

LAPTOP - EXTERNAL DISPLAY

How do I attach my laptop to a larger monitor or TV?

First, your external display must either have an available HDMI port or you have an appropriate HDMI adaptor.

EX: VGA to HDMI adaptor

On the side of the laptop will be an HDMI port. This will permit you to connect to a larger monitor or TV. If you do not get a mirrored display after plugging it in, **you will need one of our techs to install an updated display driver.**
