

**TOWN OF PUTNAM
ROUTE 12 SIDEWALK IMPROVEMENTS
LOTICIP L115-0002
ADDENDUM NO. 1
JUNE 23, 2022**

TO ALL PROSPECTIVE BIDDERS:

This Addendum includes clarifications and corrections to the Contract Documents, along with responses to questions received, as noted below.

Please acknowledge receipt of this Addendum as part of your bid. This addendum, consisting of 5 pages, is issued by the Town of Putnam, Connecticut.

MODIFICATIONS TO THE CONTRACT DOCUMENTS

M.1. Section 00100, Paragraph 1.11 Liquidated Damages, **REPLACE** the first sentence of this paragraph with the following:

“All work under this Contract shall be completed within one hundred twenty (120) consecutive days after Notice to Proceed, unless the completion date is extended in writing by the Mayor of the Town of Putnam.”

QUESTIONS RECEIVED AND ANSWERS

Q.1. To save asphalt from damage, can we form 6" on the edge of the monocurb (after removing the granite curb).

A.1 Cutting the existing road pavement to remove existing granite curb and forming the new Portland cement concrete sidewalk with monolithic curb within the state highway right-of-way must be in accordance with CT DOT requirements (see "Encroachment Permit - Pavement Repair sheet in the plan set). Any deviation from the DOT construction detail must be approved by CT DOT and cannot be changed or amended by the Town of Putnam.

Q.2. Line Item 0921001A - only shows " concrete sidewalk ramp", however there is no line for the removal of the old sidewalk. Can I simply include my price for Line item 0921001A to reflect the removal and replacement for concrete sidewalks?

A.2 The cost of removing existing sidewalk material, including but not necessarily limited to, cement, asphalt, undesirable subbase, etc. is to be included in the price of new Portland cement concrete sidewalks with monolithic curb, sidewalk ramps and driveway ramps, as applicable.

ADDENDUM NO. 1
JUNE 23, 2022**

Q.3 Do walk expansion joints have to be caulked?

A.3 CT DOT does not require caulking expansion joints over full-depth preformed joint filler. Therefore, caulking is not required.

Q.4. The job schedule of 90 calendar days will be very difficult to achieve or not possible. Please consider a minimum of 180 calendar days with a winter shutdown.

A.4 The contract time period has been modified via this Addendum No. 1. Including the specified definition that the “day count” does not include Sundays and legal holidays. If award is delayed and/or if winter conditions halt construction, any winter shut down period will not be counted as part of the Contract Time.

Q.5. A new stop sign is required on sheet Sp-1. Under what item is this to be paid?

A.5 The cost of the new Stop Sign on SP-1 shall be spread over the cost of other bid items.

Q.6. For patching of bituminous driveways- under what item is this to be paid?

A.6 The cost of the patching bituminous driveways shall be spread over the cost of other bid items.
