

our campus

zones

CHILL ZONE

Passive areas are for sitting, wandering and observation.

PLAY ZONE

Suitable for running and ball games.

FOREST PRESERVE

Upon completion of Environmental Orientation, staff will have a basic understanding of how to safely bring students into the protected natural areas (please complete orientation before venturing here with your students).

Kane County Forest Preserve

For more info about the fen and ecosystem, visit: <https://kaneforest.com/location/fox-river-forested-fen>

NATIVE PLANTS

All unmowed areas are limited to observation and maintenance

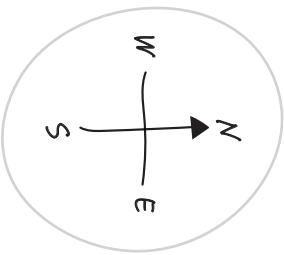

CLOSED

(for now)

PRIVATE

key

- Forest Preserve Boundary
- Landmark
- Sidewalk
- o o o o Trail (more coming soon!)

EMSA's property includes all of the buildings, the oaks in between and the ravine along the eastern edge.

The property to the southwest and west of us is owned by the Forest Preserve of Kane County and includes the Forested Fen Illinois Nature Preserve — providing the highest protection level to an extremely rare and sensitive ecosystem. **EMSA's greater campus includes these ecosystems: Oak Forest, Fen, Ravine, Forested Fen, and Human-impacted areas.**

general policies

Please explore gently — remember rocks, leaves, and logs provide food and shelter to all sorts of creatures. Try to restore these to their original spot after examination. **Sticks and stones are to be left on the ground and not carried.**
