

# *4th Grade Supply List*

## *Mrs. Martinez Class 2022-2023*

Welcome to Fourth Grade! I will be busy over the summer getting ready for another incredible school year. Here is a short glimpse of what we will be learning about in your fantastic fourth grade year: the Lewis and Clark Expedition, Westward Expansion and the Oregon Trail, and the life cycle of Pacific Salmon. We will also study energy and Earth's changes, along with the structures of plants and animals. We will also cover exciting math topics such as multi-digit multiplication, fractions, and measurement! Please help me get prepared for the upcoming school year by purchasing the supplies below and continuing to work on your single-digit multiplication facts! Keep reading the books you love and be ready to try out some new ones too!

-Mrs. Martinez
