ACKNOWLEDGEMENT

The Operations staff extends thanks and appreciation to the School Board, principals, senior staff, program managers and support staff who contributed to the production of the FY 2023-2032 Capital Improvement Program. This process takes a tremendous amount of time and effort. Your hard work and cooperation allow us to present an effective budget.

INTRODUCTION

The Alexandria City Public Schools (ACPS) FY 2023-2032 Capital Improvement Program (CIP) is framed with consideration for the School Board's FY 2023-2032 CIP Budget Priorities which are aligned with the ACPS 2025 Strategic Plan Focus Areas of:

- Systemic Alignment
- Instructional Excellence
- Student Accessibility and Support
- Strategic Resource Allocation
- Family & Community Engagement

The School Board Adopted FY 2023-2032 CIP reflects previous goals of a comprehensive approach and maintains the commitment to the recommended CIP schedule from the Ad-Hoc Joint City-Schools Facilities Investment Task Force (Task Force) from November 2017. Each major capacity project is intended to be comprehensive and the expected lifespan is 30-50 years. However, this budget also acknowledges that our dilapidated facilities will need interim modernization projects to sustain a deferred replacement or major renovation to the school.

In 2019, ACPS conducted Targeted Facilities Conditions Assessments at six facilities expected to be in the worst condition: Cora Kelly, George Mason, Naomi L. Brooks (formerly Matthew Maury), Francis C. Hammond, George Washington and the Transportation Facility. The Targeted Facilities Assessment prioritized projects for these facilities in to 4 categories, Priority 1 being the most urgent. Many Priority 1 projects have since been addressed by the Educational Facilities Team. In the summer of 2021, ACPS conducted Facility Conditions Assessments of all of its facilities. The FCAs do several things including:

- update Facility Conditions Indexes for each facility to determine which facilities will require replacement or a more robust modernization in the future
- provide projects to be used to inform capital planning for the next ten years based on life-cycle and current conditions; and
- break these projects down into three priorities:

- Priority 1: Address in 1-2 years. These projects have been incorporated into the School Board Adopted FY 2023-2032 CIP in years 2023 and 2024.
- Priority 2: Address in 3-5 years. These projects have been incorporated into the School Board Adopted FY 2023-2032 CIP in years 2025-2027.
- Priority 3: Address in 6-10 years. These projects have been incorporated into the School Board Adopted FY 2023-2032 CIP in years 2028-2032 except where a full modernization project may be required for schools other than those already on the ten-year plan.

The FCAs will provide a baseline by which the Department of Facilities and Operations can continually update to inform future CIP information. It is important to note that as projects are completed, the value of the buildings may change and the FCI will change. This may mean that facilities which were thought to be in a condition that requires replacement in the ten-year CIP, either can be deferred or will no longer require replacement with adequate investment in the short term.

STRATEGIC PLANNING FRAMEWORK

Equity is an essential part of the ACPS 2025 Strategic Plan. This is particularly relevant in the facilities we offer our students and staff.

CIP PLANNING AND PROJECT

This CIP reflects a commitment to the School Board's CIP Budget Priorities which were organized in the following categories in alignment with the ACPS 2025 Strategic Plan:

1. Systemic Alignment

This category includes building systems and security upgrades to ensure our buildings are aligned.

2. Instructional Excellence

In recent years, the CIP has expended to include textbooks and technology upgrades which support instruction.

Executive Summary

3. Student Accessibility and Support

This category includes transportation, kitchen, access and playground projects to provide the necessary supports for our students.

4. Strategic Resource Allocation

This focus ensures that we are adequately funding schools which are being replaced or modernized as well as considers capacity, interim use, and complete renovation during any of our major projects.

5. Family and Community Engagement

This focus ensures that we are engaging our community and families on all major projects and allows for time in the projects to be transparent and obtain feedback.

FY 2023-2032 CIP FUNDING REQUEST

This budget request contains three primary drivers:

1. Increasing capacity to accommodate existing enrollment and anticipated growth and student needs
2. Modernization to aggressively address unmet facilities needs through a comprehensive approach

