

# CHESTER COMMUNITY CHARTER SCHOOL

## HEALTH SERVICES

The nursing staff at CCCS enhances the scholars learning potential by identifying problems that may interfere with learning such as abnormal growth, vision, hearing, and scoliosis screening results. The nurse assists in health promotion by implementing individualized health care plans for scholars with chronic health conditions, administering medications, and communicating with health care professionals and parents when further follow-up care is needed. Health Services also include caring for scholars who become sick or injured during the school day. The department utilizes a coordinated holistic approach to address the scholars' health, well-being and potential to learn.
