grades for both semesters.

Course: Economics – First Semester (12)

0.5 Credit

Description: "Economy is the method by which we prepare today to afford the improvements of tomorrow"--Calvin Coolidge. Economics is a one semester course, focusing on the study of macroeconomics. Topics include the fundamental principles of economics, economic systems, supply and demand, business and labor, and the government's role in the economy. Students will also examine modern challenges in the American economy, such as poverty, inequality, and globalization. The class will also relate economic principles to Catholic social teaching with the understanding that the study of economics should not be separated from ethical concerns.

Prerequisite: U.S. History

Offered: May take fall semester only

Course: Honors Macroeconomics – First Semester (12)

0.5 Credit

Description: "Economy is the method by which we prepare today to afford the improvements of tomorrow"-- Calvin Coolidge.
Honors Macroeconomics is a one semester course within the high school environment. Topics covered in this course include basic economic concepts, measurement of economic performance, national income and price determination, economic growth, and international finance. Students will be challenged by the college reading load, faster pace, and the analytical nature of the course. The class will also relate economic principles to Catholic social teaching with the understanding that the study of economics should not be separated from ethical concerns.

Prerequisites: To be eligible for placement into Honors Macroeconomics, students must meet the following requirements:

1. The final grade must average an 88 or higher in AP U.S. History or must average a 93 or higher in U.S. History. This average includes the final grades for both semesters.

Offered: May take fall semester only

Course: U.S. Government – Second Semester (12)

0.5 Credit

Description: “Man is by nature a political animal” --Aristotle. U.S. Government is a one semester course. It provides an overview of the ideas on which the government is based, the principles of the Constitution, the influence of media, interest groups and political parties on the democratic process, the powers and responsibilities of each of the branches of government, and the development of civil liberties and civil rights. Students will complete group and individual projects examining government issues up close.

Prerequisite: U.S. History

Offered: May take spring semester only

Course: AP U.S. Government and Politics – Second Semester (12)

0.5 Credit

Description: “Man is by nature a political animal” --Aristotle. AP US Government and Politics is a one-semester, college level class. The course will begin with an in-depth analysis of the documents and philosophies underpinning American democracy. Then students will learn about various forms of political participation, and how the media, elections, and political parties shape civil society. Students will analyze the powers and limits of the three branches of government and how they interact. Finally, students will examine the development of civil rights and liberties in our nation, with a focus on applying the precedents of Supreme Court cases. Students will develop their critical thinking skills by applying the course content to real life scenarios and current events. Students will also practice essay writing and engage in a mock Congress. Students are required to take the AP exam in May.

Prerequisites: To be eligible for placement into AP U.S. Government & Politics students must meet the following requirements:

1. The final grade must average an 88 or higher in AP U.S. History or must average a 93 or higher in U.S. History. This average includes the final grades for both semesters.

Offered: May take spring semester only

Course: Ancient Greek and Roman Culture (10, 11, 12)

0.5 Credit

Description: Ancient Greek and Roman Culture will immerse students in the study of literature, art, culture throughout the various time periods of the Ancient Civilizations. Students will explore ancient Greek culture, literature, and history through analysis of classical text, language, art and mythology. Students will also explore ancient Roman culture, literature, and history through analysis of classical text, language, art and mythology. Emphasis will be placed on making real world connections to Ancient Greek and Roman cultures, evaluating its influence on modern western civilization today.

Offered: May take fall or spring semester

Course: Introduction to Broadcast Journalism (10, 11, 12)

0.5 Credit

Description: The course provides instruction in news reporting and editing for both on-air video broadcast and print media. Students refine their analytical reading, expository writing, and oral communication skills and are provided with experiences that may form the basis for a

future college major in communications. Students prepare and present news packages and enterprise reports (original stories not from a press release). Topics covered include reporting, writing news copy, sound, and digital video editing, and presentation design. In addition, students will study the historical and contemporary practices of broadcast journalism in society, with emphasis on methods, writing, announcing and ethics. The importance of researching information and fact-finding are stressed throughout the course. Much of the course is project-based, as students apply their knowledge producing regular news segments to be shared with the school community.

