EXHIBITS

Elementary & Middle

Refer to the fair guide for "Exhibit" requirements.

<u>Note</u>: the following images were created for past fair topics.

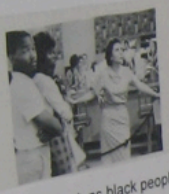

SEGREGATION

Black people had to sit in the back of the bus.

Classrooms for black children were often crowded, dark, and dreary.

A white woman stops black people from entering a restaurant.

This business would not serve blacks.

Only white people could use this soda machine.

ROSA PARKS
Mother of the Civil Rights Movement

By Paola A. Pérez

When Rosa Parks refused to give up her seat on a bus to a white man on December 1, 1955, she made a change in American History. At that time there were segregation laws to keep black and white people apart. But Rosa had courage and stood up for her beliefs. Because of her simple act, the black people of Montgomery, Alabama, united as one to stay off the buses until the segregation law in buses ended. After that, they continued to fight for their rights to end segregation in other ways.

Rosa Parks was arrested and fingerprinted for breaking the law after refusing to give up her seat on the bus.

After the Supreme Court of the United States decided that segregation on the buses was wrong, Rosa could seat wherever she wanted on the bus.

BOYCOTT

This woman passes flyers asking people to stay off the buses. The Boycott lasted for 381 days.

These people walked to work and school.

