

Skills for Success

Hello, My name is Robert Fraser, I graduated from Lakewood High School in 2012.

While I enjoyed my education throughout the years, I was not the student that played sports or attended after school events. I was the student who's only real interest was working on cars and other mechanical projects. Even from my earliest memories, I've always had a love for cars, motorcycles, and boats. It's because of this passion, I chose Auto Tech as my main elective.

Prior to joining Auto Tech, I had a good bit of knowledge regarding cars and how to fix them when they broke. However, Mr. Szittai's Auto Tech Program helped me sharpen my skills and thoroughly learn the ins and outs. I speak highly of Mr. Szittai's Auto Tech Program as I know it was the most well rounded curriculum I've ever taken. I say this because not only did we learn how to work on cars, we learned a trade, and many valuable life lessons you can only learn by experience.

Auto Tech allowed me to experience and develop many of the skills I use today as an individual, as a supervisor, and as a leader.

Few inventions have had such a profound impact on the world as the car. It is an invention that has not only change the way people live, it's influenced business and the economy in ways no one could have foreseen. New advancements in technology will always progress and so will the automobile. Wouldn't you like to know how to fix it when it breaks? Learn a valuable trade, learn to stand out, learn be a leader, and join Auto Tech today!

Robert D. Fraser, Class of 2012