3. On-going major repairs of facilities that are not scheduled to be modernized within the 10-year program

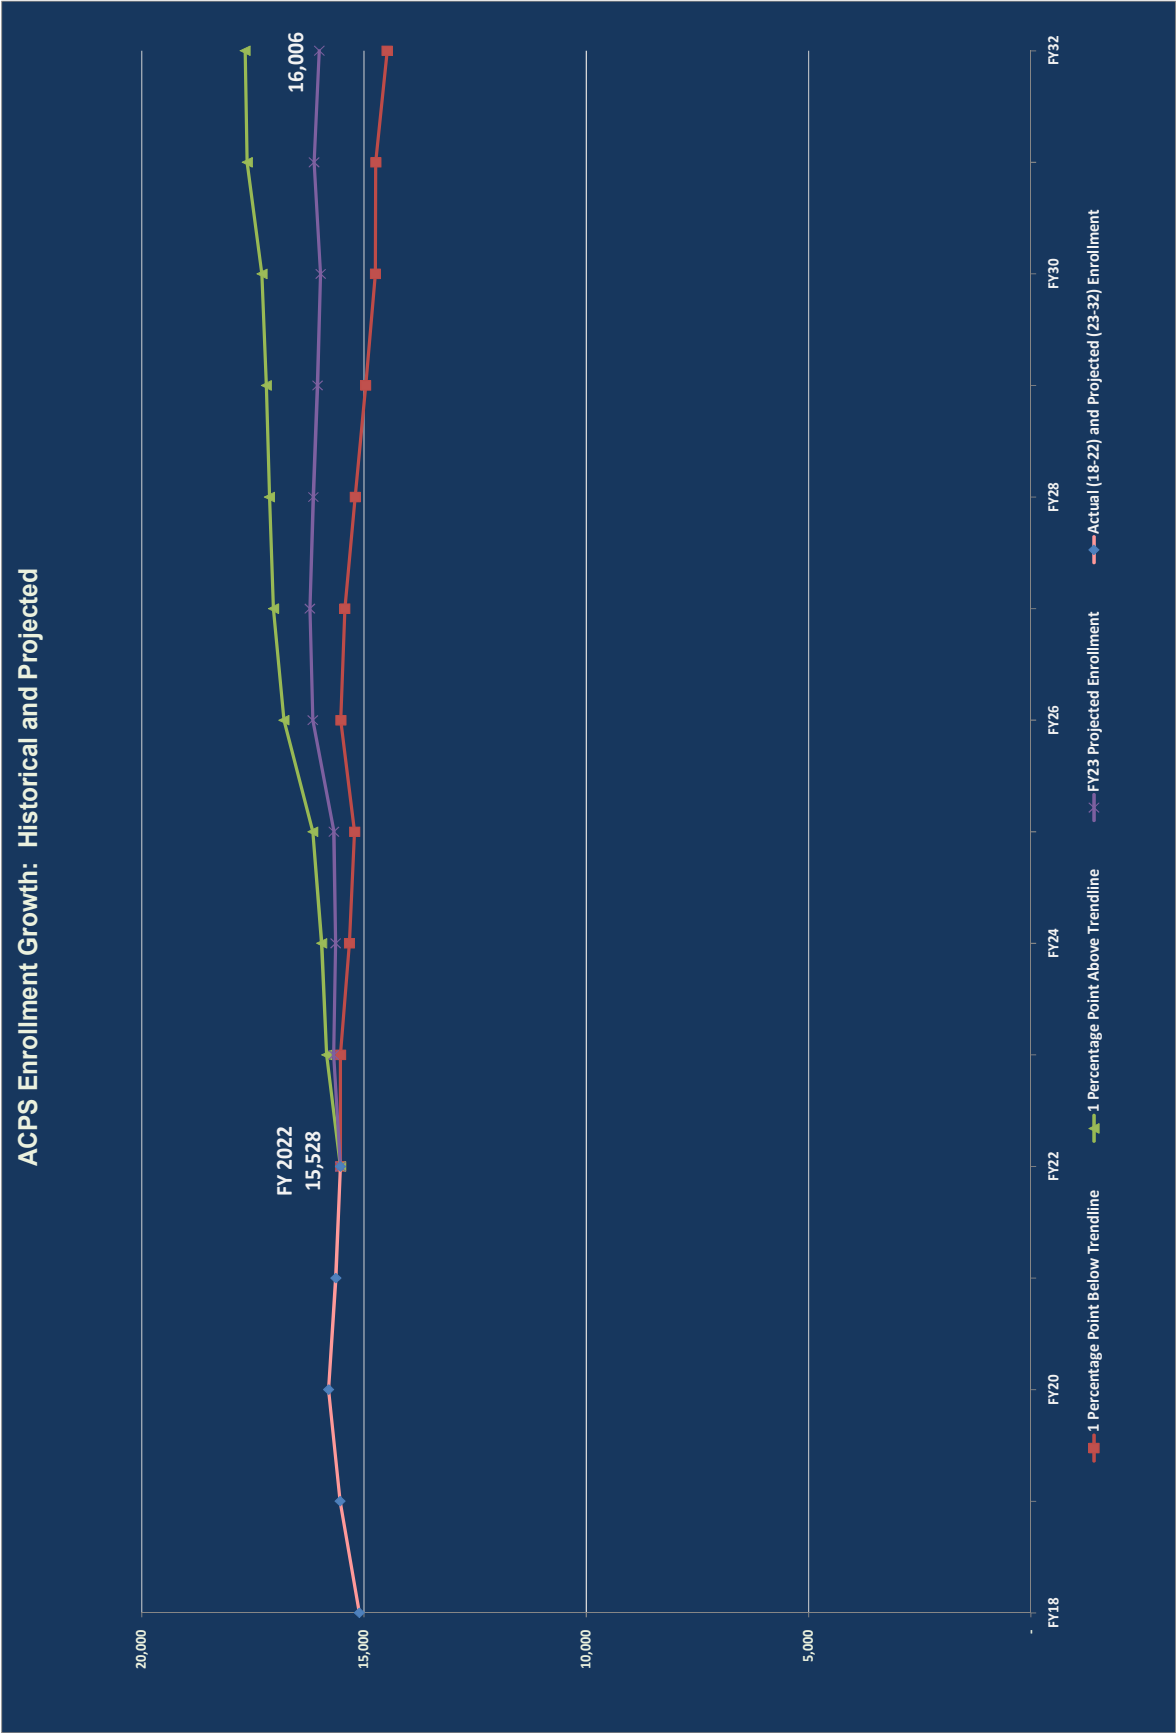

The total School Board adopted CIP budget is **\$497,804,800**. This is **\$53.7M less** than the total ten-year City Council approved FY 2022-2031 CIP; which can be largely attributed to the reduction of the new 600 student school project originally proposed in the out-years of the CIP and reflects ACPS's commitment to its partnership with the City in being fiscally responsible with taxpayers' dollars.

The FY 2023-2032 School Board Adopted CIP does include a significant deficit in the FY 2023 budget year which is largely due to the increase of the High School Project budget to add the costs for the aquatic facility as approved by the City Council in June 2021 and the addition of the renovation of the 1703 N Beauregard facility. It is important to note that both of these items have been previously discussed with City Council to gain consensus on the path forward ensure there were no surprises in the budget.

Table 1: ACPS FY 2023 - 2032 CIP Budget

	School Board Adopted FY 2023- 2032 CIP Budget	City Council FY 2022- 2031 Approved CIP Budget	School Board Adopted and City Council Approved CIP Budgets

Figure 2: Age and Size of ACPS School Buildings

Executive Summary

CAPACITY PROGRAM

The capacity portion of the CIP program totals **\$371,515,900** over the 10-year period. This includes funding for design, project management support for the renovation of existing buildings, and construction of additional capacity where necessary.

Major Factors

There are four major components of the capacity program.

1. Adding Capacity

Based on the annual review and analysis of student enrollment forecasts, ACPS is expecting approximately 1,500 - 2,000 new K-12th grade students within the 10-year program (See Figure 1). There was a decrease in enrollment due to COVID-19; however, enrollment already exceeds capacity in many of ACPS's facilities and growth is expected to continue through FY 2030. Enrollment following COVID-19 will continue to be monitored to identify any long-term impacts.

Elementary Capacity

Elementary capacity will be added with replacements or major renovations, which will likely require temporary displacement of the school.

