

DESIGN & CONSTRUCTION UPDATE

August 2020

OUR NEW SCHOOL HAS A NAME!

After months of research and community input, the school board unanimously approved the name of our new school, Granite Ridge School, at their August 13 meeting as recommended by the naming committee. The School Naming Committee was made up of board members, teachers, staff, and community members and were tasked with recommending a name that represented the community. This name is a nod to our state rock and the elevations of the new school site.

GREAT PROGRESS AT GRANITE RIDGE SCHOOL

The new school is starting to take shape as structure continues to be put in place. The main structure will be complete in October which allows for interior work to begin. Yet this year, we will start to see glass and brick be installed on the exterior. Before the year is through, work will start on the inside with painting, finishes, and casework starting in December. If you haven't driven past the site lately, check out photos from our drone flights on our [website](#).

MEET OUR YOUTH APPRENTICE!

Monona Grove High School Senior Noah Olson will be joining the construction crew this semester as the Youth Apprentice. This program offers students hands-on learning while exploring careers in almost any industry. In this case, students can go from the classroom to the construction site for an education that combines academic and technical instruction with on-the-job training. Noah will start at Winnequah and then transition to our new school job site. We look forward to seeing all that Noah learns on the job!

NEW GRANITE RIDGE SCHOOL

Construction
Apr. 2020 - Aug. 2021

Opens
FALL 2021

CONSTRUCTION WORK IS CONTINUING DISTRICT-WIDE

Winnequah School

Phase one of the renovations are on schedule to be complete at the end of this month. The IMC continues to take shape with a makerspace and reading nook. The music room has new flooring and a fresh coat of paint. New windows are also being installed and will continue to bring in a great deal of natural light for students.

IMC is starting to take shape!

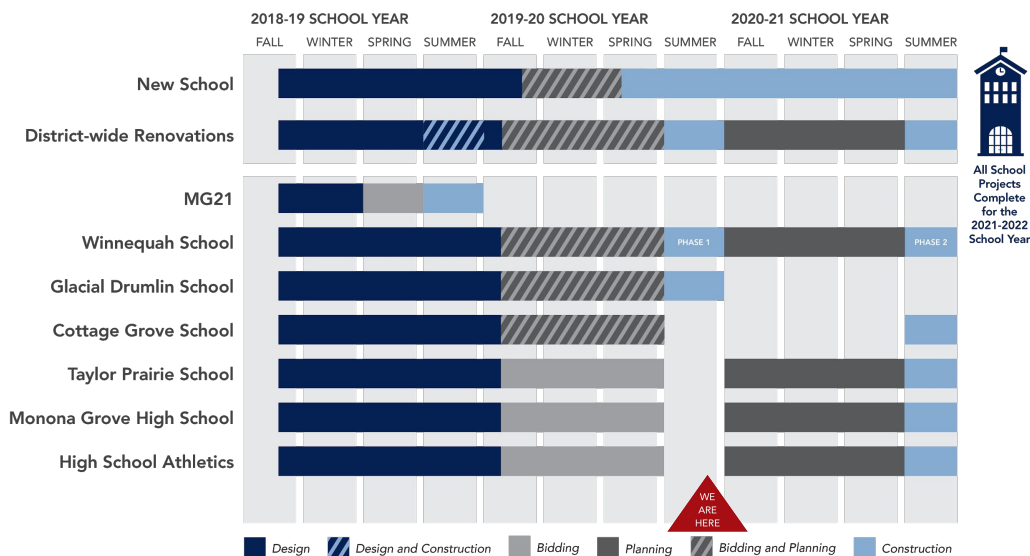

Glacial Drumlin School

Renovations will be complete this month and ready for when students come back to school. As part of this work, we were able to expand the cafeteria and server space which not only will provide more space for students but will also allow for a better flow during lunch periods.

The exterior is finishing up with new windows and sidewalks.
