

# Skills for Success

# Automotive Technology

I am enrolled in Project Lead the Way [Engineering Technology] and Auto Technology. The dual program enrollment has been a real benefit. Skills that I learned in the first two years of PLTW translate into hands-on application in Auto. Many of the concepts we learned in engineering translate directly to Auto circuitry, calculations and problem solving. The class is small and Mr. Z is fun and very knowledgeable.

I plan on attending a four year college and am unsure what major....

**Auto gives me hands-on real application to engineering and mechanical concepts which would help with many engineering degrees.**

The certifications and college credit I will earn are also a great benefit to the West Shore Programs.

Owen Murray, Class of 2022
