

Algebra I Honors Summer Work

Students enrolled in Algebra I Honors are required to complete our online Pre-Algebra Math review through *Methodize Learning*. The online course is 7-units long, self-paced and accessible through your iPad, phone, or other device.

The online course allows students to make-mistakes, watch review videos, and more. Take your time and really learn the information.

This course will cover the concepts that students learn across a standard Pre-Algebra curriculum. There is a focus on numbers and their properties, the operations we use to compute calculations, and other introductory algebra topics. After this course, you will be ready to begin Algebra I Honors.

Assignment instructions

You can access the assignment through any device with an Internet browser.

1. Go to <https://methodize.methodlearning.com/join>
2. Enter the class code **a2mdfe9**
3. Complete the units, lessons, quizzes, and test assigned for the course.
4. Questions or need help? Email Mrs. Arguelles at aarguelles@ndhsriverside.org

Suggested Pacing Guide:
