Dear Families,

As we enter the final nine weeks of the school year, I wanted to follow up on the requirement that all school divisions conduct testing for lead in drinking water in all school facilities. The General Assembly passed legislation this year which required all school divisions to conduct testing for lead in drinking water in all school facilities. I am pleased to convey that Norton City Schools completed this process and the reports determined that the collection, preservation and analysis of all parameters represented by the reports were in compliance with the specified requirements.

Once again, I value your partnership with our schools. I am honored to be able to serve this community, school division, and your children as the Superintendent for Norton City Schools.

Sincerely,

Dr. Gina J. Wohlford
