Appendix: Room Listing	27

Section One: Overview

Statement of Purpose

The purpose of this Utilization Study is to document and illustrate the existing utilization of Hinsdale Central High School and Hinsdale South High School.

The focus of this study will be academic “contact areas” that directly affect student instruction and experience and help us determine the current utilization of our high schools. The purpose of the report is to determine utilization of our high schools, and including all the athletic spaces and lunchrooms in the calculations do not help us answer the question of utilization. For this report, contact areas will include all areas that are used and scheduled exclusively for instruction, including General Classrooms, Class Labs, Specialty Instructional spaces, and “Capped” Classrooms that are used for special education. For the purposes of this report, athletic facilities, cafeterias, and auditoriums are not included in the academic contact areas despite the fact that our athletic facilities in both schools are used as academic contact areas and the auditorium and cafeteria are used at Hinsdale Central for study hall.

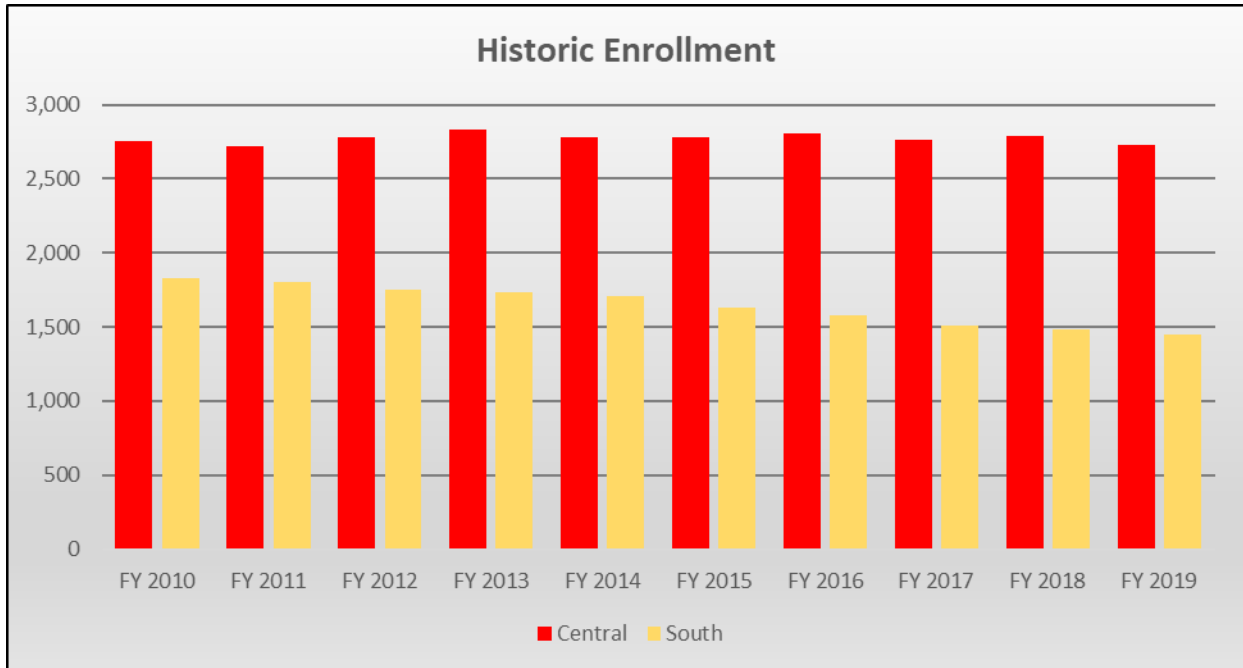

Enrollment Trends

Hinsdale District 86 contracted a demographer to compile student enrollment data and make projections for future enrollment. Dr. John D. Kasarda completed the most recent report in August 2015. A demographer uses historic data for the District and any feeder districts, live birth data, and housing and construction reports to develop trends and calculate cohort survival rates. The trends and survival rates are used to make projections about future enrollment in the District. All historic enrollment data has been updated to reflect the numbers presented in the Fall Housing Report, which is generated by the Illinois State Board of Education (ISBE). The enrollment counts are generated using serving school on September 30 of each fiscal year. The Transition Center and Bridge Program, programs for young adults ages 18-22, have not been included in the historic or projected enrollment data.

The demography report provided the District with enrollment projections based on the historic data noted above and assumptions made about future housing turnover as well as family in-migration. Dr. Kasarda provided three sets of projections. The first projection (Series A) assumes a lower limit of student enrollment and represents the lowest attendance Dr. Kasarda believes the District could experience. The second (Series B) is based on the expected housing turnover and family in-migration. The third (Series C) is an upper limit student enrollment assumption, which is the highest attendance Dr. Kasarda believes the District will experience. The projections presented here for Hinsdale Central and South show the upper, middle, and lower limited predicted in the demography report. Below are the historic enrollment numbers for the previous 10 fiscal years along with the projections for the next 10 fiscal years.

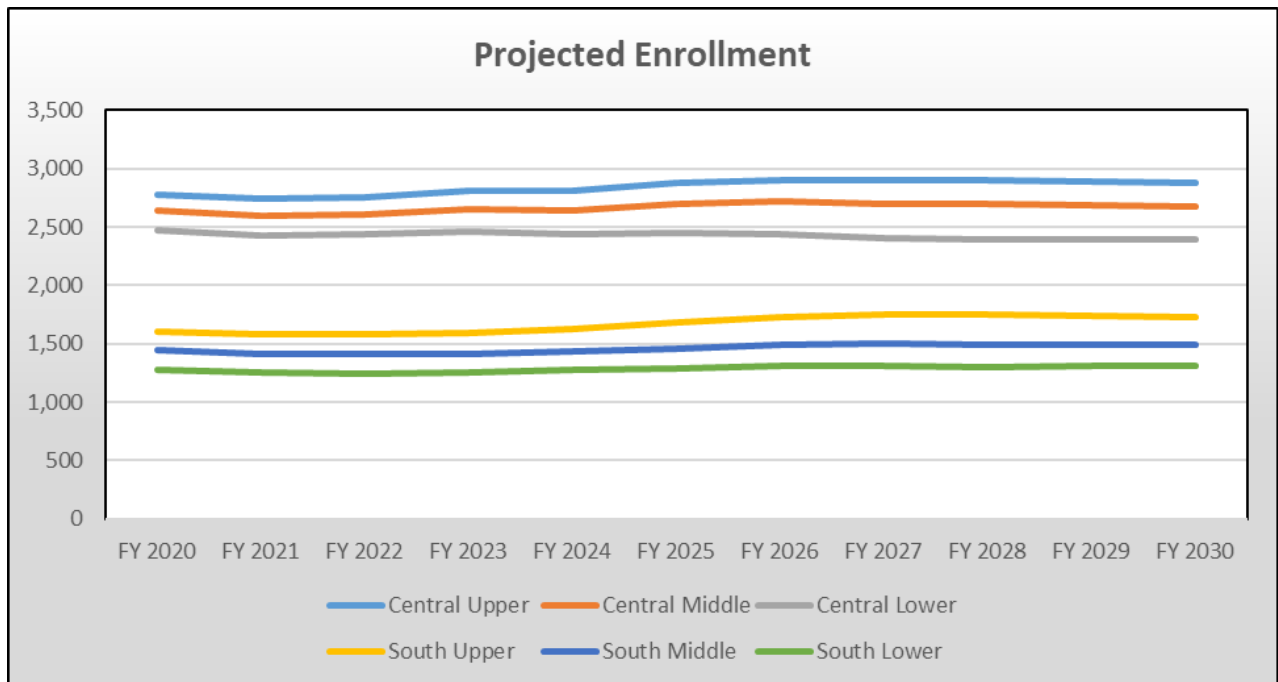

Historic Enrollment

Year	Central	South	Total
FY 2010	2,755	1,825	4,580
FY 2011	2,721	1,807	4,528
FY 2012	2,780	1,748	4,528
FY 2013	2,830	1,735	4,565
FY 2014	2,777	1,710	4,487
FY 2015	2,778	1,632	4,410
FY 2016	2,806	1,578	4,384
FY 2017	2,766	1,507	4,273
FY 2018	2,786	1,483	4,269
FY 2019	2,726	1,445	4,171

Projected Enrollment

Year	Central			South			Total		
	Upper	Middle	Lower	Upper	Middle	Lower	Upper	Middle	Lower
FY 2020	2,777	2,638	2,477	1,601	1,448	1,277	4,378	4,086	3,754
FY 2021	2,739	2,593	2,433	1,582	1,417	1,251	4,321	4,010	3,684
FY 2022	2,760	2,608	2,437	1,585	1,410	1,249	4,345	4,018	3,686

FY 2029	2,887	2,687	2,396	1,739	1,491	1,307	4,626	4,178	3,703
FY 2030	2,875	2,678	2,397	1,733	1,490	1,307	4,608	4,168	3,704

Facilities Summary

Hinsdale Central was constructed in 1948 and contains 472,524 gross square feet (includes all space) with 116,694 square feet of academic contact space as defined for this report. As of September 28, 2018, the enrollment at Hinsdale Central was 2,726. Hinsdale South was constructed in 1965 and contains 468,458 gross square feet (includes all space) with 88,689 square feet of academic contact space. The enrollment at Hinsdale South at the same point in time was 1,445.

