## Non-Resident Students Oversight

1. Is your district currently a host district for a 1306 facility?

No

1. Describe the host's educational oversight to ensure students with disabilities are educated in the least restrictive environment while in the 1306 facility? (If not a host, answer as if you were.)

The district complies with IDEA 2004/PA Chapter 14 regulations to ensure that FAPE is offered to each student who is eligible for services within the 1306 facility. If a student with a disability enrolls in a 1306 facility in the Keystone Central School District attendance area, the District will collaborate with the facility to ensure adequate programming and specially designed instruction are provided. The District would serve as the Local Education Agency (LEA) providing special education services to the student. The IEP team would meet to determine the level of support the student requires to receive instruction in the Least Restrictive Environment (LEA). The District would provide transportation as needed.

2. Describe the district's procedures for communicating with 1306 facilities and how the district ensures a successful transition back to school?

The District would provide the 1306 facility the name and contact information of the Director of Special Education, the District Registrar and the Pupil Services Director. The facility would be instructed to register the student within the district. After the enrollment process is complete, the Director of Special Education would review the student records and reconvene the IEP team. The District would participate and assume the role of the LEA.

## Incarcerated Students Oversight

1. Does the district have an adult correctional facility that houses juveniles within its geographical boundaries?  
Yes

§1306.2 Facilities			
Facility Name	Facility Type	Services Provided By	Student Count
Clinton County Corrections Facility	Adult correctional facility	District	1

1. Describe the system of oversight the District would implement to ensure that all incarcerated students who may be eligible for special education are located, identified, evaluated and when deemed eligible, are offered a free appropriate public education (FAPE).  
The Clinton County Correctional Facility is located within the Keystone Central School District. The district complies with IDEA 2004/PA Chapter 14 regulations to ensure that FAPE is offered to each student who is eligible for services within the correctional facility. Currently, the district provides instruction to incarcerated youth through the KCSD Virtual Academy. When students enter the facility, KCSD will collaborate with the home school district to meet Child Find obligations and assist in pursuing educational records, as quickly as possible. The student is enrolled in the Virtual Academy and receives support from a general education teacher assigned to the program. A special education teacher is also assigned for identified students requiring special education services.

## Least Restrictive Environment

1. Review the district's data for Least Restrictive Environment. Highlight areas of improvement.

According to 22 Pa. Code 14.102 (a) (2) (xxiv), the Keystone Central School District will ensure that to the maximum extent appropriate, children with disabilities, including children in public or private institutions or other care facilities, are educated with children who are non-disabled; and special classes, separate schooling, or other removal of children with disabilities from the regular educational environment occurs only if the nature or severity of the disability is such that education in regular classes with the use of supplementary aids and services cannot be achieved satisfactorily. Special education students in the Keystone Central School District receive instruction in the least restrictive environment. The LEA exceeds state levels with 80% or more of students serviced inside the general education classroom. The District is comparable to the state average with 2.6% (9.6% state average) of students educated 40% or less in the general education setting and, 3.3% versus 4.8% state average. The Keystone Central School District provides a full continuum of supports and services for students with disabilities and ensures that all identified students are educated in the least restrictive environment. The district ensures that students with disabilities are educated with students without disabilities in the general education classroom to the maximum extent possible and that removal from general education only occurs when the IEP team determines that education in that setting cannot be achieved satisfactorily with a full range of supplementary aids and services; or the student is unable to make meaningful progress in the goals of the IEP. Students with more significant disabilities may require more intensive supplementary aids and services outside of the general education setting and curriculum to address complex needs if the IEP team determines that the student's needs exceed the functional ability of the general education program. The District will also consider a more restrictive environment after the full continuum of special education programs and services within the district are considered. The IEP team, along with documentation and progress monitoring may then determine that a more restrictive educational placement is determined to be appropriate. According to the Special Education Data Report for the 2018/2019 school year, special education students receiving instruction for 80% or more of the school day were 55.5% compared to 61.5% state. The 2019/2020 data for the District exceeds the state rate indicating that inclusive practices have increased with more students receiving instruction in the general education setting with supplementary aids and services.

2. What universal practices does the district utilize to address the academic and social/emotional needs of all students in need of accommodations to their learning environments?

The Keystone Central School District offers a variety of universal practices to address the social/emotional needs of all students to accommodate their needs in their learning environment. Examples include social skills groups, anger control groups and moral reasoning groups. The District also contracts with outside agencies to provide school based mental health services within the school environment. The District also has a Student Assistance Program (SAP) to assist students and families with mental health services outside of the school day. The District also collaborates with Lycoming/Clinton County Joinder to support a variety of social/emotional needs of all students in the Keystone Central School District. The Keystone Central School District offers a variety of universal practices to address the academic needs of all students to accommodate their needs in their learning environment. Examples include: The Measures of Academic Progress (MAP) assessment which is designed to measure a student's academic achievement and growth over time in reading and mathematics. This assessment is utilized in grades K-5. AimswebPlus, is a universal screening, benchmarking, and progress-monitoring tool used to assess literacy and math proficiency. These assessments help identify students who are meeting grade- and term-level benchmarks as well as those

who may need additional support. The assessments are utilized to identify targeted areas for goal development and progress monitoring. Targeted interventions and evidence-based curriculums are implemented to support skill deficits in reading K-12.

3. Describe the academic programming and training efforts the LEA utilizes to ensure meaningful participation of students with disabilities in the general education curriculum.

The District offers a range of supplementary aids and services to support students with disabilities in the least restrictive environment. In discussing an individual student's needs, the IEP team considers four categories of supplementary aids and services including collaborative (adults working together to support students), instructional (development and delivery of instruction that address diverse learning needs), physical (adaptations and modifications to the physical environment), and social-behavioral, (supports and services to increase appropriate behavior and reduce disruptive or interfering behavior) Examples of supplementary aids and services frequently utilized within the district include, but are not limited to, coteaching, paraprofessional support, collaboration/team meetings, assistive technology, modified curricular goals, providing alternative ways for students to demonstrate learning, providing testing modifications, augmentative communication devices, differentiated instruction, instructional adaptations, adaptive equipment, sensory integration environmental modifications, social skills instruction, counseling and individualized positive behavior support plans. Students with severe disabilities may require more intensive specially designed instruction outside of the general education class and general education curriculum to address complex needs if the IEP team determines that the student's needs exceed the functional ability of general education program to maintain the student at an appropriate instructional level. The District will only consider more restrictive educational placements after the full continuum of special education programs and services within the district are considered. The IEP team, along with documentation and progress monitoring, may then determine that a more restrictive educational placement is determined appropriate. The District participates in state wide trainings offered by PaTTAN, PDE and CIU10. PaTTAN and CIU10 consultants support the District through professional development and on-site consultation. Teachers and speech therapists supporting students in grades K-6 are enrolled in Language Essentials for Teaching Reading and Spelling (LETRS). Teachers supporting students with Autism are enrolled in the Competent Learner Model (CLM) and complete modules in the program and receive embedded professional development through a weekly coaching model within their classroom. Learning support teachers in grades K-4 participated in reading intervention training to implement a research based program designed to target specific skill deficits in decoding. Teachers of students with low incidence disabilities participate in monthly webinars and group trainings to support ELA and math curriculum implementation.

4. Describe the supplementary aids and services the LEA utilizes to ensure meaningful participation of students with disabilities in extracurricular activities.

The District considers the individual needs of students when collaborating with stakeholders to support participation in extra-curricular activities for students with disabilities. The IEP team convenes to discuss the accommodations that students may require in order to access activities when participating with non-disabled peers. Specific training is offered to coaches, staff and club advisors to support the individual needs of students.

5. Describe the District procedures, which ensure that, to the maximum extent appropriate, children with disabilities placed in private institutions are educated with non-disabled children and have the opportunity to participate in district lead extracurricular activities?

For students in public or private institutions as stated in 34 CFR § 300.118 (except as provided in 34 CFR § 300.149(d) the District will collaborate with the IEP team in making arrangements with public and private institutions (such as a memorandum of agreement or special

implementation procedures). The District will ensure that supplementary aids and services are provided as necessary in order for the student to access the extracurricular activity with non-disabled peers.