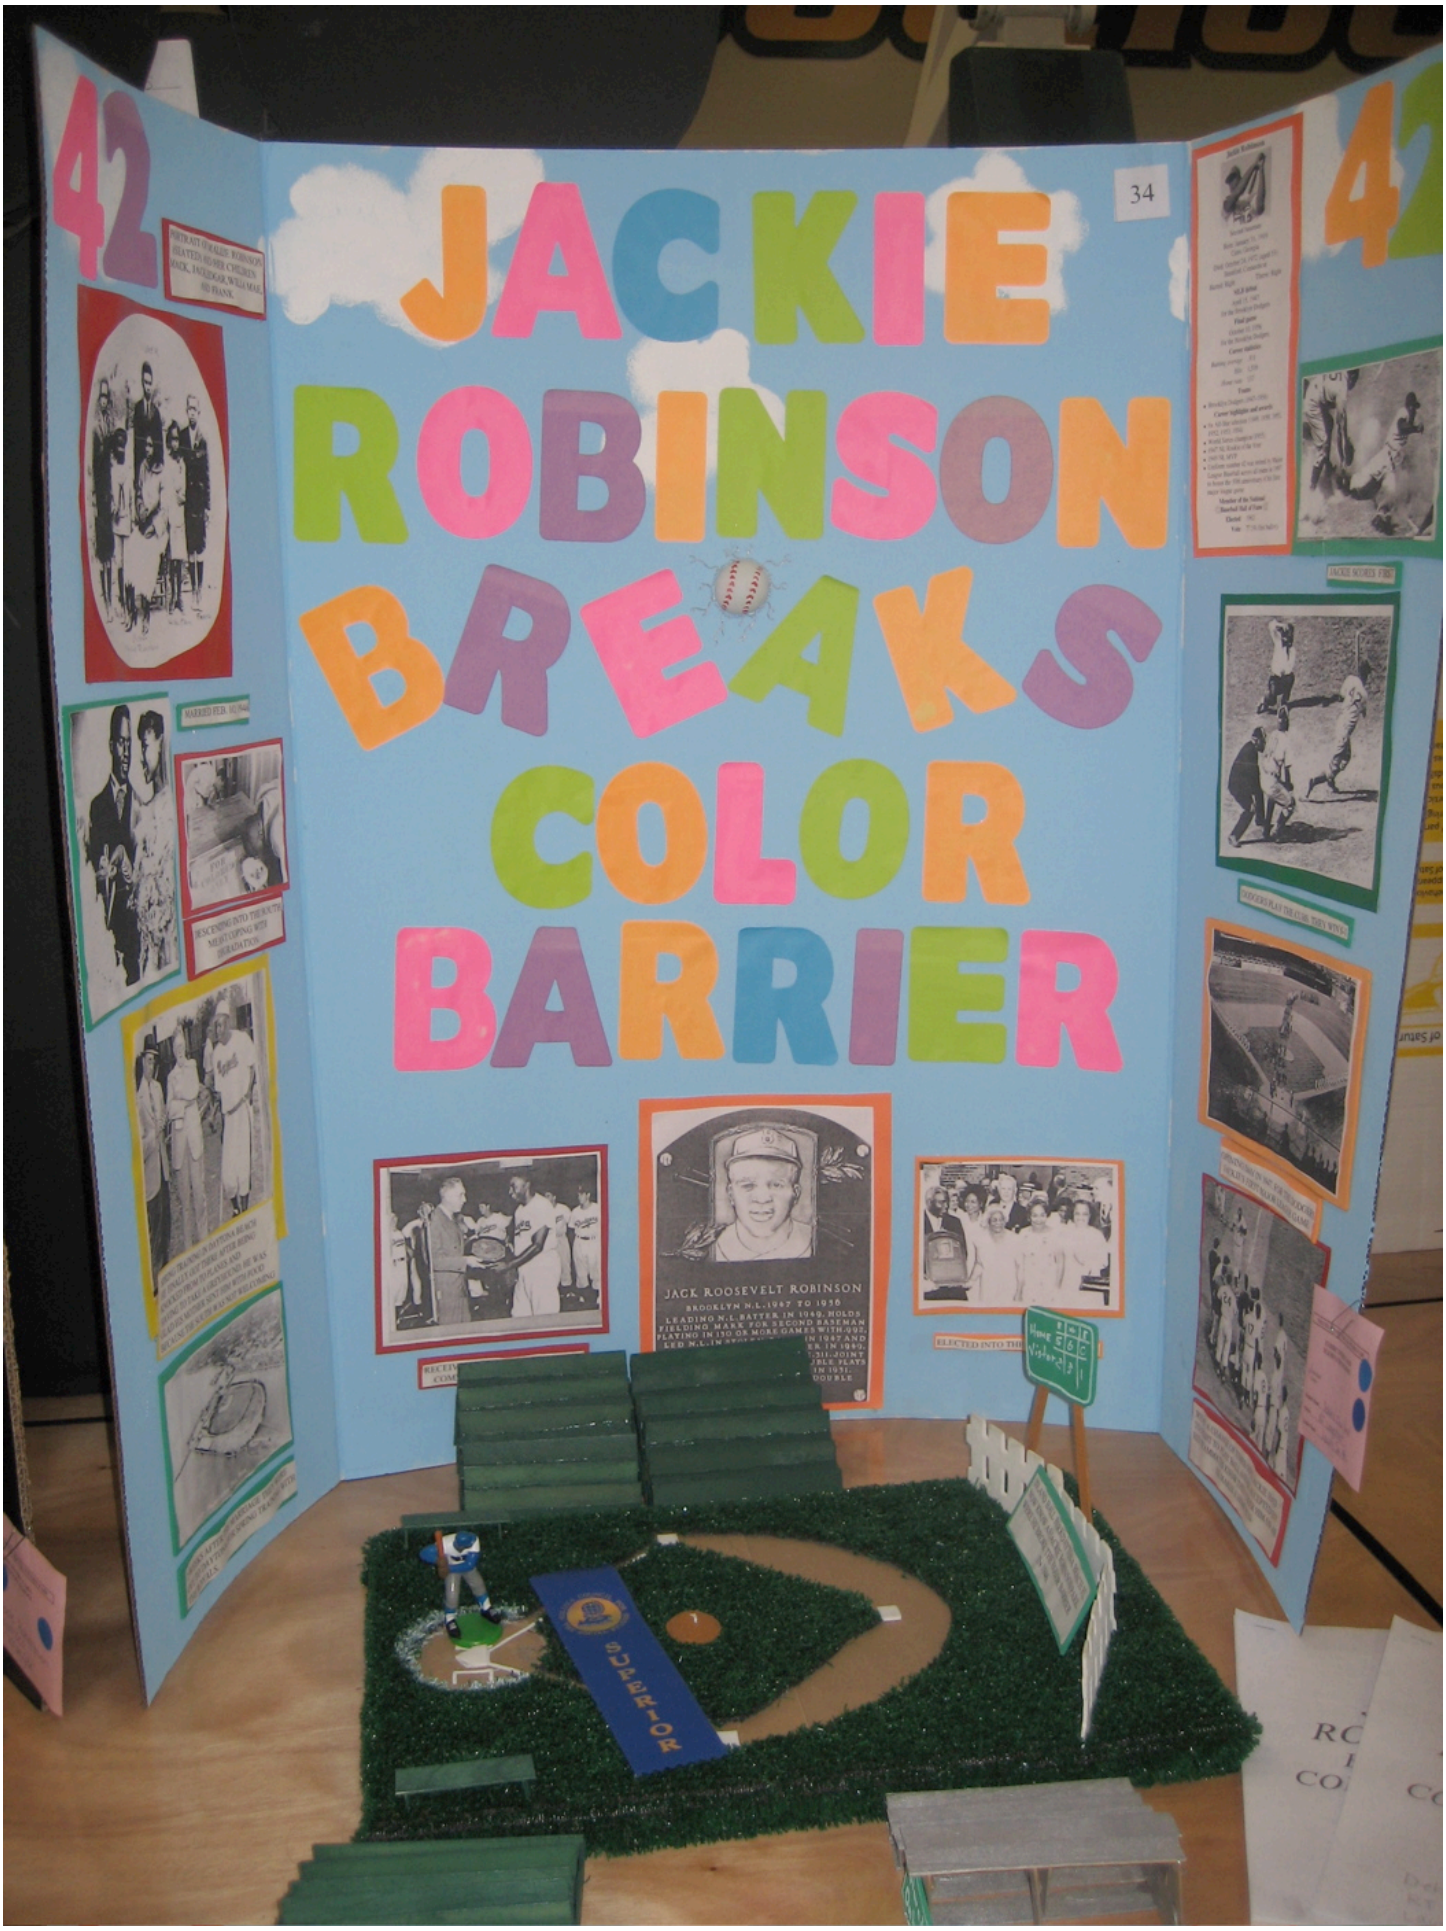

Many people had to share cars.

