

Welcome!

Thank you for attending our family resource night. We hope to provide you with as much information as we can during this transition. Edmonds School District has assembled a team of staff members and school partners to be here for questions and support as we all move through this process together.

Thank you for your patience and willingness to do what it takes to make this happen. In the end, our new Madrona K-8 building will be an incredible place for our students to grow and succeed. We can't wait!

Interim Site:

Former Alderwood Middle School

20000 28th Ave W.
Lynnwood, WA 98036

The former Alderwood Middle School property is similar in size to Madrona K-8, providing a campus large enough to accommodate Madrona's more than 600 students. It has extensive outdoor space - including playground equipment - to provide much-needed recess and recreational space. The former Alderwood Middle School building was constructed as a junior high school in 1966 but went through major modernization in 1988, and additional modernization in 2001.
