

RETIREMENT OF FACILITIES

School division buildings may become unsuitable for their present use but may be used to benefit the school division or public in other ways. As part of the Capital Improvement Program process, the Superintendent reviews division schools and facilities on a continuing basis. The Superintendent may recommend to the Alexandria City School Board that a particular school or school facility should be retired, or its use changed. In determining which facility is to be retired, the Board may consider the following factors, among others:

1. The adaptability of the building to continue to be used in its present purpose;
2. The suitability of the site of the building;
3. The costs of maintenance and upkeep of the building; and,
4. The historic value of the building to the community.
5. The possibility that the facility could continue to be used to support students and communities.

The Board invites the viewpoints of community residents and staff members in making its decision to retire a school building.

If the Board determines to close a facility, it will first consider other uses that the school division might make of the building prior to considering relinquishing possession of the building. For properties owned by the Board, changes in ownership will be in compliance with the City of Alexandria 9.06 Review Process

As provided in Va. Code § 22.1-129, if the School Board decides to sell an Alexandria City Public Schools owned property, it will seek approval from the City of Alexandria to retain all or a portion of the proceeds of such sale after holding a public hearing on such sale and retention of proceeds, or it may convey the title to the City.
