**Population Compliance**

The chart to the left depicts the 2020 Census population of your assigned Trustee Zone. If the % Difference value is over 10%, then the Trustee Zone is out of compliance for "equivalent population."

Having populations from highly populated zones in lower populated zones will decrease the variance. You can use the "Percent Difference Calculator" provided on sheet 02 to compare your variance percentages as desired.

\*Calculations are based upon requirements established by the Idaho State Board of Education.

**Census Block Information**

If you seek a total within a census block, then the total census block population is not being split by a current trustee zone boundary. The trustee zone boundaries should be modified to include ALL of the census block.

The census block populations are color coded by trustee which trustee zone they have been assigned to.