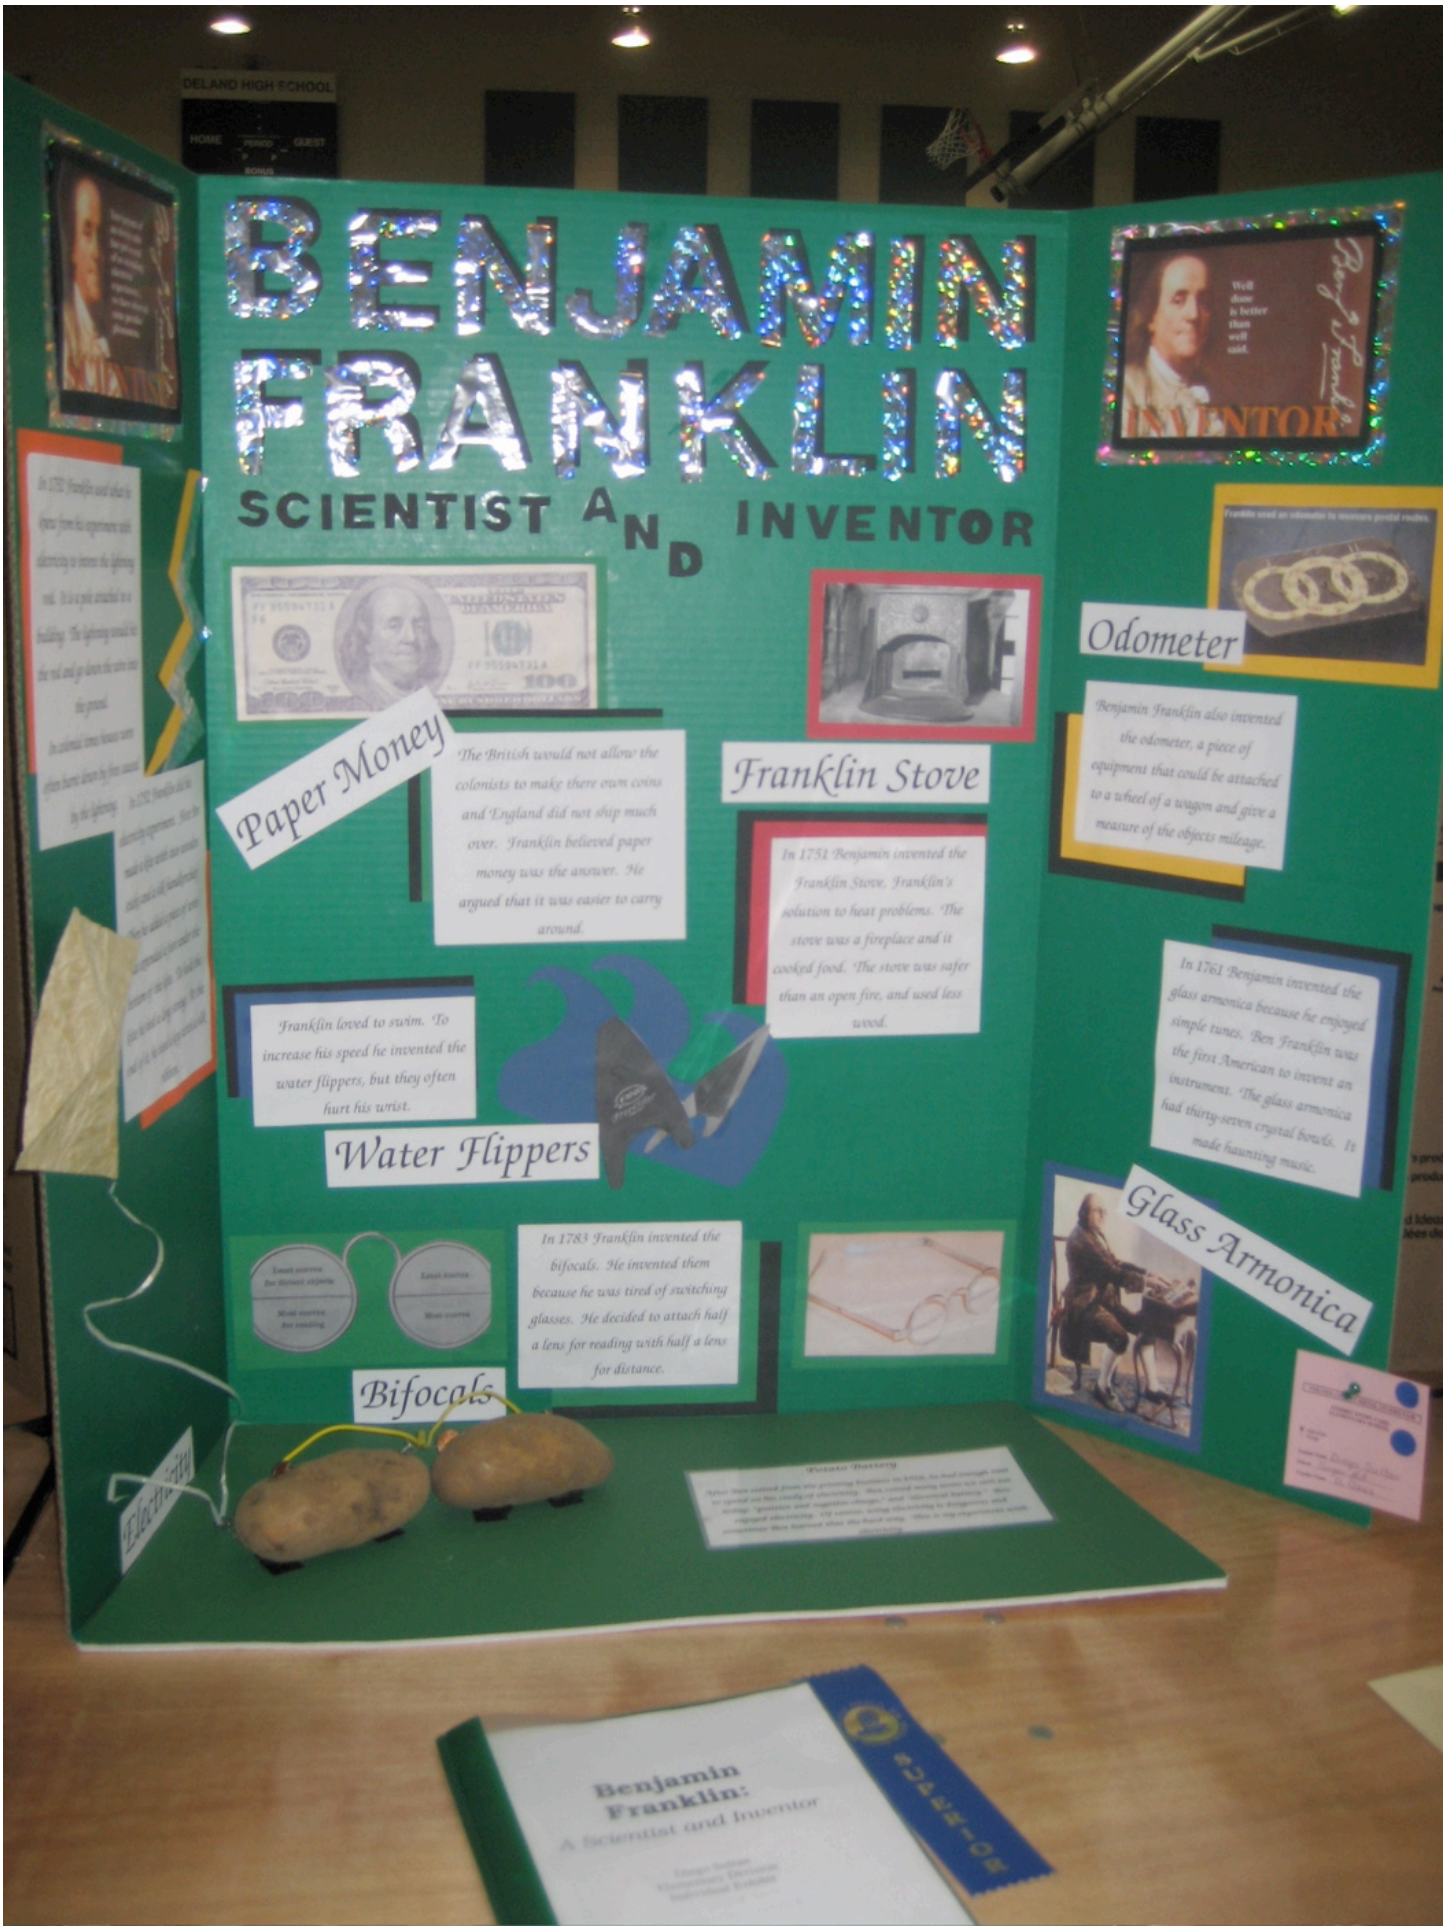

Only white people rode the buses. Soon the buses had to stop running. There were not enough riders.

BENJAMIN FRANKLIN
SCIENTIST AND INVENTOR
Well done is better than well said.
INVENTOR
Paper Money
The British would not allow the colonists to make there own coins and England did not ship much over. Franklin believed paper money was the answer. He argued that it was easier to carry around.
Franklin Stove
In 1751 Benjamin invented the Franklin Stove. Franklin's solution to heat problems. The stove was a fireplace and it cooked food. The stove was safer than an open fire, and used less wood.
Odometer
Benjamin Franklin also invented the odometer, a piece of equipment that could be attached to a wheel of a wagon and give a measure of the objects mileage.
Franklin loved to swim. To increase his speed he invented the water flippers, but they often hurt his wrist.
Water Flippers
In 1761 Benjamin invented the glass armonica because he enjoyed simple tunes. Ben Franklin was the first American to invent an instrument. The glass armonica had thirty-seven crystal bowls. It made haunting music.
Glass Armonica
In 1783 Franklin invented the bifocals. He invented them because he was tired of switching glasses. He decided to attach half a lens for reading with half a lens for distance.

Anna of Byzantium

PRINCESS AND FIRST WOMAN HISTORIAN

ACTIONS

LEGACIES

Mosaic Icon of Emperor Alexios and Empress Irene beside The Virgin Mary and Jesus.

A painting of the city Constantinople, the capital of the Byzantine Empire, where Anna lived.