Offered: May take fall or spring semester

Course: Advanced Broadcast Journalism (11, 12) **0.5 Credit**

Description: This course builds upon the broadcasting skills learned in Broadcast Journalism. In addition to expanding their knowledge and abilities in broadcast journalism, students will take on more of a leadership role. Students will continue to refine their analytical reading, expository writing, and oral communication skills, building a solid communication foundation. Students prepare and present news packages and enterprise reports (original stories not from a press release). Topics covered include reporting, writing news copy, sound, and digital video editing, and presentation design. In addition, students will study the historical and contemporary practices of broadcast journalism in society, with emphasis on methods, writing, announcing and ethics. The importance of researching information and fact-finding are stressed throughout the course. Much of the course is project-based, as students apply their knowledge producing regular news segments to be shared with the school community.

Prerequisite: Introduction to Broadcast Journalism

Offered: May take fall or spring semester

Course: Contemporary U.S. Women's History (10, 11, 12) **0.5 Credit**

Description: "There will never be a new order until women are a part of it"--Alice Paul. Women's quest for participation in America didn't end with the passing of the 19th Amendment in 1920 – rather, it's where it all began. Contemporary U.S. Women's History is a one-semester elective that will pick up at the beginning of the 1920s and examine the growths and pitfalls that women faced in this country. Furthermore, the course will examine the separate histories of the various races and cultures that make up the female population in America, including White, African-American, Asian-American, Latina, Chicana, and Native American women. The course will be both an in-depth examination as well as a form of comparative studies that aim to reach issues of the modern-day.

Offered: May take fall or spring semester

Course: Current Events (10, 11, 12) **0.5 Credit**

Description: "Were it left to me to decide whether we should have a government without newspapers, or newspapers without a government, I should not hesitate a moment to prefer the latter. But I should mean that every man should receive those papers and be capable of reading them"-- Thomas Jefferson. Current Events is a one semester elective course which explores present controversies being discussed in the news. The course topics are driven by what is

being debated in the papers, on social media, and online as the course proceeds. Students will also learn the necessary background information to understand the news, including information on history, governmental structures, and culture in the U.S. and the world. Media literacy and critical analysis of the news and news bias will be taught at the beginning and reinforced throughout the semester. Students will complete a culminating project focused on a current event issue that interests them.

Offered: May take fall or spring semester

Course: Intro to Psychology (10, 11, 12) 0.5 Credit

Description: “People’s beliefs about their abilities have a profound effect on those abilities.”- Albert Bandura. The purpose of Psychology is to introduce students to the systematic and scientific study of the behavior and mental processes of human beings. In this course, students will be exposed to the psychological facts, principles, and phenomena associated with each of the major subfields within psychology. Throughout this semester-long course, students will study the core concepts and theories in psychology, define key terms and use them in everyday vocabulary, learn the basic skills of psychological research, apply concepts to their own lives, all while developing critical thinking skills.

Offered: May take fall or spring semester

Course: Sociology (11, 12) 0.5 Credit

Description: The function of sociology, as of every science, is to reveal that which is hidden”--Pierre Bourdieu. Sociology is the study of social life, social change, and the social causes and consequences of human behavior. This elective course is a one semester introduction to sociology as a way to understanding the world, and will introduce students to the sociological perspective in examining our lives and social experiences, as well as many issues facing society today. Students will be introduced to different ways of seeing the world, provided with tools for understanding their own social position, and investigate how to obtain a just, equal, more peaceful and diverse society. In this course, students will learn the basics of sociology through a variety of readings and film clips, as well as test theories and recognize the social construction we all experience.

Offered: May take fall or spring semester

Course: War & Revolution: Europe Between 1914 & 1945 (10, 11, 12) 0.5 Credit

Description: This course will begin with the eve of World War I, when a flourishing Europe would be plummeted into bloodshed and devastation never seen before in history. Students will learn about the war, the Russian Revolution, the economic depression, and the rise of Totalitarian leaders. This was an era of “strong men” and even stronger ideologies. Finally, the class will explore the many facets of World War II, including frightening new technologies of warfare that challenged the ethics of Western civilization. Students will grapple with historiographical questions such as whether Germany caused both wars or the morality of terror bombing enacted by both sides. The course will be seminar style, including weekly readings of primary and secondary sources and class discussions.

