When schools, parents, students, or social service agencies recognize a student is at risk, they can make a referral to our Student Assistance Program (SAP). SAP provides a Liaison who will work with the schools and that student.

Student Assistance Program can:

- Refer students to supports and services to help them overcome learning barriers, remain enrolled in school, and become successful citizens in the community.
- SAP services include: screenings for mental health, drug, alcohol, and/or suicide concerns; referrals to community resources and guidance with accessing applicable service; prevention, intervention, and/or educational support group; grief counseling and supports for students and staff following a traumatic event in the school or community.
