Presenters:

Allison Francis

Supervisor of Elementary Education, Grades 2-5 and the TAG Program

Mala Maharana

Supervisor of Mathematics, Business, and Computer Science

Additional information about the Talented and Gifted (TAG) Program:

The Sayreville Talented and Gifted Program identifies those students in Grades 3-8 who possess or demonstrate high levels of ability, in one or more content areas, when compared to their chronological peers in the local district. The identification process includes multiple measures which are specific to each grade level. Students participating in the TAG Program will have opportunities to utilize their skills and talents to work toward achieving their highest potential.

More information regarding the related eligibility criteria for each grade level will be reviewed at the information session.

If you have any questions prior to the session, please contact the TAG Supervisor:
allison.francis@sayrevillek12.net.

Additional information about the Advanced Math Program:

There are students in Samsel Upper Elementary School's Grade 5 program who excel in Mathematics. Sayreville School District would like to embrace those students and provide an accelerated program designed to build on their current advanced skills and move them to the next level. The Advanced Honors Program in Mathematics that begins in Grade 6 allows those students that are significantly above grade level the opportunity to challenge themselves in a higher-level math course. For the 22-23 school year, students will be selected based on:

- Grade 5 (Average of Linkit Form A and Linkit Form B)
- Teacher Recommendation score
- District Advanced Honors Mathematics Admission Test administered this year.

If there are any questions or concerns, do not hesitate to email the Math Supervisor :
mala.maharana@sayrevillek12.net.

Advanced Math Test Date: June 14, 2022