6. Discuss the district's need to build capacity and expand programs and services in an effort to provide a continuum of services. (Consider the out of district placement chart)

According to 22 Pa. Code 14.102 (a) (2) (xxiv), the Keystone Central School District will ensure that to the maximum extent appropriate, children with disabilities, including children in public or private institutions or other care facilities, are educated with children who are non-disabled; and special classes, separate schooling, or other removal of children with disabilities from the regular educational environment occurs only if the nature or severity of the disability is such that education in regular classes with the use of supplementary aids and services cannot be achieved satisfactorily. The placement decision is determined by the IEP team members whom are knowledgeable about the student, can interpret the meaning of the evaluation data, the placement options; and is made in conformity within the provisions of the Least Restrictive Environment. The placement for an identified student is determined at least annually, is based on the child's IEP; and is as close as possible to the child's home. Unless the IEP of a child with a disability requires some other arrangement, the child is educated in the school that he or she would attend if non-disabled. The District provides a full continuum of supports and services for students with disabilities and ensures that all students with disabilities are educated in the least restrictive environment. A student with a disability is not removed from education in the general education classroom solely based on needed modifications in the general education curriculum or because of the nature or severity of the student's disability. The District recognizes the need to expand the continuum of services offered to students with disabilities in order to provide adequate programming the LRE. The District will collaborate with PaTTAN and CIU10 to enhance emotional support programs. The District will continue the implementation of the CLM for students with Autism. The District will continue to implement research based strategies to support academic and behavioral deficits.

## Positive Behavior Support

Date of Approval  
2018-03-01

Uploaded Files  
Behavior Support Policy.pdf

1. How does the district support the emotional, social needs of students with disabilities?

The Keystone Central School District behavior support policy is aligned with and adheres to the provisions of IDEA 2004 and Pa22 School Code 14.133, ensuring that positive, rather than negative, measures form the basis of behavior support programs. The district implements School Wide Positive Behavior Support (SWPBS) in K-12 buildings to promote a positive school climate, increase academic performance, decrease problem behavior, and increase safety. This is a collaborative, evidence-based, assessment approach which emphasizes the implementation of preventative, teaching, and reinforcement based strategies to support all students, while also developing effective interventions for addressing problem behaviors. The District acknowledges that while SWPBS may be effective for the majority of students, a smaller percentage of students will demonstrate needs that require more intensive intervention if behavior impedes his/her learning or the learning of others. In these cases, the district completes a Functional Behavior Assessment (FBA) and develops an Individualized Positive Behavior Support Plan (PBSP) that is integrated within the student's IEP. The FBA gathers comprehensive information regarding the student's behavior including defining the target behavior, using direct observation and data collection to determine the frequency, duration, time and location of behaviors, identifying potential antecedents and consequences, as well as, developing a hypothesis regarding the function of the behavior. This information supports the development of a PBSP which includes information regarding antecedent strategies, alternative skills to be taught, positive and reduction oriented consequences, including a crisis management plan if necessary, and the development of measurable behavior goals. Examples of effective behavior support strategies include, but are not limited to, social skills instruction, positive reinforcement, token economies and point systems, shaping, self-monitoring, differential reinforcement, and behavior contracts.

2. Describe training provided to staff in the use of positive behavior supports, de-escalation techniques and responses to behavior that may require immediate intervention.

The District ensures that on-going training is provided to staff regarding the implementation of positive behavior interventions and de-escalation techniques. Designated staff also participate in safe physical management training on an annual basis. The District currently has six trained and certified safety care trainers in the district. Special education staff will receive on-going training regarding the FBA process and the development of individual behavior plans within the IPE.

3. Describe the district positive school wide support programs.

Keystone Central School District is implementing School Wide Positive Behavior Interventions and Supports as a district wide initiative. The district has adopted a district wide matrix that details the expectations from kindergarten through twelfth grade. We are in the process of developing our multi-tiered system of support to address our social, emotional and behavioral needs of students within our district at all three tiers. Creating a culture of acknowledgement and high expectations for our students and faculty, utilizing common language and expectations,

and developing a consistent discipline system that teaches appropriate behavior. Our district is committed to meet annually to revise and refine our efforts to create a system that meets our students, families and faculty needs. A new effort this school year, our district is guiding our efforts through the District Systems Fidelity Inventory. This team of district representatives meet monthly to continue to move our data and practices forward to create a system that is implemented with fidelity.

