**PAID**  
Permit #102  
Winnetka, IL

In order to address aging school facilities, imbalanced enrollment, and the vision for teaching and learning, the School Board is developing **Future Ready D36**, an Educational Master Facility Plan (our first in 20 years!). **We need YOU to help prioritize our values as we formulate initial Future Ready D36 concepts for community review.**

Your voice is important as we determine how to best manage resources, aligned with a long-term vision to benefit the children in our community. **Please take a brief community survey on [www.winnetka36.org](http://www.winnetka36.org), open NOW until January 25, 2018.**

Learn more about **Future Ready D36** by visiting our website and by attending our next Community Outreach Event focused on environmental design, student learning and research on best practices.