Offered: May take fall or spring semester

Theology

The discipline of Theology permeates all facets of our lives and provides the lens through which students can understand and relate to other areas of study. Additionally, the Theology curriculum supports the mission of Incarnate Word Academy by helping students to “grow in their relationship with Jesus, the Incarnate Word, and live according to His values.” Each course builds upon the previous one as the students discover more about the Catholic faith tradition and the impact of their relationship with God in their lives both now and in the future. Course titles and descriptions reflect the doctrinal elements of the United States Conference of Catholic Bishops Curriculum Framework for High School Theology and are aligned with the Archdiocese of Galveston-Houston’s High School Curriculum Guide.

Course: Theology I: The Revelation of Jesus Christ in Scripture (9) 0.5 Credit

Description: The purpose of this course is to give students a general knowledge and appreciation of the Sacred Scriptures. Through their study of the Bible they will come to encounter the living Word of God, Jesus Christ. In this course they will learn about the Bible, authored by God through inspiration, and its value to people throughout the world. They will learn how to read the bible and will become familiar with the major sections of the Bible and the books included in each section. The students will pay particular attention to the Gospels, where they may grow to know and love Jesus Christ more personally. This course is taken during the fall semester.

Offered: May take fall semester only

Course: Theology I: Who Is Jesus Christ (9) 0.5 Credit

Description: The purpose of this course is to introduce students to the mystery of Jesus Christ, the Living Word of God and the Second Person of the Blessed Trinity. In this course, students will understand that Jesus Christ is the ultimate Revelation to us from God. In learning about who He is, the students will also learn who He calls them to be. This course also includes an introduction to Saint John Paul II’s teaching of Theology of the Body. This course is taken during the spring semester.

Offered: May take spring semester only

Course: Theology II: The Mission of Jesus Christ (10) 0.5 Credit

Description: The purpose of this course is to help students understand all that God has done for us through his Son, Jesus Christ. Through this course of study, students will learn that for all eternity God has planned for us to share eternal happiness with him, which is accomplished through the Redemption Christ won for us. Students will approach salvation history from the perspective of story in order to understand how God has laid out His plans through the Old Testament, leading up to the life, ministry, death, and resurrection of Jesus. Students will learn that they share in this Redemption only in and through Jesus Christ. They will also be introduced to what it means to be a disciple of Christ and what life as a disciple entails in their pursuit of the universal call to holiness. This course is taken during the fall semester.

Prerequisite: Theology I

Offered: May take fall semester only

Course: **Theology II: Jesus Christ's Mission Continues in the Church (10)** **0.5 Credit**

Description: The purpose of this course is to help the students understand that in and through the Church they encounter the Living Jesus Christ. They will be introduced to the fact that the Church was founded by Christ through the Apostles and is sustained by him through the Holy Spirit. The students will come to know that the Church is the living Body of Christ today. This Body has both Divine and human elements. In this course, students will learn not so much about events in the life of the Church, but about the sacred nature of the Church. This course is taken during the spring semester.

Prerequisite: Theology I

Offered: May take spring semester only

Course: **Theology III: Sacraments as Privileged Encounters with Christ (11)** **0.5 Credit**

Description: The purpose of this course is to help students understand that they can encounter Christ today in a full and real way in and through the sacraments, and especially through the Eucharist. Students will examine each of the sacraments in detail so as to learn how they may encounter Christ throughout life. Additionally, this course examines the scriptural and historical roots of the sacraments and develops growth in critical reading and analysis through the writings of the Church Fathers, conciliar documents, and papal encyclicals. This course is taken during the fall semester.

Prerequisite: Theology II

Offered: May take fall semester only

Course: **Theology III: Life in Jesus Christ (11)** **0.5 Credit**

Description: The purpose of this course is to help students understand that it is only through Christ that they can fully live out God's plans for their lives. Students are to learn the moral concepts and precepts that govern the lives of Christ's disciples. This course includes further exploration into St John Paul II's Theology of the Body as well as a closer look at various Church documents pertaining to important moral issues facing the modern world. Students will acquire college readiness research skills during the spring term through a semester-long research paper in collaboration between their English and Theology courses. This course is taken during the spring semester.