George Mason and Cora Kelly are proposed for total replacement. Budgets for the replacement of these schools is included in the School Board Adopted FY 2023-2032 budget. Funds for an adaptive use project at the office building at 1703 N. Beauregard are also proposed in this budget, with the space intended to be used as swing space during George Mason and Cora Kelly construction before becoming a 600-student school.

Secondary Capacity

Enrollment projections indicate that secondary enrollment will exceed capacity in coming years. ACPS has begun The High School Project to better serve the high school students academic experience while accommodating enrollment. The grade-levels at the 600-student school at 1703 N. Beauregard have

not been confirmed, but suggestions to use the space as a middle school have been made.

2. Renovating existing buildings because of their age and building condition.

The second major component of the modernization program is to renovate the existing school facilities. This year, five ACPS schools are older than 75-years (see Figure 2).

Mount Vernon, Naomi L. Brooks (formerly Matthew Maury), George Mason, Charles Barrett and George Washington (our second largest school) will all reach or exceed 75 years of age within the next five years. Over the next 20 years, an additional seven schools will reach 75-plus years. Due to their age, the condition of these buildings are not all currently at a state where they can be properly maintained. This causes significant reactionary and unpredictable maintenance and repairs. Part of the final CIP includes new buildings and modernizations to address building condition issues at select facilities.

3. Transportation

The transportation facility has not been upgraded since it was constructed in 1979 with the exception of an additional relocatable facility. Since then, ACPS has gained more than 4,000 students and expanded the school bus fleet. This project to upgrade the transportation facility will need to include an expanded garage and personnel space to meet the needs of the expanding fleet. Construction funding for the building expansion is shown in FY 2023; however, this will be part of a collaborative effort with the City's departments near the site.

Recommended Modernization and Capacity Projects

Table 4 outlines the proposed capacity projects, funding years and total estimated budget, as included in the CIP budget.

A typical modernization project would include a programming study to determine how to renovate the existing structure to meet the standards outlines in the educational specifications.

Executive Summary

Each renovation is intended to be comprehensive, and the expected lifespan of the project is 30-50 years. Part of the renovation may include HVAC systems replacement, ceiling and lighting upgrades, newly configured classrooms, new windows, fire sprinklers, electrical and plumbing upgrades, painting, flooring and both fixed and loose furnishings. Capacity will be added based on each site's need and ability to accommodate additional staff and students.

High School - The high school project began in FY 2019 and will continue over the next several years. Based on the School Board's vote on September 26, 2019, this project includes a complete new build for the Minnie Howard campus accommodating the maximum capacity possible and grades 9-12. Planning and design funds were received in FY 2019-2020. Construction funding began in FY 2022 but the majority of construction funds are proposed, as has been planned, in FY 2023. The budget was updated to reflect the City Council's approval of an additional \$12.5M in June 2021 for the aquatic facility.

Transportation Facility - Pending the outcomes of the Witter Wheeler study, this will include an upgrade to the existing building and build an addition to accommodate the increase in personnel and the bus fleet. ACPS is currently working with the City's relevant departments on the Witter Wheeler Campus Master Plan which will analyze co-location opportunities.

George Mason - Because of the building condition and the interior configuration, a total school replacement is recommended to rectify the deteriorating building condition and to accommodate the projected future enrollment. ACPS conducted a feasibility study to determine what is possible at this site.

Cora Kelly - This project has been adjusted to a complete new school. ACPS conducted a feasibility study to determine what is possible at the site.

New School - Enrollment projections indicate the need for an additional school in the future. This project includes design costs for an adaptive reuse project at 1703 N. Beauregard. Funds for the purchase of the office building at 1703 were included in FY 2019 and appropriated in FY 2022.

NON-CAPACITY PROGRAM

The non-capacity portion of the CIP program totals \$126,288,900 over the 10-year period. This includes funding for major repairs and minor construction projects as well as funding for transportation services, technology modernization and textbooks.

The 10-year request totals \$123,488,900 and includes:

- \$40,788,100 for elementary
- \$20,000,800 for secondary
- \$62,700,000 for system-wide projects including: HVAC, emergency repairs, planning, the Rowing Facility, safety and security, curriculum materials, technology upgrades and Transportation services

Non-capacity projects are shown by site in Table 5.

PROJECT DETAILS

Safety and Security

Planning for these projects include an assessment of the access system and camera upgrades, system wide.

Project Planning

This funds project planning for projects at least one to two years prior to the execution of work. This allows time for feasibility studies, proper scoping, cost estimating, coordination and permitting.

Exterior Playgrounds or Sports Areas

These projects remove and replace old playground equipment and protective surfaces to provide new play/recreational areas for students.

Fire Alarm System

These projects replace existing fire alarm system components, particularly fire alarm panels. This will improve the safety conditions for students, staff and visitors to ACPS facilities.

HVAC Repair/Replacement

These projects repair or replace existing HVAC equipment: HVAC repairs will be initiated to restore operability, efficiency and reliability; HVAC replacements will address outdated and outmoded equipment with installation of new high efficiency units tied into ACPS automated building systems.

Table 4: ACPS Capacity Projects, including Additional Capacity

Site	2023	2024	2025	2026	2027	2028	2029	2030	2031	2032	Grand Total
1703 N. Beauregard	24,513,600							12,779,700			37,293,300
Cora Kelly					17,345,600	69,382,400					86,728,000
George Mason		16,012,100	64,048,600								80,060,700
High School Project	157,433,900										157,433,900
Transportation Services				10,000,000							10,000,000
Grand Total	181,947,500	16,012,100	64,048,600	10,000,000	17,345,600	69,382,400		12,779,700			371,515,900

Executive Summary

Plumbing/Restroom upgrades

These projects upgrade and “refresh” existing restrooms with current ADA requirements, new tile, urinals and hand sinks as well as any associated water service. Upgrades may include new weather tight windows as well as energy efficient lighting. New plumbing will include low-flow water efficient fixtures, and all restroom upgrades will be consistent with the ACPS goal of energy efficiency and sustainability.

Roof Repair/Replacement

These projects repair or replace existing roofing systems to prevent water leaks, moisture infiltration, and deterioration of the building structure. New roofing systems will include high reflectance, increased insulation and thermal efficiency resulting in higher energy efficiency and thus lower utility costs.

Site Hardscape Repair/Replacement

These types of projects include resealing and striping asphalt, rubber safety surface play areas, and parking lot repairs. It also includes replacing sidewalks, patios, walkways and other pedestrian or play surfaces that have deteriorated to the point of presenting a risk of injury to students, parents, staff and visitors at the facility. Repair and/or reconstruction of exterior retaining walls are also done as part of site hardscape repairs.

