

## Social Media Guidelines

Moon Area School District is excited to share the latest news with alumni, students, families, and community members. To encourage and foster a sense of community, we welcome engagement via comments, likes, shares, and replies on our social media pages.

The purpose of managing social media pages is to help inform the public of District information, activities, achievements, etc.

We have a large audience with a variety of ages that our information reaches on social media. As our social media is a limited public forum, we ask that all followers and viewers be mindful of language when posting comments, replies, or sharing our news.

We are proud to post updates on the achievements, accolades, and innovative initiatives within the District. By providing social media guidelines, we can better ensure a safe and welcoming place for students, families, and our community to connect.

Any dialogue on Moon Area social media pages containing, but not limited to, the following are subject to removal or page restriction:

- Cyber harassment/bullying
- Personal attacks
- Threatening, derogatory, profane, or explicit language

The superintendent and administration retain the right, at their discretion, to delete or hide comments and restrict or remove users based on content.