Gross Utilization per Student is the gross square feet of the entire facility divided by student enrollment. The student enrollment number reflected below is the 2017-18 Fall Housing Report published by the Illinois State Board of Education. This factor can also be used to compare utilization with peer institutions. The average gross utilization of the districts below is 244 gross square feet per student. Schematic floor plans are included for reference (see Appendix B).

School	Gross Square Feet (GSF)	Student Enrollment	Gross Utilization GSF/ Student
Glenbard West	393,425	2,373	166
Hinsdale Central	472,524	2,786	170
DG South	475,478	2,696	176
Glenbard East	428,158	2,263	189
Glenbard North	424,530	2,203	193
Libertyville	407,500	1,917	213
DG North	468,652	2,185	214
Stevenson	900,000	4,185	215
Glenbrook South	670,000	3,067	218
Fenton	340,159	1,473	231
York	711,101	2,805	254

Deerfield	475,000	1,622	293
Lyons North	618,504	2,000	304
Hinsdale South	468,458	1,483	316
Lyons South	642,117	2,000	321

Section Two: Capacity

Maximum capacity is limited by building codes which determine the maximum occupancy for safe egress. The maximum occupancy allowed by the International Building Code for safe egress is 20 square feet per student for general classroom space and 50 square feet per student for instructional laboratory spaces, shop and other vocational room areas. The maximum capacity needed for the function of safe egress differs from the capacity needed for the function of teaching students. Instruction requires more square feet per student than egress. Classroom capacity is limited by targeted course size with typical classroom density around 26-28 square feet per student, and labs are limited by equipment and available lab stations. These numbers for square feet per student are consistent with the Illinois State Board of Education's recommendations as used in ISBE Form 35-80 "Available Capacity Worksheet."

The District calculates capacity by looking at how instructional spaces are being utilized and assigning a per student square footage amount to them that is then divided by the total square footage of the room. The total square footage of the room is divided by the number of square feet allotted per student to yield the target capacity for the space. For example, a general purpose classroom that is 800 square feet would have an assigned square footage per student of 28. So, the capacity for this space would be calculated as follows:

$$800 \div 28 = 28 \text{ student capacity}$$

Below are the square footage amounts per student the District uses to determine capacity for different learning environments.

<u>Room Description</u>	<u>Square Footage</u>
General Classroom	28
Study Hall	28
Special Education	40
Art	50
Driver's Ed Lab	50
FACS Lab	50
Tech Ed Lab	50
Science Lab	50
Wood Shop	100

Another important factor in determining capacity is the target enrollment for the type of course, which is also summarized below. The tables are separated by Central and South and the following column headings are being used:

- **Room** – Room number if the space has an assigned number
- **Category** – Defined as follows:
 - **General** – regular classroom spaces do not require any unique equipment or arrangement for instruction. Departments utilizing general classroom spaces would be English, math, social studies, world languages, and business. The District student target for general purpose classrooms is 25.

- **Capped** – these spaces are for special education. The student limit for capped spaces is 13. (23 *Illinois Administrative Code* 226.730(b) and (c))
- **Lab** – these spaces have dedicated workstations to fulfill the educational purpose of the course. They are predominately used by science, but could also be used to categorize a driver’s education or technical education space that has dedicated workstations. The student limit is set by the number of available workstations, e.g., science is limited to 24 students.
- **Specialty** – these spaces encompass band, choir, art, tech education, study hall, and other spaces that are unique. These spaces do not fit into the preceding three categories and need to be evaluated individually on the room and its use for assigning a student target to the space.
- **Department** – the primary department utilizing the space. Some rooms may be split between more than one department.
- **Area** – square footage of the space
- **Target sqft/ student** – the number of square feet per student based on the type of learning environment (see targets above).
- **Room Capacity** – the area of the space divided by the square footage per student
- **Target Enrollment Cap** – The target maximum class size for the type of course. Note, there are a few classrooms where the Target Enrollment Cap exceeds the Room Capacity based on the target density of sqft/ student, but in no case does it exceed what is allowable by building code.

Based on the allocation summarized below, if all academic contact spaces were perfectly utilized such that every classroom were used every period and every class had the exact target enrollment, perfectly utilized student capacity at Hinsdale Central is 3,412 based on square footage; it is 3,164 based on target class enrollment. Perfectly utilized capacity at Hinsdale South is 2,488 based on square footage; it is 2,151 based on target class size. In the real world of student scheduling in high schools, academic content spaces can never be perfectly utilized.

- This representation of capacity is consistent with ISBE Form 35-80 “Available Capacity Worksheet” with respect to the amount of square footage per student and because it excludes athletic facilities, cafeterias, auditoriums, and administrative offices in determining enrollment capacity.¹

The following tables summarize all academic contact spaces at both schools.

¹ The 1998 ISBE form was not used for science labs because 35 square feet per student no longer meets building code.

Hinsdale Central High School- Academic Contact Spaces

Section Three: Instructional Space Utilization

Room and Seat Utilization

Room Utilization is defined as the number of periods in a day that an academic contact space is scheduled for instruction divided by the total number of periods available. Enrollment in classes is not factored in—it is simply the measure of how many periods the space is scheduled for instructional use.

In schools where teachers have designated classrooms, it is typical that classrooms are unavailable for two periods each day (for lunch and a planning or activity period) which would yield a Utilization Rate of 71.4% per the table below. District 86 schools are not scheduled this way. Teachers are not assigned to a dedicated classroom, but do have designated desk space in shared department offices. It is also recommended to leave classrooms vacant one period per day for flexibility, which would yield a room utilization of 85.7% for Hinsdale (Abramson, P. (July 1, 2012). *School Planning & Management, What's a School's 'Functional Capacity'* <https://webspm.com/articles/2012/07/01/whats-a-schools-functional-capacity.aspx>).

Another consideration in overall room utilization is the availability of academic contact space for scheduling. At Hinsdale Central, due to a shortage of academic space, the cafeteria and auditorium must be used for study halls; this is not the practice at Hinsdale South.

Seat utilization further refines utilization by identifying the number of total instructional seats used as a percentage of all instructional seats available, for all periods in a day. For the purpose of this study, seat capacity is based on the target enrollment per type of classroom. Chicago Public Schools uses a range of 20% above or below “ideal” enrollment to determine the degree of efficiency in space utilization; 20% above is considered overcrowded, 20% below is considered underutilized.

http://cps.edu/News/Press_releases/Pages/12_28_2011_PR1.aspx

The data represent course enrollment as of October 12, 2018. The following tables document instructional space utilization by room, by period and by classroom seat available, separated by Central and South. The following column headings are being used:

- **Room** – Room number if the space has an assigned number
- **Category** – As defined in Section Two:
 - **General** – regular classroom with a student target of 25.
 - **Capped** – these spaces are for special education with a student limit of 13.
 - **Lab** – Spaces with dedicated workstations to fulfill the criteria of certain courses.
 - **Specialty** – Other unique spaces. These spaces do not fit into the preceding three categories and need to be evaluated individually for assigning a student target to the space.
- **Department** – the primary department utilizing the space. Some rooms may be split between more than one department.
- **Periods** – the school day is broken down into 10 periods. Periods one, two, three, nine, and 10 are all 50 minute periods. Periods four through eights are all 25 minute periods. A student is

scheduled for seven full 50 minute periods and one 25 minute lunch period. A classroom space can be scheduled for a maximum number of seven periods.

- **Scheduled Periods per Room** – the number of periods that a room is scheduled for instruction.
- **Room Utilization** – the number of periods a room is being used divided by seven (the maximum number of periods a space can be used during the day), stated as a percentage. The total Room Utilization for each building is determined based on all scheduled periods compared to all periods available for classes.

Room Utilization Percentages	
One of Seven Periods Used	14.3%
Two of Seven Periods Used	28.6%
Three of Seven Periods Used	42.9%
Four of Seven Periods Used	57.1%
Five of Seven Periods Used	71.4%
Six of Seven Periods Used	85.7%
Seven of Seven Periods Used	100.0%

- **Enrollment Seats Per Period** – the number of student positions available per period, based on target class sizes or lab positions available.
- **Overall Seat Utilization**- The number of students actually enrolled in classes divided by the number of seats available for the entire day, stated as a percentage.

The heat map in the following table indicates optimal utilization with green, mid-range in white and lower with red.

Section Four: Summary

According to the February 1, 2015 *School Planning and Management, 20th Annual School Construction Report*, the median new high school in Illinois includes approximately 198 square feet per student.

<https://webspm.com/Research/2015/02/Annual-School-Construction-Report.aspx>

Based on this figure and in comparison to peer schools, Hinsdale Central, at 170 square feet per student has a lower area per student ratio than typical and appears to be overcrowded, while Hinsdale South at 316 square feet per student is considerably above this standard.

This disparity in school density is also reflected in the Room and Seat Utilization indicators, with the overall Room Utilization at 86% and Seat Utilization at 76% for Hinsdale Central, and Room Utilization at 71% and Seat Utilization at 57% at Hinsdale South. At Central, the Science Labs have the highest room utilization, with a 95% Room Utilization. This level of utilization is quite high and does not allow for any flexibility in scheduling or additional courses if required.
