WHO ARE WE?

St. John's College, which was built in 1912, is the oldest HKU residence hall. With a quota of 50/50 international and local students, we believe that a community can come from different backgrounds, speak different languages, and still live, eat, have fun, and study together. Our hall life is filled with shared stories and experiences between students, with cultural events, food discoveries and intellectual conversations, this is a place for Open-mindedness and inspiration.

WHAT IS A HACKATHON?

The term "hackathon" is derived from the combination of the phrases "hack" and "marathon." In its most basic form, a hackathon is a collaborative problem-solving challenge. The goal is to encourage innovation and showcase fresh ideas or solutions.

WHY DO A HACKATHON?

We, at St. John's College, think that breaking out of your comfort zone is the key to success. This Hackathon intends to immerse high school students in a stimulating, inventive, and team-building competition. It will give HKU's prospective students the opportunity to meet influential professionals, visit and stay at Innocell, an innovative HKSTP residence hall (usually reserved for special guests and employees), and network with HKU students, St. Johnians, and Alumnus who will mentor, advise, and guide you through this intensive and rewarding experience. Participating in hackathons illustrates essential qualities that we, at St. John's, are inspired by: "Strive for the Best", By challenging and motivating you to aim higher, think bigger, and work harder, a hackathon will push you to be your best self. It's a chance to create a network, as well as friendships, partnerships, and potential future project collaborations. Also, by participating to our Hackathon, you will get the opportunity to attend one of our famous High Table dinner in St. John's College Dining hall.

EACH TEAM

3 Students from 14 to 18 years old
+ 1 Current St. Johnian & 1 SJC Alumnus
