NAMING PATTERNS (21+)

Initially, people were called by their first name and did not have a surname. In this class, you will explore how our surnames (last name) came into existence. Naming conventions are also explored based on what part of the world our ancestors came from, and how the naming patterns have changed through time. A thorough discussion of maiden names will be included.

TIPS & SECRETS TO FINDING OUR EARLY ANCESTORS BEFORE 1850

(21+)

Most genealogists, working backward through family lines, start to really tense up when they reach the 1840 census. What's a genealogist to do? First, take a deep breath and let it out. Slowly... Those pre-1850 censuses are more difficult to figure out than their later counterparts, but they're far from impossible. This class will help you to work your way through the early years of census taking in the Americas.

You have taken the DNA test and received the results. You have your notification from your testing company as what to do next or what to expect. Some terms and explanations may be confusing. Each DNA testing company has something different to say. In this class we will go through the various terms, define them, explain the difference between the DNA companies and then teach you the various platforms on which you can send your results... such as GedMatch.
