

# *Golden Plains Unified School District*

## Memorandum of Understanding Technology Use

The use of the Internet and technology in the Golden Plains Unified School District is provided by the Administration and Board of Trustees for employees, students and other clientele. This technology is governed by the Internet Acceptable Use Policy (AUP) adopted by the Board of Trustees (BP 6163.4 and AR 6163.4). All those availing themselves of said technology agree to abide by the policies stated therein.

All employees also understand that providing students with access to the Internet is contingent upon those students having a signed agreement on file with the site and approved by the district, signed by both parents and students. Employees must be physically present with students when students are accessing the Internet. Employees are expected to act in a proper supervisory capacity.

The privilege of using the Internet may be revoked at any time should the user violate the Board-adopted Internet Acceptable Use Policy.

Email is provided by the District and is for the professional use of employees only. No students will be allowed private email accounts. As in any organization, district email accounts are not private and remain the property of Golden Plains Unified School District.