Prerequisite: Theology II

Offered: May take spring semester only

Course: **Theology IV: Living as a Disciple of Jesus Christ in Society (12)** **0.5 Credit**

Description: The purpose of this course is to introduce students to the social doctrine of the Catholic Church (also known as "Catholic social teaching"). In this course, students are to learn how Christ's concern for others, especially the poor and needy, is present today in the Church's social teaching and mission. Catholic social teaching articulates a vision of true human flourishing in solidarity with the whole human family. It identifies the social ills which obstruct that flourishing, both for individual human persons, and for whole communities of

people. Most importantly, it critiques inhumane structures and behaviors, and offers alternative forms of communal life and moral reasoning that build up “a culture of life” and “a civilization of love.” This course is taken during the fall semester.

Prerequisite: Theology III

Offered: May take fall semester only

Course: Theology IV: Ecumenical and Interreligious Issues (12) 0.5 Credit

Description: The purpose of this course is to help the students understand the manner in which the Catholic Church relates to non-Catholic Christians as well as to other religions of the world. Building on the foundational truth that Jesus Christ established the Catholic Church and entrusted to her the fullness of God’s Revelation, the course is intended to help students to recognize the ways in which important spiritual truths can also be found in non-Catholic Christian churches and ecclesial communities as well as in non-Christian religions. It is also intended to help them to recognize the ways in which other systems of belief and practice differ from the Catholic faith. This course is taken during the spring semester.

Prerequisite: Theology III

Offered: May take spring semester only

Course: Intro to Philosophy (11, 12) 0.5 Credit

Description: This course will introduce students to the fundamental topics and concepts of the history of philosophy. Students explore such concepts as the nature of the world and how we have access to knowledge of the world; moral behavior and the nature of good and evil; the relationship between minds and bodies; the relationship between our thoughts and the external world; and how we should employ logical analysis and empirical observations to evaluate arguments. Throughout this semester long course, students will learn the basic skills of philosophical research, apply concepts to their own lives and develop critical thinking skills.

Offered: May take fall or spring semester

World Languages

Students are required to complete three years of the same language. Through world language courses, students are expected to show proficiency and achievement in the four basic language skills: listening, speaking, reading, and writing. The world language program also fosters global understanding and cultural awareness preparing students for living in a global world. Interested and qualified students can take the rigorous AP courses and sit for the AP exam.

Course: French I (9, 10, 11, 12)

1 Credit

Description: This course is designed to introduce students to the French language and the French-speaking world. Students will learn basic French grammar and vocabulary. Students will also learn how to express themselves verbally and in writing.

Course: French II (9, 10, 11, 12)

1 Credit

Description: French II is designed to introduce students to new grammatical concepts and more advanced vocabulary. Cultural activities expose students to new cultures. Improving written and oral communication is emphasized.

Prerequisite: French I or placement exam for incoming 9th graders

Course: French III (10, 11, 12)

1 Credit

Description: French III is a French course that includes instruction and practice in all four language skills: listening, speaking, reading, and writing. While one of the goals of French III is to learn the grammatical structures of the French language, the emphasis will not be isolated structures but rather on integrating grammar into proficiency-oriented activities. Selected reading materials supplement advanced conversational patterns. Developing an appreciation of the history, culture, and customs of francophone countries is emphasized.

Prerequisite: French II

Course: Honors French III (10, 11, 12)

1 Credit

Description: Honors French III is an advanced French course that includes instruction and practice in all four language skills: listening, speaking, reading, and writing. It is a preparation course for AP French. While one of the goals of Honors French is to learn the grammatical structures of the French language; the emphasis will not be isolated structures but rather on integrating grammar into proficiency-oriented activities. Selected reading materials supplement advanced conversational patterns. Developing an appreciation of the history, culture, and customs of francophone countries is emphasized.

Prerequisites: To be eligible for placement into Honors French III, students must meet the following requirements:

1. The final grade must average a 93 or higher in French II. This average includes the final grades for both semesters.
2. The student's current World Languages teacher will determine the quality of the student's participation in her current World Languages class.

