

DESIGN & CONSTRUCTION UPDATE

June 2019

CONSTRUCTION HAS BEGUN!

Construction has kicked off at MG21 with the following improvements to be completed this summer:

- Install secured entry, including reception area and office
- Improve flexibility and collaboration by creating a connection between classrooms
- Renovate kitchen
- Increase accessibility to bathrooms
- and more!

June: Demolition will be a focus for the remainder of the month.

July: Framing will start, along with rough carpentry and some finish work.

August: Casework, doors and equipment will be installed. All work will be completed with time for staff to move into their renovated space before the 2019-2020 school year.

MG21 is our public charter school, focusing on project-based learning, service learning, mindfulness and wellness, and outdoor wilderness education and stewardship.

Demolition in the planned reception and office area

Classroom openings will allow for an increase in collaboration and flexibility for both small group and large group learning. Three classrooms are shown with their new connections created.

OTHER WORK HAPPENING

As design continues for the new elementary school and various renovations, construction is also starting on some district-wide capital maintenance items.

- Monona Grove High School partial roof replacement
- MG21 ceilings, window repair, etc.
- Winnequah music room repairs
