**Annual Notification of Asbestos Management Plan**

TO: All Personnel, Parents, Guardians, and Residents

In accordance with §19a-333-1 through 13 of the Regulations of Connecticut State Agencies, "Asbestos Containing Materials in Schools," we are required to inform you annually of the existence of the asbestos management plans for our school buildings. These plans have been developed by a licensed and accredited asbestos management planner. The buildings are inspected every six (6) months to monitor for changes or deterioration of the materials. In addition, the buildings are thoroughly re-inspected every three (3) years by Connecticut licensed asbestos inspectors following the same basic criteria as the original inspection used to develop the initial management plan. The management plans developed over the years provide us with information to continue to monitor, encapsulate, and remove these materials.

The Management Plans are available during normal business hours and are accessible to the public at the following locations:
