A Family’s Guide
TO STANDARDS & REPORT CARDS
Seventh Grade
Working Together
To support families in realizing the goals of the Colorado Academic Standards, this document provides an overview of the learning expectations for seventh grade. This guide summarizes specific grade-level standards and indicators used for determining progress within each content area in Adams 12 Five Star Schools. The district provides this information as a tool to help families support each student’s learning.

The Purpose of Standards
Created by Coloradans for Colorado students, the Colorado Academic Standards provide a grade-by-grade road map to help ensure that students are successful in college, careers, and life. The standards define what students will learn in multiple content areas – emphasizing critical-thinking, creativity, problem solving, collaboration, and communication as important life skills in the 21st century.

The Purpose of Report Cards
Adams 12 Five Star Schools’ elementary report cards provide information about each student’s progress toward meeting grade-level standards across seven content areas: English Language Arts/Literacy, Mathematics, Science and Social Studies. Additional comments from the student’s teachers may also be included. A report card is sent home at the end of each semester, in January and May. Please know that the report card is designed to describe a student’s overall progress toward grade-level standards and expectations. A report card should not serve as the only communication between the school and parents. The Five Star District believes in the importance of maintaining open, ongoing communication with all parents and guardians. Families are strongly encouraged to communicate with teachers throughout the school year to ensure that there is a strong bond and partnership between home and school.
Seventh Grade
English Language Arts

The bold headings below summarize broad areas of English Language Arts studied in seventh grade, but do not describe the details of the curriculum.

Reading
With grade-level text, the student demonstrates the ability to...
• comprehend and draw evidence from literary and informational texts.
• construct and support accurate analysis of text.
• use context to determine the meaning of words and phrases.
• analyze the impact of an author’s choices on meaning and tone.
• cite several pieces of textual evidence to support sound inferences drawn from text.
• show full understanding of text when referring to explicit details and examples.
• compare and contrast written text to other mediums and accounts.

Writing
While writing narrative, informational, and argumentative pieces, the student demonstrates the ability to...
• develop a claim, topic, and/or narrative elements in a manner appropriate to the task, purpose, and audience.
• use logical reasoning, details, text-based evidence, and/or description.
• produce clear and coherent writing in which the development, organization, and style are appropriate to the task, purpose, and audience.
• include precise language and vocabulary to convey experiences, clarify ideas and create cohesion.
• draw evidence from literary or informational texts to support analysis, reflection, and research.
• establish and maintain an effective style, while attending to the norms and conventions of the discipline.
• demonstrate command of the conventions of Standard English.

Speaking and Listening
When engaging in a range of discussions on grade-level topics and texts, the student demonstrates the ability to...
• engage effectively in a range of collaborative discussions.
• interpret information presented in diverse media and formats.
• delineate a speaker’s argument and specific claims.
• use multimedia components to present claims and findings.
• adapt speech to a variety of contexts and tasks.

Language
When writing and speaking, the student demonstrates...
• command of grade-level conventions of Standard English.
• understanding of multiple-meaning words and phrases based on grade 7 reading and content, figurative language, word relationships, and nuances in word meanings.

Middle School English Language Arts Rubric
The rubric below provides a general description of a student’s literacy proficiency in terms of the skills specified in the grade-level standards as demonstrated through multiple assessments. NOTE: Students must be able to demonstrate literacy skills while comprehending and/or composing a variety of grade-level literary and nonfiction texts.

Seventh Grade Mathematics

The bold headings below summarize seventh grade math expectations but do not describe details of the curriculum. Ratios and Proportional Relationships, The Number System, Expressions and Equations, Geometry, and Statistics and Probability summarize the broad areas of Mathematics Content Standards studied in seventh grade Math. Mathematical Communication and Procedural Fluency represent areas of expertise to be developed in support of the Standards for Mathematical Practice.

Ratios and Proportional Relationships
The student will...
• analyze proportional relationships and use them to solve real-world and mathematical problems.

The Number System
The student will...
• apply and extend previous understandings of operations with fractions to add, subtract, multiply, and divide rational numbers.

Expressions and Equations
The student will...
• use properties of operations to generate equivalent expressions.
• solve real-world and mathematical problems using numerical and algebraic expressions and equations.

Geometry
The student will...
• draw, construct and describe geometrical figures and describe the relationships between them.
• solve real-world and mathematical problems involving angle measure, area, surface area, and volume.

Statistics and Probability
The student will...
• use random sampling to draw inferences about a population.
• draw informal comparative inferences about two populations.
• investigate chance processes and develop, use, and evaluate probability models.

Mathematical Communication
The student will...
• explain mathematical concepts, skills and applications using appropriate mathematical vocabulary.
• construct logical, complete, and concise mathematical arguments.

Procedural Fluency
The student will...
• organize and carry out procedural, numeric and symbolic work accurately, efficiently and flexibly.
• select and apply appropriate and efficient strategies to make deductions and solve problems.

Seventh Grade Honors Mathematics

The bold headings below summarize seventh grade honors math expectations but do not describe details of the curriculum. The Number System, Expressions and Equations, Functions, Geometry, and Statistics and Probability summarize the broad areas of Mathematics Content Standards studied in seventh grade honors math. Mathematical Communication and Procedural Fluency represent areas of expertise to be developed in support of the Standards for Mathematical Practice.

The Number System
The student will...
- know that there are numbers that are not rational, and approximate them using rational numbers.

Expressions and Equations
The student will...
- work with radicals and integer exponents.
- reason about and solve one variable inequalities.
- understand the connections between proportional relationships, lines, and linear equations.
- analyze and solve linear equations and pairs of simultaneous linear equations.

Functions
The student will...
- define, evaluate, and compare functions.
- use functions to model relationships between quantities.

Geometry
The student will...
- understand congruence and similarity using physical models, transparencies, or geometry software.
- understand and apply the Pythagorean Theorem.
- solve real-world and mathematical problems involving volume of cylinders, cones and spheres.
- draw, construct and describe geometrical figures and describe the relationships between them.
- solve real-world and mathematical problems involving angle measure, area, surface area, and volume.

Statistics and Probability
The student will...
- investigate patterns of association in bivariate data.
- use random sampling to draw inferences about a population.
- draw informal comparative inferences about two populations.
- investigate chance processes and develop, use, and evaluate probability models.

Mathematical Communication
The student will...
- explain mathematical concepts, skills and applications using appropriate mathematical vocabulary.
- construct logical, complete, and concise mathematical arguments.

Procedural Fluency
The student will...
- organize and carry out procedural, numeric and symbolic work accurately, efficiently and flexibly.
- select and apply appropriate and efficient strategies to make deductions and solve problems.

### Middle School Mathematics Communication Rubric

Mathematics Communication at the middle school level addresses a student’s ability to explain, construct, and critique mathematical reasoning using precise and accurate mathematical language.

<table>
<thead>
<tr>
<th>4</th>
<th>ADVANCED UNDERSTANDING</th>
<th>3</th>
<th>MEETS THE STANDARD</th>
<th>2</th>
<th>APPROACHING</th>
<th>1</th>
<th>DOES NOT MEET</th>
</tr>

<tbody>
<tr>
<td>The student demonstrates the ability to explain, construct and critique mathematical reasoning with concise, detailed, logical and complete arguments. The student demonstrates the ability to effectively communicate conceptual understanding and contextual interpretation of results. The student consistently uses accurate mathematical content language with sophistication appropriate to prompt.</td>
<td>Student explanations are complete and logical but may lack details, and/or coherent flow in presentation. Conceptual or contextual understanding is inferred but not explicit. The student is accurate but inconsistent in the use of mathematical content language appropriate to prompt.</td>
<td>Student explanations are fragmented with omissions in logic, details or coherent flow. Concept/contextual explanations are vague, incomplete or inconsistent. Basic mathematical language is present but not at levels appropriate to the prompt.</td>
<td>Student provides only superficial explanations or explanations that do not match solutions. Concept/context connections are absent or inappropriate to prompt. Mathematical language is missing or generally inappropriate to the task.</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

### Middle School Mathematics Procedural Fluency Rubric

Procedural Fluency at the middle school level addresses a student’s ability to select and execute appropriate procedural aspects of mathematics work in an organized and efficient manner.

<table>
<thead>
<tr>
<th>4</th>
<th>ADVANCED UNDERSTANDING</th>
<th>3</th>
<th>MEETS THE STANDARD</th>
<th>2</th>
<th>APPROACHING</th>
<th>1</th>
<th>DOES NOT MEET</th>
</tr>
</thead>
<tbody>
<tr>
<td>The student demonstrates fluency in carrying out procedures flexibly, accurately, efficiently and with clarity in organization. The student consistently selects and applies appropriate and efficient strategies to make deductions and solve problems.</td>
<td>Student procedural work is appropriate to task but may contain minor errors in execution or organization. The student often selects and applies appropriate and efficient strategies to make deductions and solve problems.</td>
<td>Student procedural work lacks coherent organization, omits key steps or contains multiple errors in execution. The student selects and applies rote strategies to make deductions and solve problems.</td>
<td>Student procedural work is incoherent, missing or inappropriate to task. The student demonstrates limited success in applying rote strategies to make deductions and solve problems.</td>
<td></td>
<td></td>
<td></td>
<td></td>

Seventh Grade Science

The bold headings below summarize the two strands that comprise Science Content Standards in seventh grade and the Science Practices necessary for the advancement of science in our society. Skills critical to success in science include observing, collecting, analyzing and interpreting evidence.

Life

Using science skills, the student demonstrates the ability to...
• determine the basic structures and functions of different types of cells.
• compare and contrast basic structures and functions of plant cells, animal cells, and single celled organisms.
• describe the relationship between photosynthesis and cellular respiration within plants - and between plants and animals.
• develop a model to describe how molecules are rearranged through chemical reactions to release energy and support growth of the organism.
• construct a scientifically supported argument that the body is a system of interacting subsystems composed of groups of cells.
• communicate and justify a scientific explanation for how genetic information is passed from generation to generation.
• use models and diagrams to predict future generations and trace heredity.
• describe why asexual reproduction results in offspring with identical genetic information and sexual reproduction results in genetic variation.
• develop and justify claims about differential survival and reproductive success.
• find patterns within the fossil record that document existence, diversity, extinction, and change in life forms (including humans) and environments.
• analyze evidence of embryo development across multiple species and compare patterns.

Science Practices

The student demonstrates the ability to...
• analyze and interpret data.
• create and evaluate models.
• ask questions to further their understanding and determine which questions are testable.
• plan and carry out scientific investigations.
• communicate their scientific thinking
  - cite specific textual evidence to support analysis of science texts.
  - analyze symbols, key terms, text structure and author’s purpose when reading a text.
  - integrate quantitative and technical information using words and visual representations (graphs, diagrams, pictures).
  - write informational explanations and arguments focused on discipline specific content.

Middle School Science Rubric

The rubric below provides a general description of student work with science standards at four levels of proficiency. Note: Students must be able to demonstrate both skills and conceptual understanding.

<table>
<thead>
<tr>
<th>LEVEL</th>

<td>DOES NOT MEET</td>
</tr>
</tbody>
</table>

Student consistently and independently applies standards based skills and understanding of concepts to new or novel situations. Student consistently and independently applies standards based skills and understanding of concepts in familiar situations. Student inconsistently applies standards based skills and/or understanding of concepts in familiar situations. Student demonstrates limited ability to apply standards based skills and/or understanding of concepts.
Seventh Grade Social Studies

The bold headings below summarize seventh grade expectations, but do not describe the details of the curriculum. The content standards of history, geography, economics and civics are from the Colorado Academic Standards. The Connected Literacy Standards should be used and assessed in conjunction with Social Studies content standards.

History
The student demonstrates the ability to…
- evaluate multiple viewpoints to formulate a thesis.
- analyze historical sources for accuracy and point of view.
- explain interactions between people and places within the Eastern Hemisphere.
- describe the foundation and development of early civilizations.

Geography
The student demonstrates the ability to…
- interpret maps to find patterns in human and physical systems.
- collect, classify, and analyze data to make inferences and predictions about the Eastern Hemisphere.
- explain how the physical environment influences the economy, culture, and trade.

Economics
The student demonstrates the ability to…
- describe how different economic systems developed, including the barter system, traditional, command, market, and mixed economies.
- utilize economic data to evaluate different economic systems.
- identify patterns of trade based on resources.
- compare and contrast consumer choices over time.

Civics
The student demonstrates the ability to…
- compare the definition of citizen in various governments.
- illustrate with examples how government and citizens interact, and how interactions have changed over time.
- compare different forms of government throughout the Eastern Hemisphere.
- evaluate how various governments and organizations interact and collaborate to solve problems.

Connected Literacy Standards
The student demonstrates the following skills in concert with the content standards above:
- cite key details to support analysis in primary and secondary sources.
- identify point of view in primary and secondary sources.
- integrate information from multiple texts on the same topic.
- write arguments focused on discipline specific content.
- conduct short content specific research projects.

Middle School Social Studies Rubric

The rubric below provides a general description of student proficiency with social studies content standards. Note: Students must be able to both demonstrate appropriate use of social studies concepts and skills and apply the tools of a historian, geographer, economist, and political scientist.

<table>
<thead>
<tr>
<th>4</th>
<th>ADVANCED UNDERSTANDING</th>
