

# Skills for Success

Hi Mr. Holmok! I hope you're doing well, and I'm glad to hear from you. Here's a little update on what I have been up to.

I am still at Ohio State, working toward a degree in Material Science and Engineering. I have been living on campus and it's really great, except for the food which could use some improvement.

**In terms of course work, PLTW has played a huge role in preparing me for my classes here.**

Last semester we did a flash unit on circuits and I was one of the only students in my section to get an A on the test all thanks to my previous knowledge. We also had our exam on isometric and orthographic drawings yesterday which went well. Now we're just starting our unit on 3D renderings and while we don't use Autodesk, I am coming to find that SolidWorks operates in a very similar fashion. I remember coming into PLTW as a freshman and having graduated students tell me that freshman year engineering in college was just like PLTW and thus far that statement has held more than true. I have been fully prepared and then some by the PLTW program to tackle my harder classes this year and for that I owe you and Mr. Sedlak my deepest gratitude.

Nicole Hudak - Class of 2020