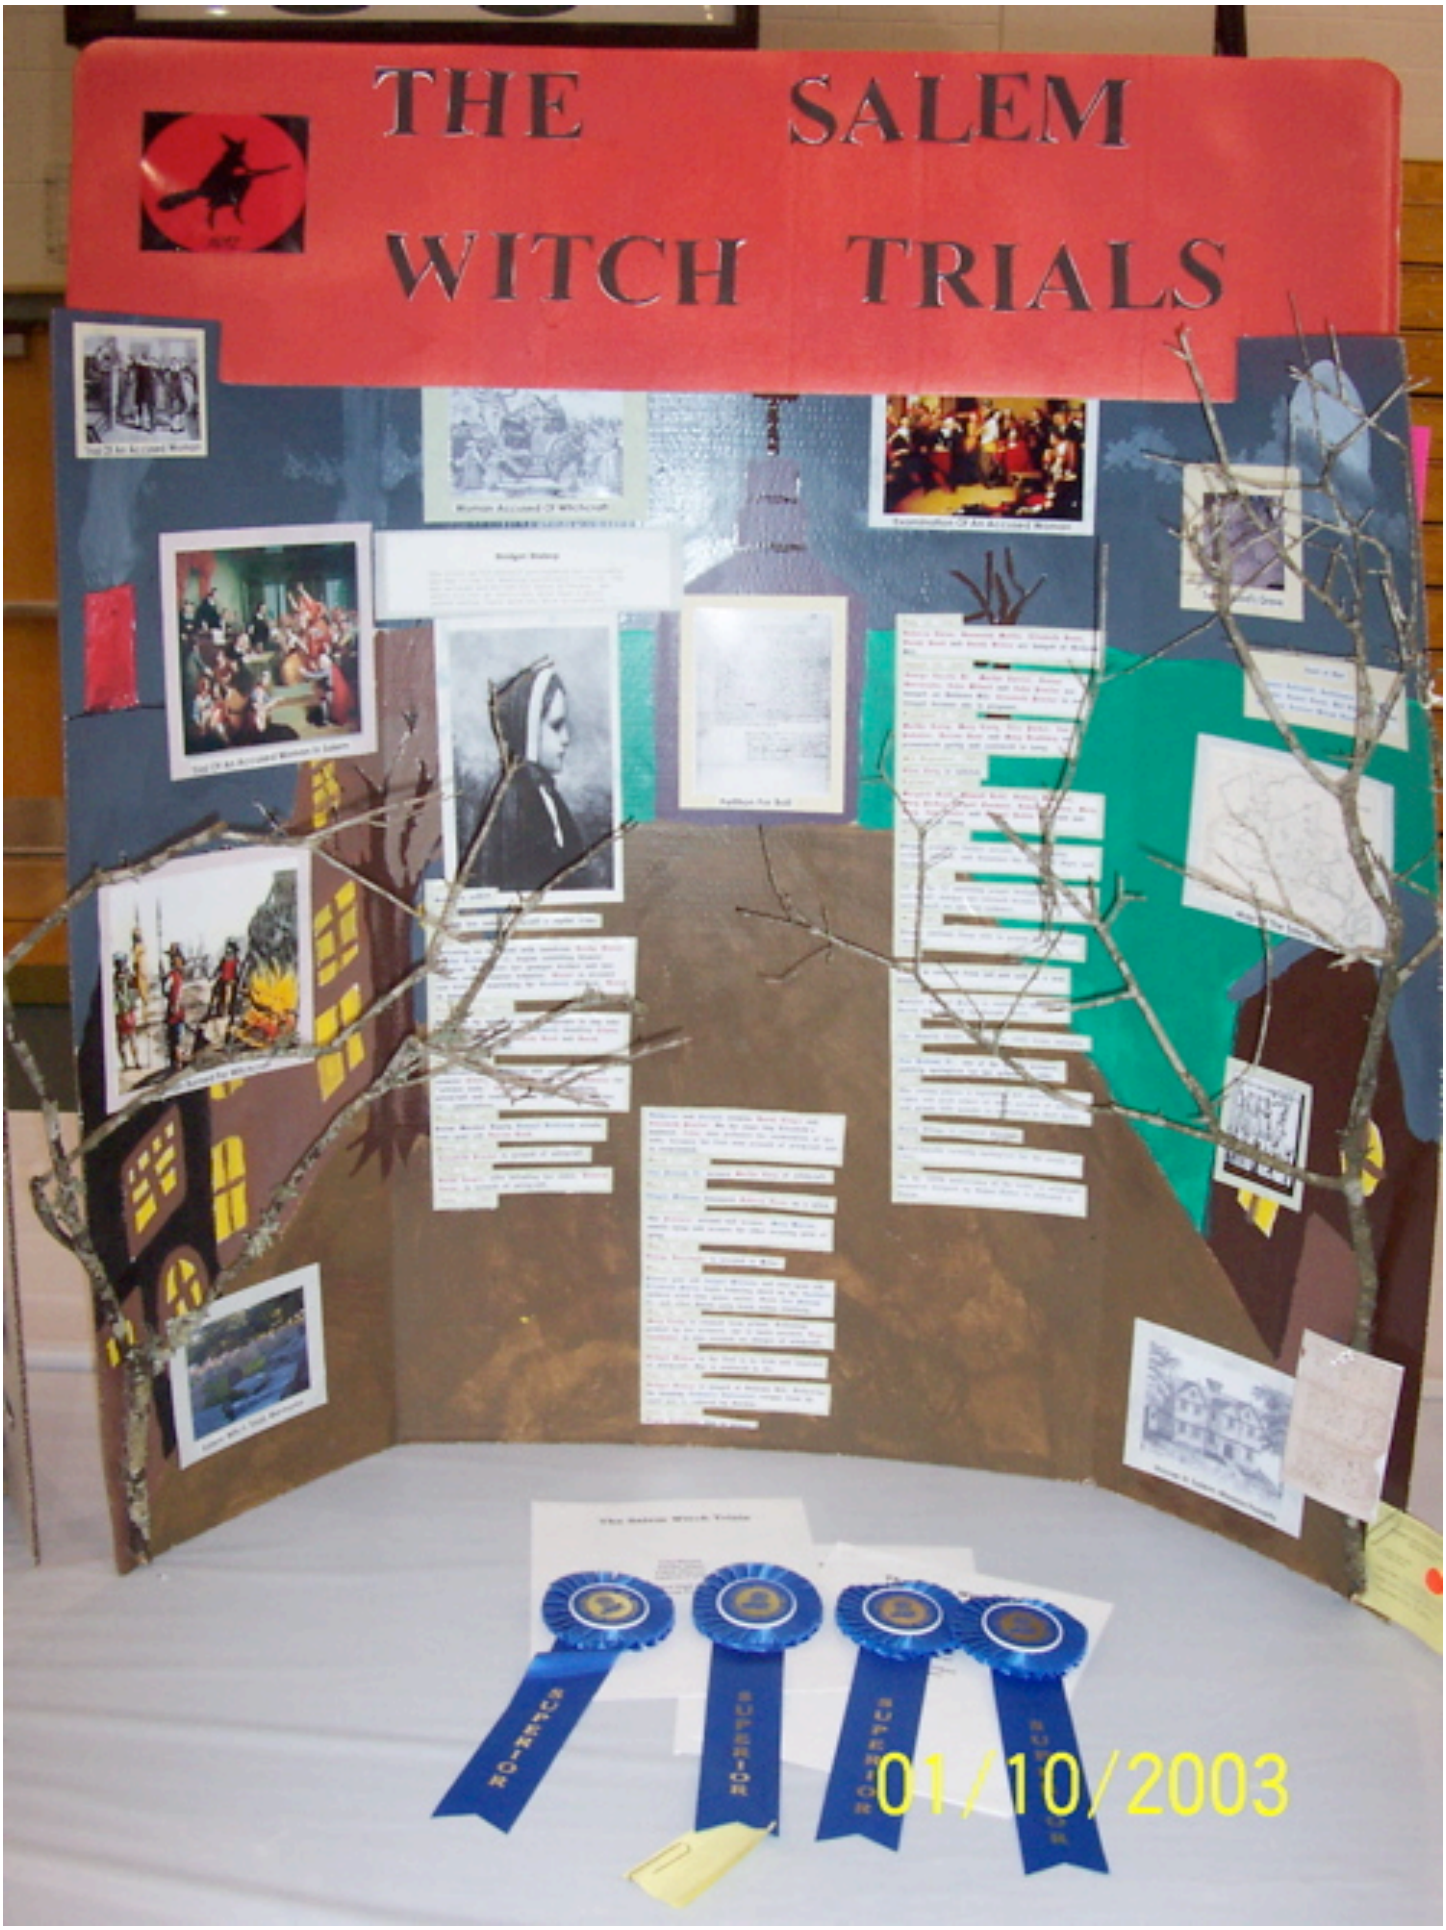

The Alexiad

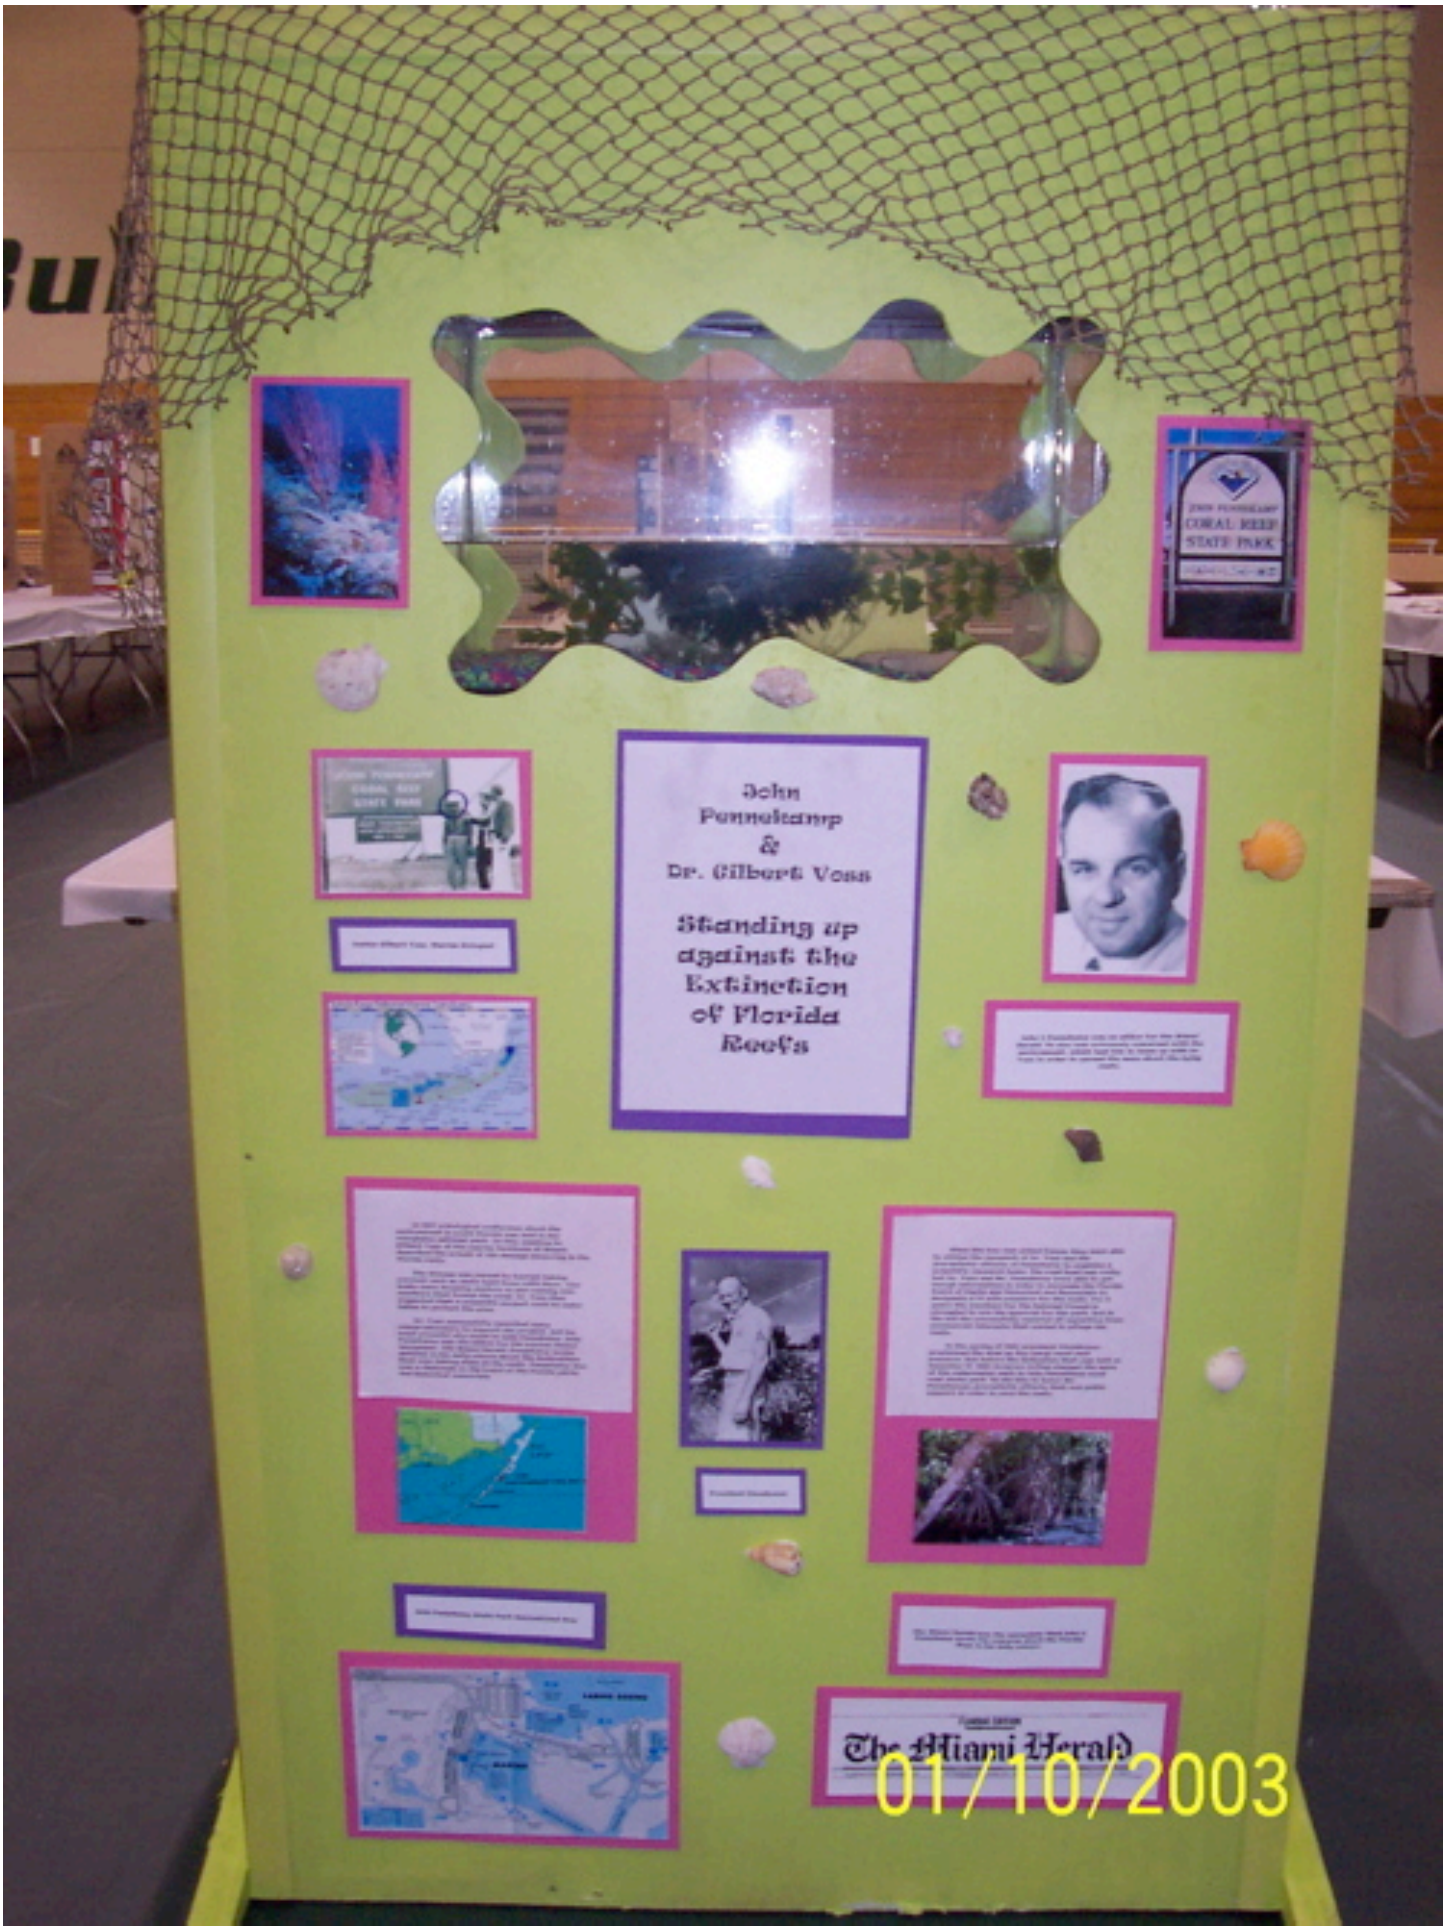

TIME, in its irresistible and ceaseless flow carries along on its flood all created things, and drowns them in the depths of obscurity, no matter if they be quite worthy of mention, or most noteworthy and important, and thus, as the tragedian says, "he brings from the darkness all things to the light, and all things born nowhere in the night." But the tale of history forms a very strong bulwark against the stream of time, and to some extent checks its irresistible flow, and, of all things done in it, as many as history has taken over, it secures and binds together, and does not allow them to slip away into the abyss of oblivion. Now, I recognized this fact. I, Anna, the daughter of two royal personages, Alexios and Irene, born and bred in the purple. I was not ignorant of letters, for I carried