Storm Water Management

These types of projects address the flow of storm water at the facility; directing water away from the facility and controlling the volume of water flowing into the sewer system. Stormwater best management practices include the management of water flow through grading and vegetation as well as through building and maintaining structures to contain, filter and detain storm water. Stormwater management may also seek to capture or harvest water for reuse in landscape irrigation or as a non-potable source of water.

the latest cost estimates available and the move to underground parking and net-zero energy schools. New construction budgets are now developed based on:

Hard Costs:

Building: \$325/sf

Underground Parking: \$83,000/space

Sitework: \$1M/acre

Demolition: \$10/sf

Escalation:

Executive Summary

BUDGET TIME LINE AND PLANNING CYCLE

The CIP addresses the school division's needs for the construction, expansion, and refurbishment of long-lived capital assets to ensure the provision of instruction in a safe and effective environment. The CIP is framed by the ability of current school infrastructure to meet the demands of the projected student population and instructional program requirements.

ACPS incorporates current enrollment information, program requirements, city population data, planning & zoning assessments, along with principal and department head needs to develop the CIP. In addition, staff used operations and maintenance data, School Board strategic plans and facility needs assessments to determine capital needs. The adoption of the Capital Improvement Program is an annual commitment to a series of projects with estimated costs based on current knowledge, market conditions and priorities.

The City of Alexandria defines a capital project as one that acquires or improves a physical asset with a useful life of three or more years for greater than \$5,000; it is not day-to-day maintenance. Some capital projects have direct impacts on the operating budget. These projects are generally ones related to capacity and the information located in the chapters provide greater detail on operating budget impacts.

The CIP is presented to the School Board for public consideration in November. During the School Board's involvement, additions, deletions or modifications to projects may occur. After the School Board approves the ACPS Capital Improvement Program, it is submitted to the City Council for consideration and approval.

The City Council has until May to approve the City capital budget, including the consideration of the appropriate financing necessary to support the requested projects. The full budget calendar is shown on the following page.

Once the capital projects are approved, the City maintains all CIP funding and the accounting for these funds. ACPS is given the budget authority to execute CIP projects. ACPS awards contracts, monitors the design and construction progress, verifies that work has been completed and authorizes payment. The City Treasurer issues checks for payments from the appropriate accounts.

While the program serves as a long range plan, it is reviewed and revised annually based on current planning circumstances. Priorities may change due to facilities assessments, the economic environment, new laws and regulations, population shifts or the strategic planning process.

Elementary Projects

OVERVIEW OF PROJECTS

OVERVIEW OF CIP BUDGET:

The elementary projects represent all planned projects for the elementary school sites. There are 14 existing elementary sites, which include two grade K-8 schools, Jefferson-Houston and Patrick Henry. The other sites are Charles Barrett, Lyles-Crouch, Ferdinand T. Day, John Adams which is co-located with the Early Childhood Center, Cora Kelly, Douglas MacArthur, George Mason, Naomi L. Brooks (formerly Matthew Maury), James K. Polk, William Ramsay, Samuel W. Tucker and Mount Vernon. Enrollment tables are based on the FY 2021 projections.

The secondary projects represent all planned projects for the secondary school sites. There are four secondary sites: Francis C. Hammond, George Washington, and the two campuses of Alexandria City High School (formerly T.C. Williams High School): Minnie Howard Campus and King Street Campus.

Other ACPS facilities and system-wide accounts are represented in the following areas: Building Systems Upgrades and Modernization; Capacity Projects; System-Wide; Swing Space; Rowing Facility; and Transportation Services.

PROJECT DETAILS:

The project descriptions for FY 2023-2027 for each school, where available, are based on the budget request shown in Table 2.

READING THE PROJECT DESCRIPTIONS:

Each project narrative begins with the project name, description and the project years during which the work will be funded.

There are several types of projects which are consistent across the facilities even though their project description may not be the same. Projects are also assigned to specific facilities to be able to track investment in certain schools. This helps inform which account code the budget will be appropriated to at the start of the fiscal year.

Community Use

- Church rentals
- Extended day care
- Recreation Department programs

SITE SUMMARY:

Charles Barrett Elementary School, which currently serves grades Pre-K-5 and a recreation center, was originally constructed in 1949. There have been four major additions over the years. The kindergarten wing was built in 1971, the gym addition was built in 1977 (it was remodeled into a full-time recreation center in 1995), and the media center addition was constructed in 1997. A classroom addition was installed for fall 2011 use and another four classroom addition was opened at the start of the 2015-2016 school year.

Community Use

- Extended day care
- Church rentals
- Recreation Department programs
- Head Start

SITE SUMMARY:

Cora Kelly School for Math, Science and Technology, which serves grades K-5, was originally constructed in 1955. The City's recreation department constructed a gymnasium/community center connected to the school facility in 1991. In 1996, a classroom addition was constructed in response to the continued growth on the east end of the city. A large city park, Four Mile Run Park, is adjacent to this school facility, which is zoned for Public Open Space.

