Strategic Planning Subcommittee Report

Date: October 8, 2010

Committee: Strategic Planning

Meeting Date: October 7, 2010

Members Present: Eric Dube, Peter Murray, Jane Blais, and Shannon Welsh

Agenda Items and Discussion:

Strategic Plan Update:

Members received a report on the design of our October 8th Professional Learning Day. The focus of the day is to provide detailed information about the Strategic Framework and time for the development of building, team and individual implementation plans. All professional staff will meet to hear the planning process for creating plans based on student literacy data that will move us toward attainment of the district mission and the performance commitments outlined in the Strategic Framework.

Completed building and team level plans will be presented to the Board of Directors at their meeting on October 27th and posted on our websites. A report out on attainment of the goals and plans will be provided as part of the State of the Schools report in February/March. This provides only a 6 month window for action so plans will need to be realistic to meet this timeframe. Following the State of the Schools report on updated data, the planning process will begin again for the 2011-2012 school year.

Strategic Plan members discussed the importance of this process and the impact to student learning. They will review initial data in January and finalize the State of the Schools report. Members will recommend any changes to the Framework or process based on the work done over the next 6 months.

Next Meeting: January 6, 2011

Press release recommended? Not at this time.