4. Describe the district school-based behavior health services.

The District works collaboratively with local community agencies regarding the implementation of school based mental health services. Currently, two elementary buildings and one middle-high school have a partnership with Community School Based Behavioral Health (CSBBH)

5. Describe the district restraint procedure.

Aversive techniques, restraints or discipline procedures may not be used as a substitute for a behavior intervention program. Regulations prohibit the use of the following aversive techniques: corporal punishment, punishment for a manifestation of a student's disability, locked rooms, locked boxes or other locked structures or spaces from which the student cannot readily exit, deprivation of basic human rights such as withholding meals, water or fresh air, suspensions constituting a pattern under 14.143 (a), treatment of a demeaning nature, and electric shock. Furthermore, the District recognizes that the use of restraints is considered a measure of last resort, only to be used after other less restrictive measures, including de-escalation techniques, have been tried or are less effective. In the event that restraint is required to ensure the safety of the student or others, safe physical management techniques are utilized by trained staff. The incident is documented, parents/guardians are notified, an IEP meeting is offered, and the information is recorded in the state data collection system. Prone restraints are prohibited and not utilized by the district.

## Intensive Interagency

Please address any areas of concern with students who are placed on Instruction Conducted in the Home or who are at a substantial risk of waiting more than 30 days for an appropriate educational placement.

There are no current concerns with the process for providing FAPE to students in the least restrictive environment within the Keystone Central School District. The District follows all Chapter 14 guidelines when placing a student in a more restrictive placement, such as instruction in the home, when students display a substantial risk accessing curriculum in the public school setting. The District offers a continuum of special education services and programs. The District has been able to ensure FAPE for all students receiving special education services. The District ensures that students with disabilities are educated with non-disabled peers, to the maximum extent appropriate, in the least restrictive environment. When discussing a student's program, the IEP team always considers education, with the provision of supplementary aids and services, in the general education classroom first. If the IEP team determines that education in the general education environment, with supplementary aids and services cannot be achieved satisfactorily, the team may consider progressively more restrictive programs. The District works collaboratively with a variety of community agencies to develop appropriate programs and supports for students with complex academic, behavioral, and social-emotional needs. The district participates in monthly interagency meetings in which individual students are discussed. The District also collaborates with a number of approved private schools in the surrounding areas to support students with emotional needs and Autism, who require more intensive supports that cannot be provided in a public school setting with supplementary aids and services. The District ensures that consistent contact is made with updated progress monitoring and IEP meetings to support students who are enrolled in programs outside of the Keystone Central School District.

## Signatures & Affirmations

Approval Date

Uploaded Files

- There are a full range of services, programs and alternative placements available to the school district for placement and implementation of the special education programs in the school district.
- The school district has adopted a child find system to locate, identify and evaluate young children and children who are thought to be a child with a disability eligible for special education residing within the school district's jurisdiction. Child find data is collected, maintained, and used in decision-making. Child find process and procedures are evaluated for its effectiveness. The school district implements mechanisms to disseminate child find information to the public, organizations, agencies, and individuals on at least an annual basis.
- The school district has adopted policies and procedures that assure that students with disabilities are included in general education programs and extracurricular and non-academic programs and activities to the maximum extent appropriate in accordance with an Individualized Education Program.
- The school district will comply with the PA Department of Education, Bureau of Special Education's revision notice process.
- The school district follows the state and federal guidelines for participation of students with disabilities in state and district-wide assessments including the determination of participation, the need for accommodations, and the methods of assessing students for whom regular assessment is not appropriate.
- The school district affirms the Pennsylvania Department of Education that funds received through participation in the medical assistance reimbursement program, ACCESS, will be used to enhance or expand the current level of services and programs provided to students with disabilities in this local education agency.