ACPS conducted a feasibility study which confirmed that this building should be replaced.

Community Use

- Extended day care
- Recreation department programs
- Campagna programs

SITE SUMMARY:

Douglas MacArthur Elementary School, which serves grades K-5, originally opened in 1942 and has received six subsequent additions, including a gymnasium addition in 1966 and a major classroom addition in 1971, which doubled the size of the school. The most recent addition was the media center in 2003.

CAPACITY: A total school replacement is currently underway to rectify the deteriorating building condition and to accommodate current and projected future enrollment. ACPS is using the old Patrick Henry building as swing space for the Douglas MacArthur capacity project. Construction on this project began in April 2021 and is ongoing.

NOTE: No projects are included in this CIP budget as the replacement of Douglas MacArthur is funded by a previous budget and is ongoing.

SITE SUMMARY:

Ferdinand T. Day Elementary School was purchased and retrofitted for an elementary school using FY 2017 CIP funding. Boundaries were adjusted to incorporate the new school capacity in the 2018-2019 school year.

A facility condition assessment has been completed this past summer and projects are incorporated into this CIP proposal.

SITE SUMMARY:

George Mason Elementary School was built in the center of the city as a Works Progress Administration project in 1939. This was part of Franklin Roosevelt's New Deal Program's Federal Emergency Administration of Public Works. A classroom addition was constructed in 1949 and a multipurpose room addition constructed in 1961. This facility currently serves grades K-5.

CAPACITY: A total school replacement is recommended to rectify the deteriorating building condition and to accommodate projected future enrollment. ACPS conducted a feasibility study which confirmed the need for a full building replacement.

SITE SUMMARY:

The James Polk Elementary School, which serves grades K-5, was constructed in the west end of the city in 1965. Minor renovations converted basement spaces into music and art classrooms. An addition and renovation project in 1994 expanded the media center and relocated the main administrative office. A new gymnasium addition and ADA accessibility project and additional classrooms were completed in 2011. Another four classroom addition was completed during the summer of FY 2016. Relocatable classrooms were installed on James K. Polk Elementary School site during the summer of 2017 for pre-K students from Patrick Henry School. In 2019 all pre-K students from James K. Polk were moved to the Early Childhood Center.

SITE SUMMARY:

John Adams Elementary School was constructed in 1966 as a middle school and was converted into an elementary school in 1980. In the summer of 2010, this facility was transformed into a new vision to add the Early Childhood Center (ECC) school.

The ECC houses Head Start, Virginia Preschool Initiative and Early Childhood Special Education programs. of a pre-K through grade 5 school, which includes an Early Childhood Learning Center, and Head Start programs. A second phase of this project was completed prior to this school year to add more classrooms.

SITE SUMMARY:

Lyles-Crouch was constructed as an elementary school on one square city block in Old Town Alexandria in 1958. This facility replaced an older, smaller school structure that was originally constructed on this site. A small storage room addition was built in 1985, and a media center addition with a new main entrance was constructed in 2002. This facility currently serves grades K-5.

- Extended day care

SITE SUMMARY:

Mount Vernon Community School is located on one of the oldest school sites in the city. The first Mount Vernon School was constructed in 1906 at the corner of Mount Vernon Avenue and Uhler Street, where the playground currently sits. The existing three-story building was originally opened in 1923, with classroom additions in 1941 and 1950. In 1967, a major addition doubled the size of the school and reoriented the main entrance to Commonwealth Avenue. The media center addition was constructed in 1991 and the City expanded and constructed the Mount Vernon Recreation Center adjacent to the school in 1997. This school serves grades K-5 and operates with a dual language learning program.

SITE SUMMARY:

Naomi L. Brooks Elementary School (formerly Matthew Maury Elementary School) was originally built as a six classroom school in 1929. In 1941, three rooms were added at the rear of the school. Two large wings were added to each side of the main building in 1949. In 1961, another wing with a new cafeteria and kitchen was constructed. The gymnasium was added in 1971, and the library has undergone renovation several times. A major renovation, completed in 2004-05, included a new media center, additional classroom space, teacher work areas and a new administrative office space. This facility currently serves grades K-5.

The proposed capacity project is set to begin within this CIP with design funds in FY 2031.

SITE SUMMARY:

Patrick Henry K-8 School and Recreation Center opened in January 2019 for all Patrick Henry students and the community. This school increased the Patrick Henry school size by about 50,000 square feet and added capacity for approximately 180 middle school students.

Following the School Board's decision in April 2019 to use the old Patrick Henry building for Swing Space for Douglas MacArthur, and the buildings completed renovations in 2020, the old Patrick Henry is currently occupied by Douglas MacArthur. The demolition of the old Patrick Henry building and the installation of the fields is budgeted for FY2023.

