

## 2022-2023 Summer Work Instructions for AP Calculus AB Students

Students,

Please work through each of the 6 assignments. Write your answers in a printed version. If you have enough room, you may do the steps on the worksheet. If not, please number and write out the steps for the problems that do not have the room for work on a separate sheet of paper. Staple the paper to the worksheet. Do this for each worksheet and keep them in a folder to be turned in when you return to school in the fall.

Do these worksheets at your leisure. They are not due until the first day of school. If you are new to our school and have not covered some of the material, please make a note next to those problems. This is not meant to add stress to your summer. Rather, it is to help you stay on top of concepts learned this past year. It will give me information on what we need to brush up on at the beginning of the 1st semester.

Thank you for your efforts and have a wonderful summer.

Mrs. Boatright  
AP Calculus Teacher