Course: AP French IV (11, 12)

1 Credit

Description: The AP French Language and Culture Course is approximately equivalent to an upper-intermediate college or university course in French language and culture. This course is designed as an invitation to further explore the francophone world. This class is conducted mostly in French. Students will refine their French skills while adding new vocabulary pertinent to a variety of subjects. They will also explore a variety of cultural material from the francophone world. This class is designed to prepare students for the AP French Language and Culture Test. Sitting for the AP Exam is a course requirement.

Prerequisites: To be eligible for placement into AP French IV, students must meet the following requirements:

1. The final grade must average a 88 or higher in Honors French III or must average a 93 or higher in French III. This average includes the final grades for both semesters.
2. The student's current World Languages teacher will determine the quality of the student's participation in her current World Languages class.

Course: Latin I (9, 10, 11, 12) **1 Credit**

Description: Latin I course introduces students to the ancient language of the Romans, to their cultural influence in art, history, and emphasizes the connections between Latin and other languages. The knowledge of Latin enhances general language learning, especially English. It strengthens the students' skills of interactive learning and self-assessment. The students will read, analyze, and interpret Latin; they will gain knowledge of grammar, vocabulary, syntax, and derivatives, as well as reinforce the knowledge of other disciplines through the study of Latin.

Course: Latin II (9, 10, 11, 12) **1 Credit**

Description: Latin II course continues the work of Latin I in vocabulary, syntax, mythology, history, and derivatives. The students will strengthen their skills on sight translation, reading, and analysis of Latin texts. The goal of the study is to achieve proficiency in the above areas and develop oral and written language skills. The students will be introduced to the authentic works of Ovid and Vergil and gain insight into ancient Roman culture and mythology. All students will take the National Latin Exam.

Prerequisite: Latin I or placement exam for incoming 9th graders.

Course: Latin III (10, 11, 12) **1 Credit**

Description: Latin III students will read, understand, and interpret Latin. They will consolidate advanced Latin grammar, vocabulary, and pronunciation skills, as well as read by sight, translate literally, discuss and analyze passages from the textbook. The students will have insight into ancient poetry (Ovid, Catullus, Horace, Vergil) and discover the cultural, historical, and social context of Latin literature. All students will take the National Latin Exam.

Prerequisite: Latin II

Course: Honors Latin III (10, 11, 12) **1 Credit**

Description: Honors Latin III is an advanced Latin course that includes instruction and practice in all language skills in preparation for AP Latin. Selected reading materials supplement advance linguistic understanding. Provision is made for developing an appreciation of the history, culture, and customs of the history of Latin. They will consolidate advanced Latin grammar, vocabulary, and pronunciation skills, as well as read by sight, translate literally, discuss and analyze passages from the textbook. The students will have insight into ancient poetry (Ovid, Catullus, Horace, Vergil) and discover the cultural, historical, and social context of Latin literature. All students will take the National Latin Exam.

Prerequisites: To be eligible for placement into Honors Latin III, students must meet the following requirements:

1. The final grade must average a 93 or higher in Latin II. This average includes the final grades for both semesters.
2. The student's current World Languages teacher will determine the quality of the student's participation in her current World Languages class.

Course: AP Latin IV (11, 12) **1 Credit**

Description: AP Latin IV prepares students for the AP Latin Literature Exam. The course is structured according to the requirements of the College Board's *AP Latin Course Description*. The acquaintance with *Aeneid* gives students the opportunity to appreciate the historical background and the poetic mastery of Vergil and the acquaintance with Caesar's Gallic War allows the students to be engaged with the controversial issues of war and peace, empire, ethnicity, and leadership. English readings from Vergil's *Aeneid* and Caesar's *Gallic war* are also included in the required Syllabus in order to put the Latin excerpts in a significant context. Sitting for the AP Exam is a course requirement.

Prerequisite: To be eligible for placement into AP Latin IV, students must meet the following requirements:

1. The final grade must average a 88 or higher in Honors Latin III or must average a 93 or higher in Latin III. This average includes the final grades for both semesters.
2. The student's current World Languages teacher will determine the quality of the student's participation in her current World Languages class.