my study of Greek to the highest pitch, and was also not unpractised in rhetoric. I perused the works of Aristotle and the dialogues of Plato carefully, and enriched my mind by the "quaternion" of learning. I must let this out and it is not bragging to state what nature and my pains for learning have given me, save the gifts which God apportioned to me at birth, and time has contributed. However, on account of

INDIA

THE YOUNGEST INDIAN BARRISTER

EARLY LIFE

- Born on December 25th, 1876.
- Enrolls in the prestigious Lincoln's Inn, London at the age of sixteen.
- At age nineteen graduates to become a Barrister, the youngest Indian ever to do so.
- Moves to Bombay, India to start practicing law.
- Enter politics at the age of thirty.

TWO NATION THEORY

Many people believed that India had 2 different nations, the Hindus and the Muslims, who had nothing in common. They not only had different religions but actually were two separate nations each with their own customs, language and traditions.

AMBASSADOR OF HINDU-MUSLIM UNITY

In his early political career, Jinnah believed the only way for India's independence was with the combined efforts of Hindus and the Muslims. He joined both the Indian National Congress, a political party of which majority of the members were Hindu and also joined the All India Muslim League. He here work to bring the two together served as the 'Ambassador' of Hindu-Muslim Unity.

ROUND TABLE CONFERENCE - LONDON

JINNAH RESIGNS FROM INDIAN NATIONAL CONGRESS

PRESIDENT OF ALL INDIA MUSLIM LEAGUE

THE STRUGGLE FOR PAKISTAN – PAKISTAN RESOLUTION

In 1940 there was a huge meeting of more than a hundred thousand members of All India Muslim League in Lahore. It was in that meeting that Muslims demanded a separate homeland for themselves.

"All those areas that were geographically next to each other and had more Muslims than all other religious groups should become part of a new country. Pakistan", which means "land of the Pure."

JINNAH WITH JAWAHAR LAL NEHRU AND BRITISH VICEROY LORD MOUNTBATTEN-1947

INDEPENDENCE OF PAKISTAN

Under the leadership of Quaid-e-Azam, Muslims struggled for a long time. Finally the dream come true and Pakistan was born on August 14th, 1947.

