

## OLDHAM COUNTY BOARD OF EDUCATION POLICY

### RECYCLING

6012

*References: KRS 160.294*

*Relates to: 6012AR*

The Oldham County Board of Education believes in the preservation of resources and the reduction of waste in our community and state.

Therefore, as responsible citizens of the community, the Board shall require recycling throughout the school district so long as there is a recycling vendor in the county or geographic area with whom the school district can work in a cooperative effort.

The Board intends that all schools recycle as many of the following materials as possible, determined by the capability of the vendor to handle the items and after considering any substantial hardship it may cause the school: white paper, colored paper, aluminum cans, metal cans, cardboard, newspaper and plastic.

The Superintendent or his or her designee shall be responsible for monitoring the recycling program throughout the school district.
