Areas on concentration:

- Why has maintenance been deferred and more money should be allocated to upkeep of buildings.
- Discussion ensued on Open Enrollment and the aspect of what it contributes to the district in terms of finance, culture, course offerings, sports and the YS connection that many of our Open Enrollment students already have to YS i.e. former YS residents.
- Ed Choice and Vouchers and how has it impacted the YS Schools
- What is our per pupil expenditure and how does it compare to other districts with the understanding that YS has a high reliance on property taxes.

- How much funding will YS receive via the Ohio Facilities Commission, small amount compared to other districts due to us being a high wealth district along with our exempted status.
- The loss of students in the district in the past 25-30 years along with the decline of students of color.
- The affordability issue of living in YS along with competing for tax dollars with other entities in YS i.e. Village Council and Miami Township
- Strong feelings that maintenance should be the initial priority as opposed to new school(s)
- Appreciation of the thorough nature of the recommendations by the task force along with the process that was followed
- Question of how much will the maintenance cost
- John G. giving a historical perspective of all the schools (current and closed) in the district
- Building and regaining the trust of the community
