

2022 Summer Programs

Focused mainly on STEM programs in the Northeast Region

There are a huge variety of summer programs available for middle and high school students in and around Massachusetts. This list by no means encompasses all of them. Below you will find options ranging from pre-college programs (offered by colleges and universities for high school students) to STEM summer camps to online classes. Cost for these programs range from free to over \$10,000. Most of them do offer financial assistance based on need and occasionally on minority status, though financial aid deadlines often occur before the main application deadline, so the earlier you apply, the better. There are different application requirements for each of the programs (COVID vaccination status, gpa, etc) and different benefits (college credit, certificates, etc), so make sure to read more at the attached links for the programs you are interested in. Since we are getting this list together a bit late this year, programs that have already passed the deadlines have been excluded from the list.

Acera School Summer Camp - rolling admissions

The Acera School in Winchester, MA has day camps with a variety of themes for ages 7-17. Multiple sessions are available. *Cost ranges from \$420 - \$840 (financial aid is available).*
