

Community-Based Services

Devereux Advanced Behavioral Health Florida offers an array of community-based programs, providing support to children and families through a variety of specialized therapeutic services, including outpatient counseling, medication management and specialized services for victims of human trafficking. Our community-based services are offered at this time in a remote/telehealth capacity. Telehealth services are offered for children and families in any geographical area, through the use of internet access and videoconferencing technology with a mobile device or computer with webcam. Telehealth service delivery alleviates common barriers to care, such as limitations with transportation, convenience in scheduling, and the current impact of social distancing practices related to minimizing the spread of COVID19.

Participate in Individual, Family Therapy, Medication Management virtually anywhere!

Devereux Florida's Community-Based Counseling Services are covered through Medicaid Managed Care Plans, select private insurance and Florida Healthy Kids. Call Devereux Florida's centralized community-based referral line today to see if your plan covers telehealth services. An appointment specialist can help determine where service provision may continue long-term in a home/school/clinic setting.