Course: Spanish I (9, 10, 11, 12) **1 Credit**

Description: This course is designed to introduce students to the Spanish language and the Spanish-speaking world. Students will develop and improve the four language skills: listening, speaking, reading, and writing through thematic chapters and a variety of cultural lessons. The use of technology in the classroom will help to integrate all the skills in a context of immersion. Students learn to appreciate the history, culture, and customs of the Spanish speaking countries. All students will take the National Spanish Exam.

Course: Spanish II (9, 10, 11, 12) **1 Credit**

Description: In this course, students build on the foundation established in Spanish I. The course is designed to engage in language learning, to master some common and specialized terms and phrases and to comprehend a wide range of grammar patterns through a variety of creative, interactive activities that integrate presentational, interpretive, and interpersonal communication. The four language skills of listening, speaking, reading, and writing are emphasized and further developed in this course in order to acquire the ability to communicate and understand Spanish. The use of technology in the classroom will help to integrate all the skills in a context of immersion. Students learn to appreciate the history, culture, and customs of the Spanish speaking countries. All students will take the National Spanish Exam.

Prerequisite: Spanish I or placement exam for incoming 9th graders

Course: Spanish III (10, 11, 12) **1 Credit**

Description: This course offers intermediate-advanced language instruction. Students will engage in language learning, to master some common and specialized terms and phrases and to comprehend a wide range of grammar patterns. The four language skills of listening, speaking, reading, and writing are emphasized and developed this year in order to acquire the ability to communicate and understand Spanish. While one of the goals of Spanish III is to learn specialized and advanced grammatical structures of the Spanish Language, the emphasis will not be isolated structures but rather on integrating grammar into proficiency-oriented activities. The use of technology in the classroom will help to integrate all the skills in a context of immersion. All students will take the National Spanish Exam.

Prerequisite: Spanish II

Course: Honors Spanish III (10, 11, 12) **1 Credit**

Description: This course offers intermediate-advanced language instruction. Students will engage in wide range of advanced grammatical structures and learn through a variety of creative and interactive activities that integrate presentational, interpretive, and interpersonal communication, while also gaining an appreciation of the history, culture, and customs of Spanish speaking countries. Students will utilize their iPads to access the course e-book, educational recordings, videos, and films. The class is taught mostly in Spanish. All students will take the National Spanish Exam.

Prerequisites: To be eligible for placement into Honors Spanish III, students must meet the following requirements:

1. The final grade must average a 93 or higher in Spanish II. This average includes the final grades for both semesters.
2. The student's current World Languages teacher will determine the quality of the student's participation in her current World Languages class.

Course: Spanish IV (11, 12) **1 Credit**

Description: This course offers intermediate-advanced language instruction. Students will further language learning and interpretation abilities by reviewing grammatical concepts and structures to improve their interpretive, interpersonal, and presentational skills. Students will explore cultural concepts more deeply and also engage in a variety of projects where they apply their language proficiency abilities. The emphasis of this course is on practicing conversational language acquisition. All students will take the National Spanish Exam.

Prerequisite: Spanish III

Course: AP Spanish IV (11, 12) **1 Credit**

Description: AP Spanish IV is approximately equivalent to an upper-intermediate college or university course in Spanish language and culture. This course is an advanced level Spanish course in which students explore six principal themes and engage through a variety of authentic print, audio, and video sources. This class is conducted exclusively in Spanish. Students will study cultures and events in depth and will make connections and comparisons to other cultures including their own. This course aims to prepare students for the Advanced Placement

Spanish Language and Culture Examination through focused activities and exam preparation strategies. Students will also use technology in the classroom to help integrate all the skills in a context of immersion. This course is taught in Spanish. All students will take the National Spanish Exam. Sitting for the AP Exam is a course requirement.

Prerequisites: To be eligible for placement into AP Spanish IV, students must meet the following requirements:

1. The final grade must average a 88 or higher in Honors Spanish III or must average a 93 or higher in Spanish III. This average includes the final grades for both semesters.
2. The student's current World Languages teacher will determine the quality of the student's participation in her current World Languages class.

Other

Course: Study Hall

(10, 11, 12)

Description: Study Hall provides a time for students to work individually and quietly to complete homework, study, research, complete college applications, or to read quietly. Students may register for one semester of study hall per year and a total of two semesters prior to graduation.

Offered: May take fall or spring semester