SITE SUMMARY:

When it opened in fall 2000, Samuel Tucker Elementary School was the first new school built in the City of Alexandria in 30 years. It is located in the Cameron Station area of the city and is adjacent to the city's Boothe Park and also to a nearby industrial area. This facility serves grades K-5 and operates on the modified school calendar.

Enrollment is expected to decrease with implementation of the new boundaries in 2018; however, because the school is considered programmatic, it will take longer for enrollment to decrease here than at other schools.

SITE SUMMARY:

The William Ramsay Elementary School, which serves grades Pre-K-5, was originally constructed in the west end of the City in 1958. In 1963, a three-story classroom addition was constructed. The multipurpose room/nature center addition opened in 1977, and there was a media center addition in 1990. The City Recreation Department constructed a new gymnasium/recreation center adjacent to the school in 2000. In 2002, the multipurpose room was renovated to create additional classroom space and the city's Jerome Buddie Ford Nature Center was expanded. This school is located adjacent to the City's Dora Kelly Park.

SITE SUMMARY:

Francis C. Hammond Middle School, which serves grades 6-8, opened in 1956 as a four-year high school. A major classroom and cafeteria addition was completed in 1959. In 1979, it began to function as a junior high school for grades 7-9. In 1993, the facility became a middle school for grades 6-8. A major reconstruction and classroom addition, which included additional science, music, art, computer and technical education classrooms and a gymnasium, was completed in 2002.

An artificial turf field was completed in 2012. In 2019, ACPS partnered with the Washington Capitals to upgrade the hockey rink, which was completed in October 2019. And in 2021, ACPS opened a new futsal court in place of the previous tennis courts.

SITE SUMMARY:

The George Washington Middle School, which serves grades 6-8, opened in 1935 as a four-year high school. A major classroom and cafeteria addition was completed in 1937. The GW Annex building, which originally housed vocational classes, was constructed in 1941, and the GW gymnasium building was constructed in 1961. In 1979, GW was converted to a junior high school for grades 7-9. In 1993, this facility became a middle school for grades 6-8. A major reconstruction and classroom addition, which interconnected all three buildings on campus, was completed in 2003. This addition/renovation included expanded science, computer, art, and technical education classrooms, as well as gymnasium facilities. This school was recently put on the national historic register for its art deco elements.

SITE SUMMARY:

The Minnie Howard School building, which houses all students in grade nine except the students enrolled in the International Academy, was originally constructed in 1954 as an elementary school. There was a major classroom and gymnasium addition in 1969 when it was converted to a middle school. The facility served as the central administrative offices from 1981 to 1993, when it was renovated and became the Ninth Grade Center. It is now the Minnie Howard campus of Alexandria City High School (formerly T.C. Williams High School).

CAPACITY:

Based on the School Board's vote for one high school with a maximum build at Minnie Howard, a capacity project is underway at this site. This project is will double the existing capacity and building size at

SITE SUMMARY:

Alexandria City High School (formerly T.C. Williams High School) is Alexandria's only public high school, which serves grade levels 10-12. This state of the art facility opened in fall 2007 to staff and students. The new facility provides smaller learning communities as well as flexible academic space capable of meeting the evolving secondary school curriculum requirements. This school includes an artificial turf sports field, stadium and a two story parking garage. This school was constructed under LEED guidelines as a green campus and was awarded a LEED Gold rating.

Construction for the stadium project is including the bleachers, lighting, press box, concessions, ticket booth, track and the field, is substantially complete.

System-Wide Projects

SCHOOL-WIDE PROJECTS: BUILDING SYSTEMS UPGRADES & MODERNIZATION

SUMMARY:

These projects provide for the replacement and modernization of the safety and security and technology systems at all school facilities in the division.

DESCRIPTION:

This funding can be used at any facility in the ACPS system, on an as-needed basis. Funding of these projects is key to implementation of a system-wide master key system and enhancing access control to

ensure the safety and security of ACPS's students and staff. An assessment of the security status of ACPS facilities was completed in FY 2018 and funds were adjusted in this proposed budget to reflect the recommendations of this assessment along with a prioritization of facilities as well as actual costs. ACPS added technology modernization to the CIP two years ago in considering that, similar to textbooks, technology is considered an asset that needs to be upgraded.

System-Wide Projects

SCHOOL-WIDE PROJECTS: CAPACITY

SUMMARY:

These projects provide for expansion of school capacity due to enrollment increases at all grade levels.

DESCRIPTION:

This funding will be used with the approval of the School Board, City Council, and the City Planning Commission on expansion of current buildings and

construction of new facilities. In alignment with the first deliverable recommendations of the Ad-Hoc Joint City-Schools Facilities Investment Task Force, ACPS is proposing funds for new high school construction. The estimate included is based on the School Board's vote to maintain one high school, or a connected high school network with a new facility at Minnie Howard. This category also includes the renovation of the 1703 N. Beauregard St. office building into a new 600-student capacity school.