JINNAH WITH LORD MOUNT BATTEN AND LIAQUAT ALI KHAN, THE FIRST PRIME MINISTER OF PAKISTAN

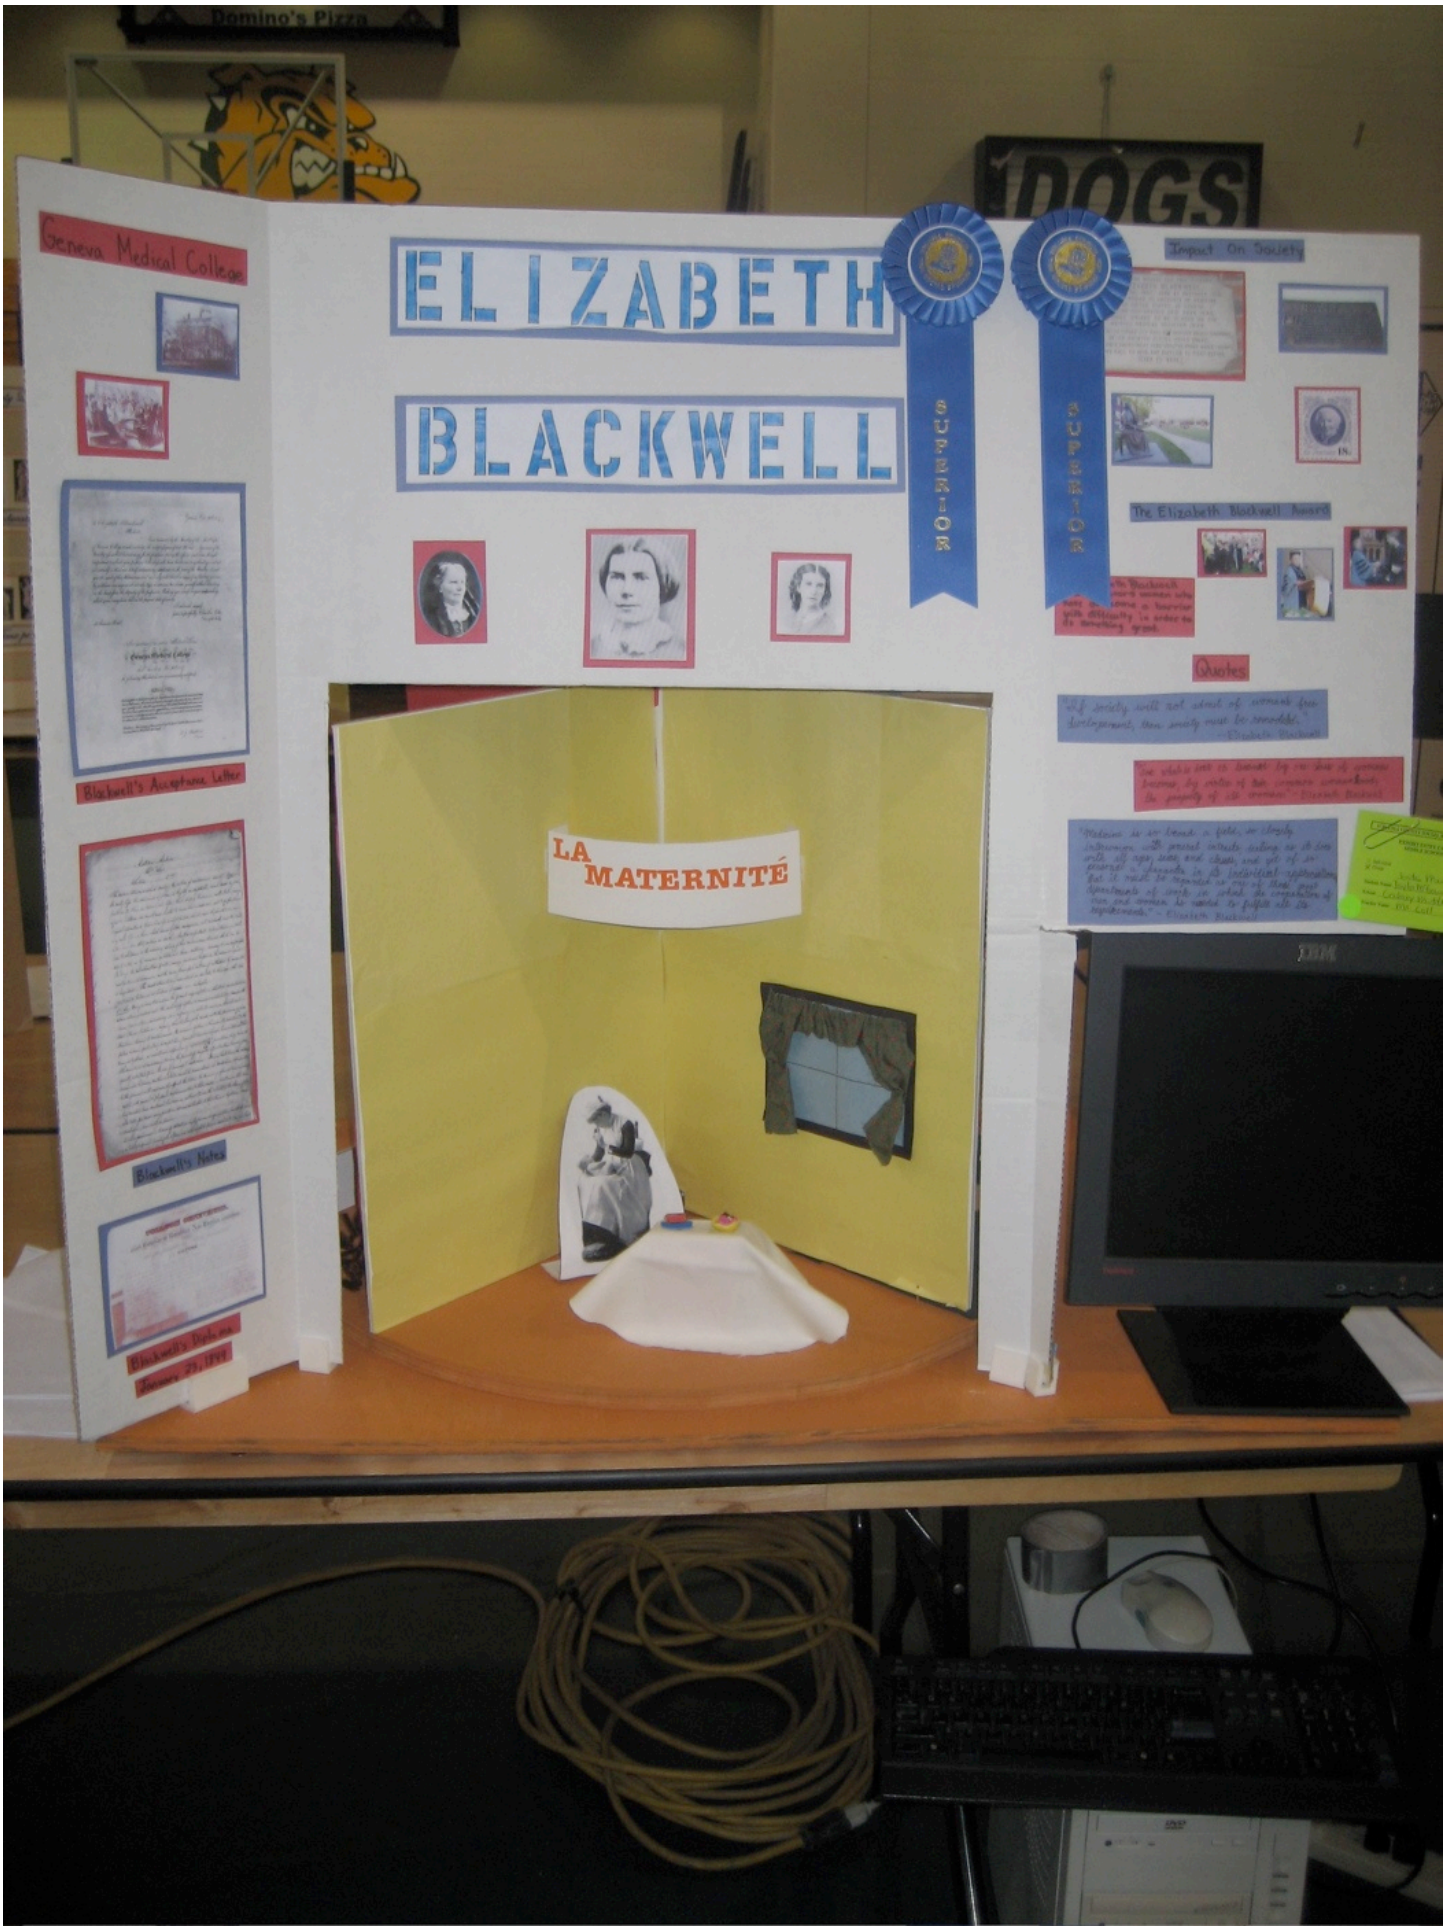

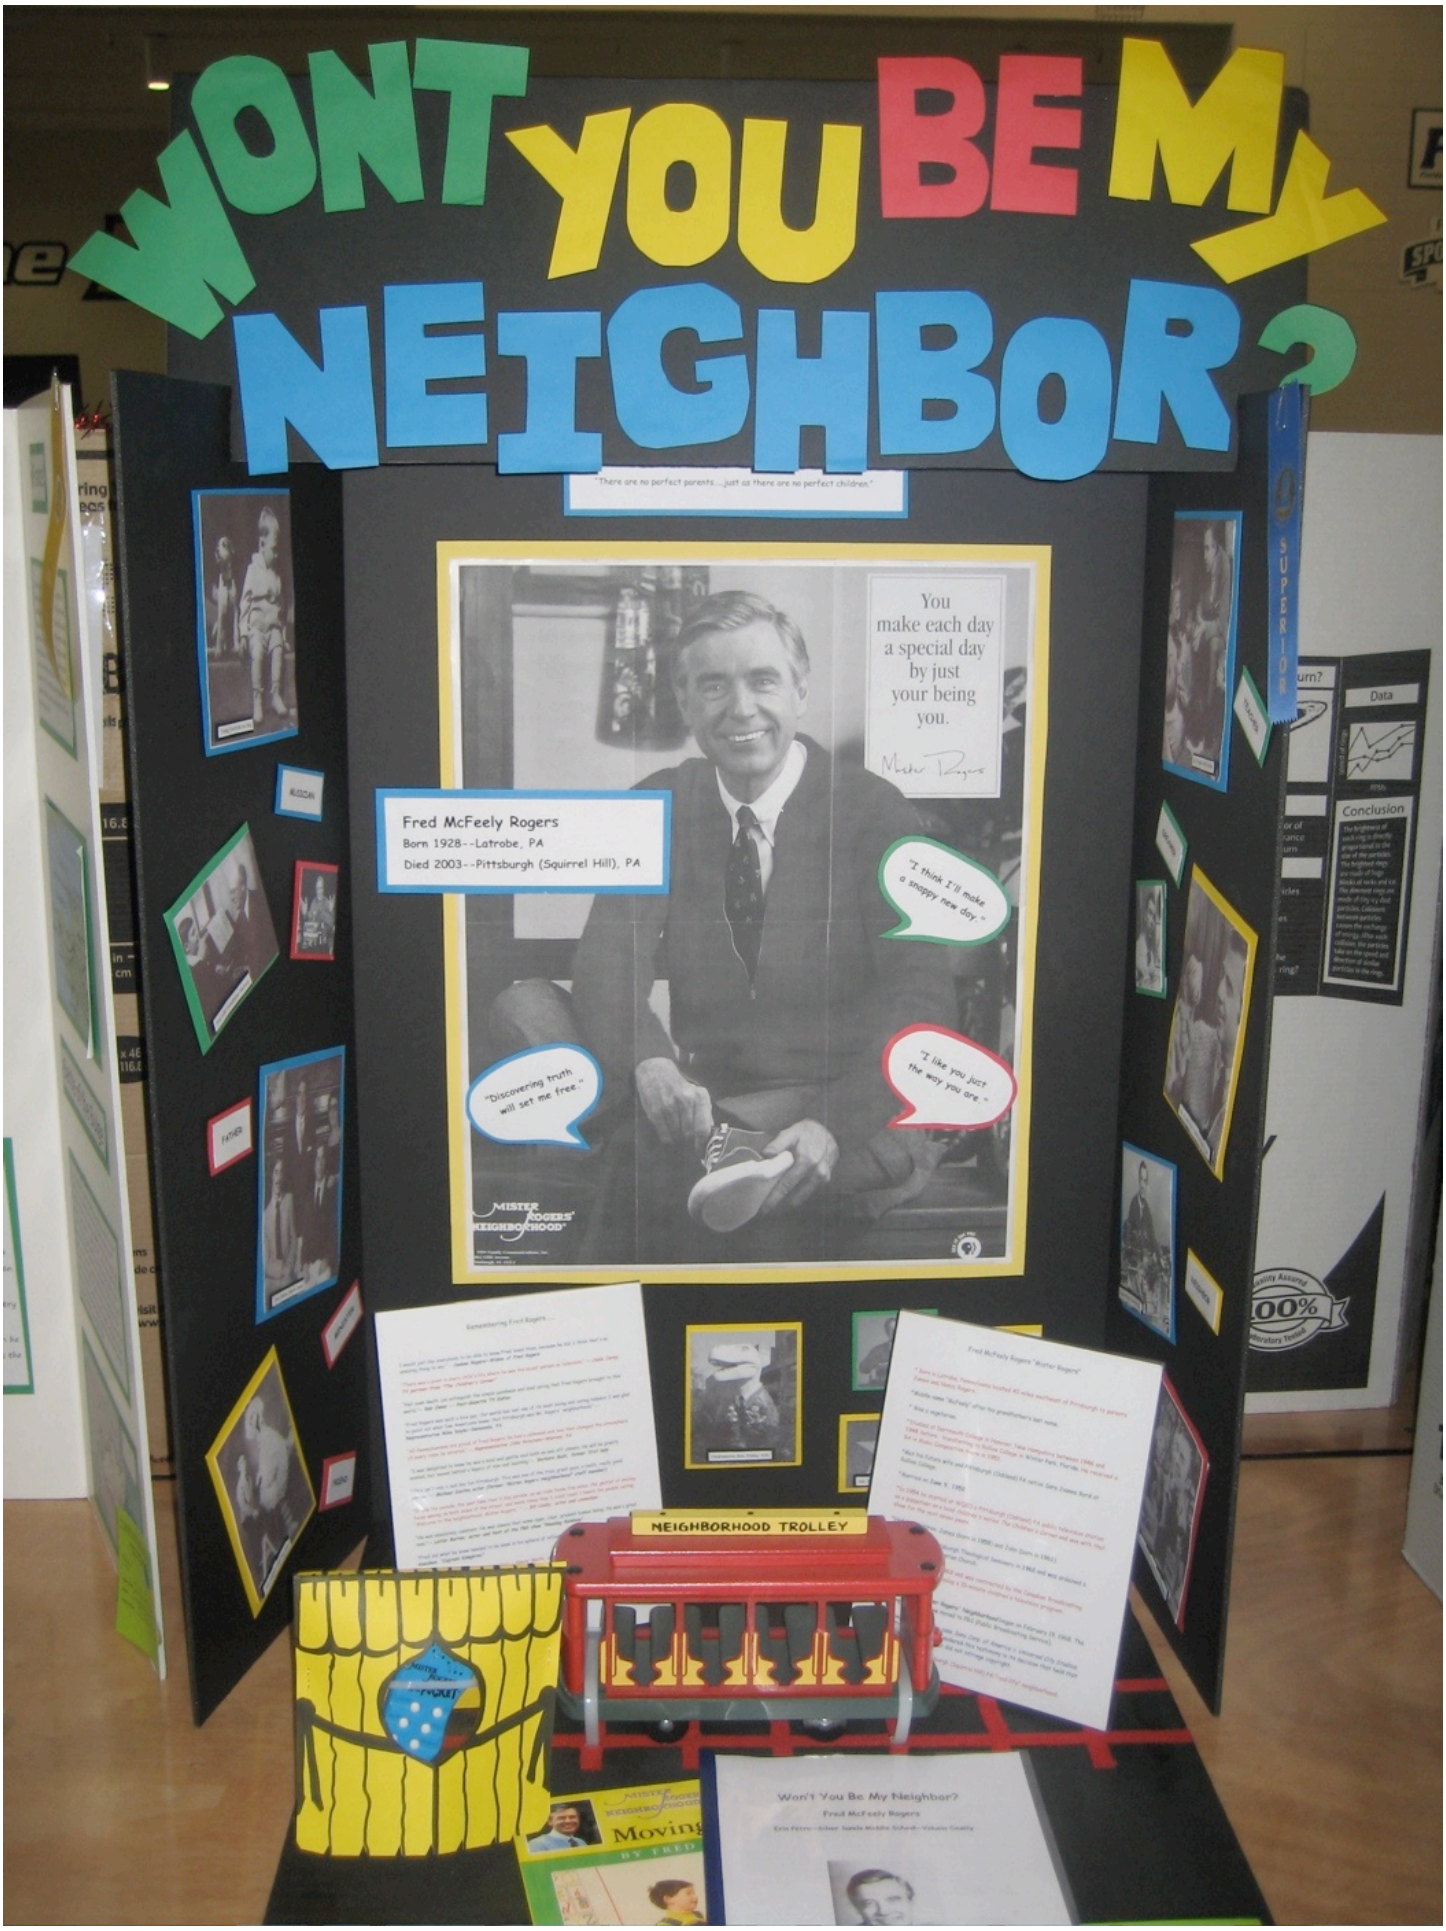

"Pakistan has great future ahead of it. It is now for us to take the fullest advantage of what the nature has so abundantly provided us with and build up a glorious and mighty state."

Hetch Hetchy
Hetch Hetchy Valley is a glacial valley in Yosemite national park in California. Right now it is completely flooded by O'Shaughnessy Dam, forming the Hetch Hetchy Reservoir. The name "Hetch Hetchy" comes from a grass with edible seeds that grows in the valley. Hetch Hetchy was sculpted by glaciers as recently as 10,000 years ago.

MPs want Maathai movement banned
Wangari Maathai was born in Nyeri, Kenya in 1940. Among many other degrees, Mathai is the first woman in Central as well as East Africa to have earned a doctorate degree. In addition, she was also the first woman in the region to attain the positions as chair of the Department of Veterinary Anatomy and an associate professor in 1976 and 1977, respectively. During the years 1976-1987, Maathai was very active in the National Council of Women of Kenya and in 1981 she became its chairman. While serving in the National Council of Women, she developed the idea of planting trees with her people in order to help the environment and improve their quality of life. Thus, in 1986, the Movement established a Pan African Green Belt Network. Since then, many other African countries have launched similar programs. Mathai is recognized internationally for many other achievements and continues to work hard to improve life for all people.
