5900 – OTHER FINANCING USES – BUDGETARY RESERVE

Budgetary Reserve is not an expenditure function or account. It is strictly a budgetary account. In addition to the appropriations which are made to each of the functions, it is a sound management practice to provide for operating contingencies through a Budgetary Reserve. Experience indicates that there are certain variables over which control is impossible regardless of the care with which the budget is prepared. These variables include unpredictable changes in the costs of goods and services, and the occurrences of events which are vaguely perceptible during the time of budget preparations, but which nevertheless may require expenditures by the School District during the year for which the budget is being prepared.