System-Wide Projects

SCHOOL-WIDE PROJECTS: SYSTEM-WIDE

SUMMARY:

This project provides for division-wide renovation projects. This includes unanticipated and emergency renovations, asbestos removal, and instructional environment upgrades at existing school facilities throughout the school system.

DESCRIPTION:

This funding can be used for renovations at any facility in the ACPS system on an as-needed basis. This funding is also used for asbestos removal on an as-needed basis and for upgrades to the instructional environment.

SCHOOL-WIDE PROJECTS: ROWING FACILITY

Rowing Facility

#1 Madison Street
Alexandria, VA 22314

Community Use

- Alexandria City Community Rowing Association
- Crew Boosters Association
- Community Rentals

SITE SUMMARY:

The Alexandria Schools' Rowing Facility is located on the Potomac River at the foot of Madison Street. This facility opened in 1986 and serves the school division's rowing program for secondary students as well as the Alexandria City Community Rowing Association and the Crew Boosters Association.

Several projects have been completed in recent years, including dock replacement, new lighting systems, and a custom built boat storage system that was installed for safer and more efficient use along with new siding replacement.

DESCRIPTION:

System-Wide Projects

DIVISION-WIDE PROJECTS: TRANSPORTATION SERVICES

SUMMARY:

This project provides for the phased replacement of older school buses as well as the phased replacement of other school vehicles.

DESCRIPTION:

The current school bus fleet consists of vehicles ranging in age from one to fifteen years. The average life expectancy of a school bus is dependent on mileage, maintenance and repairs, but is recommended to be twelve years for a conventional school bus. Funding is also included for replacement of vehicles on a phased basis which started in 2017. Many vehicles in the fleet are or are approaching over 15 years old. This includes maintenance trucks, tractors, vans, security vehicles and passenger vehicles. Additional buses are included for growing enrollment in the school division. The existing Transportation Facility requires upgrades to meet the growing enrollment and, therefore, staff.

Renovation of the facility is now proposed for FY 2026 to accommodate for the Witter Wheeler Campus Master Plan being conducted jointly with the City of Alexandria's Department of General Services and other departments. No updates on the Witter Wheeler Study have been provided from the City to date. Expansion of the parking for buses will need to be considered as part of this project.

Interim needs were identified in the Targeted Facilities Conditions Assessments and Facility Conditions Assessments from 2021 and are proposed accordingly in the CIP.

Supporting Data

SUPPORTING DATA

Three sections are included in this supporting data section: Enrollment Projection information, Useful Definitions, and Detailed Tables.

ENROLLMENT PROJECTIONS

Actual Student Enrollment

As of September 30, 2021, ACPS PK-12th grade student enrollment was 15,528, a decrease of 107 students and a growth rate of -0.74% from last year. While total enrollment increased for the second year in a row, the negative growth rate is lower than the -3% growth from FY21 to FY22. Enrollment is expected to grow; however, not at higher rates experienced in recent years.

COVID-19 impacted enrollment for school districts statewide, including ACPS. Decreases were seen at almost every grade level. However, Kindergarten enrollment was the most impacted and over-projected.

Projection Process

ACPS enrollment forecasts are prepared each fall, by school and by grade for ten years and used both to prepare the annual operating and capital budgets for the school division. The actual October 1 enrollment count is the basis from which projections are developed.

To develop kindergarten enrollment projections, staff conducts an annual review of birth data collected by the Virginia Department of Health. These are births to mothers living in Alexandria, no matter where the actual birth takes place. This number is compared with the actual number of kindergarteners enrolled in ACPS. A ratio is calculated, averaged, and applied to future years to estimate the number of future kindergarteners.

For the other grades, a cohort survival method is used. This tracks the number of students moving from grade level to grade level at each school, each year. Cohort survival ratios are calculated, averaged, and applied to future years to estimate the number of 1st-12th-grade students. To account for the district-wide decrease in enrollment due to COVID-19, FY21 Cohort Survival Rate was not averaged into the projections for FY23. Rather, the average 3-year cohort survival rate for FY22, FY20, and FY19 were used.

ACPS has worked closely with the City Planning and Zoning staff to develop these estimates. The group is studying major factors that affect student enrollment and plan to monitor trends in order to develop more accurate forecasting models to capture the impact of development. This collaboration will continue to support the refinement of enrollment projections by ACPS and improved estimates of the impact of development projects by the City's Department of Planning and Zoning.

Enrollment Projections

Total enrollment is expected to increase to 15,597 students in FY2023. The table on the following pages shows the actual and projected enrollment from FY2023-2032 by school and by grade.

CIP DETAILS

A complete detailed list of the Superintendent's Proposed FY 2023-2032 CIP projects is included on the following pages in Table 2.
