

How to re-install Microsoft Teams

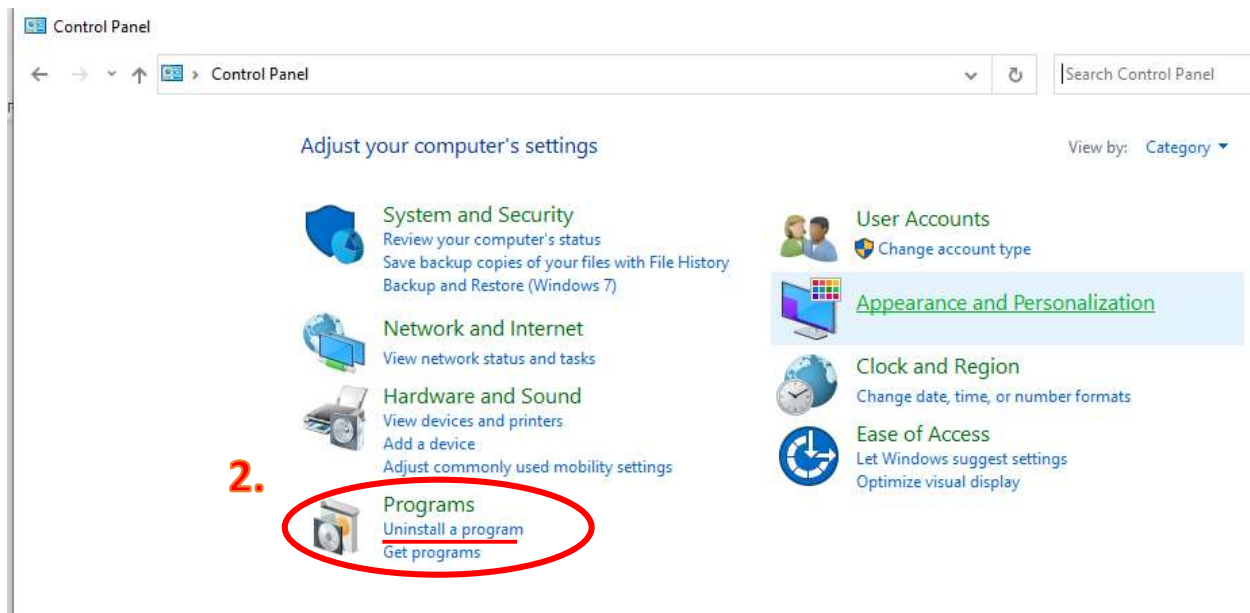

when Teams prompts you for an update

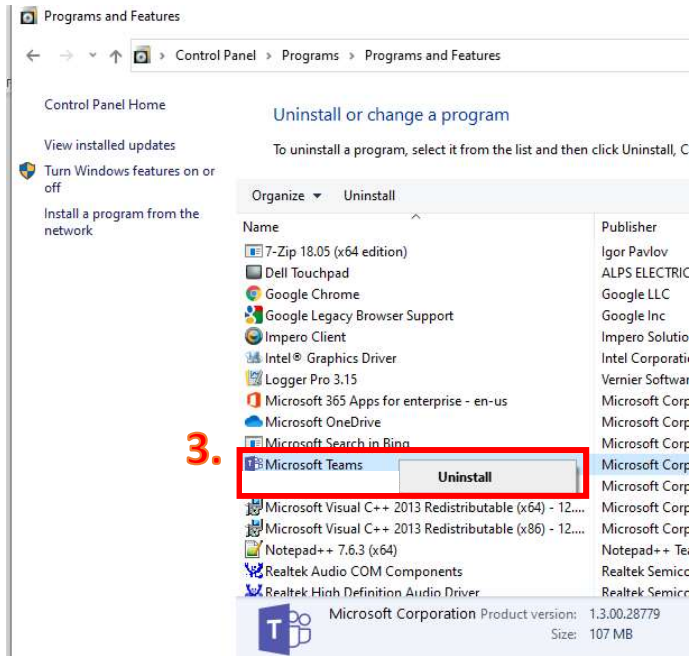

1. Type **Control Panel** in the search menu and click on the app.

2. Under **Programs** click **Uninstall a program**.

3. Right-click Teams then click **Uninstall**. When Teams is uninstalled browse this URL to install Teams <https://www.microsoft.com/en-us/microsoft-teams/download-app#desktopAppDownloadregion>

4. When the link opens in a browser, click Download Teams.
5. Once downloaded, click the up arrow then click **Open**, this will install Team. When Teams is installed you sign into Teams

Download Teams for work on your desktop
