

Office of Curriculum Update

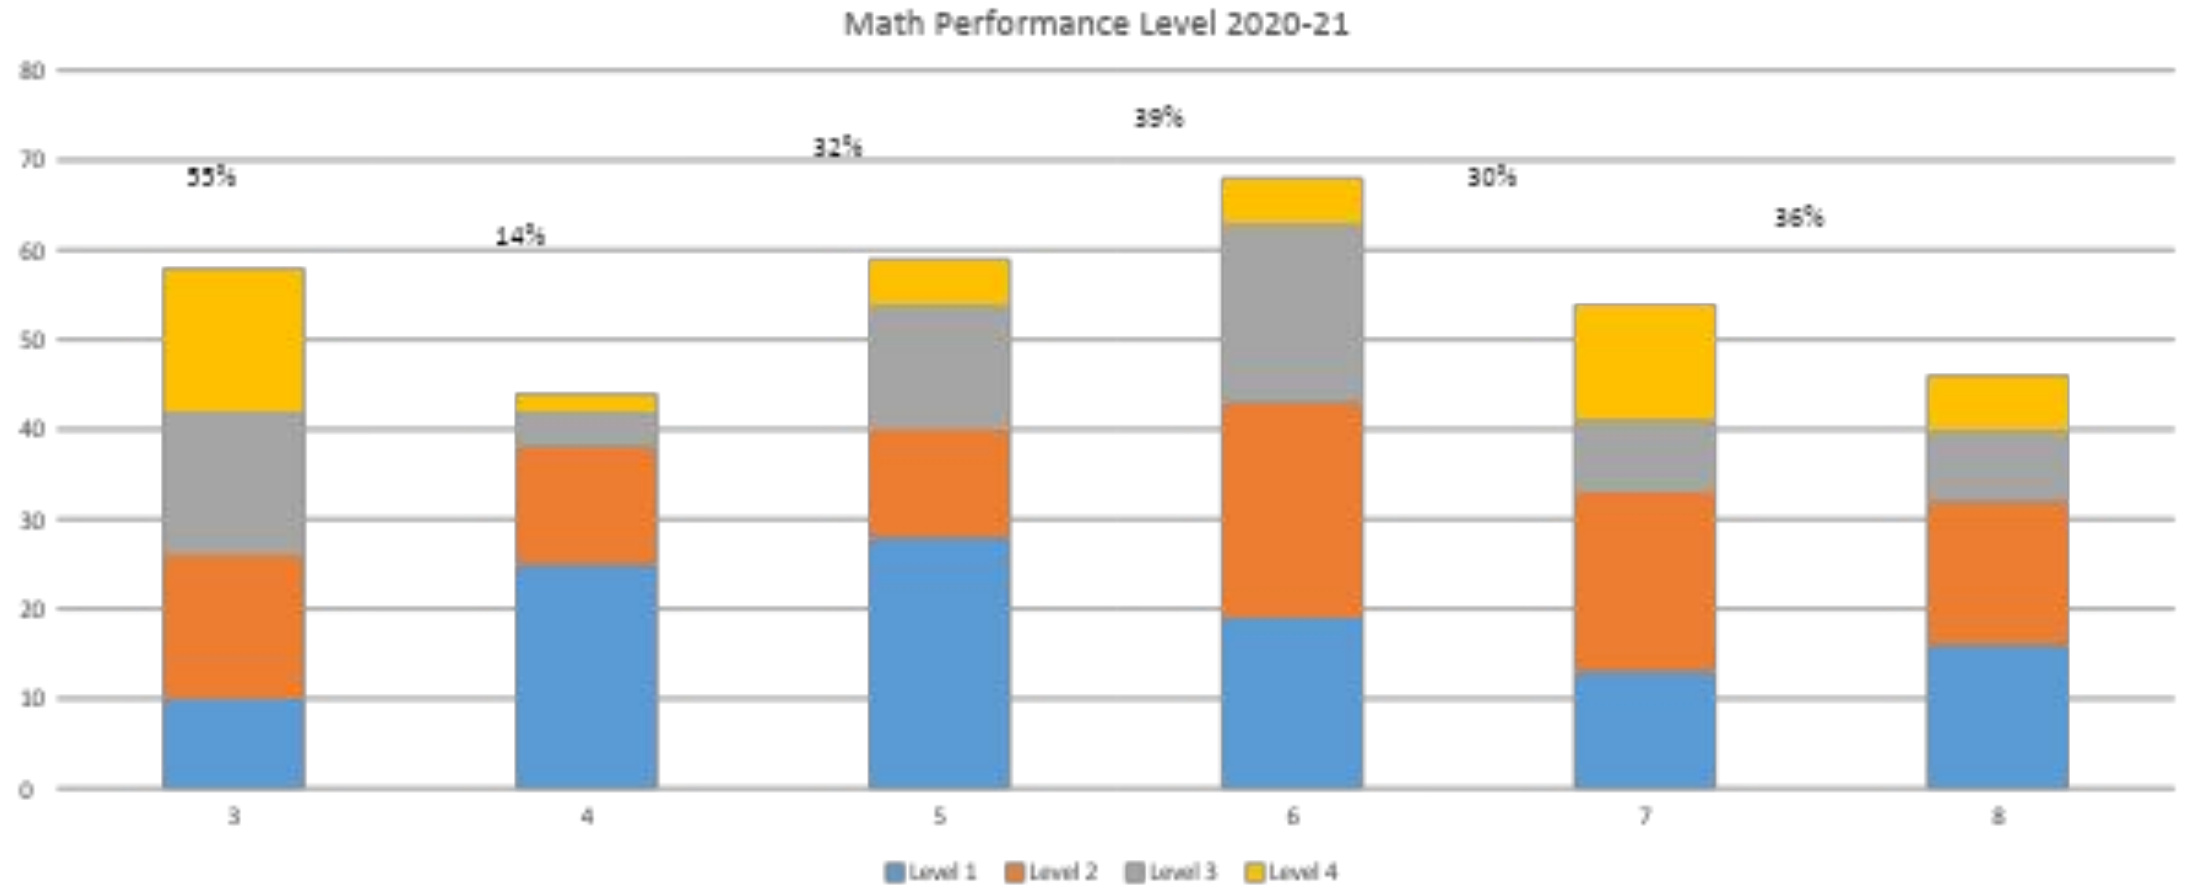

Grades 3-8 Spring Assessments

- Released October 26, 2021
- In a different format than previous years
- Disclaimer by NYSED:
 - Due to the extraordinary circumstances related to the pandemic, because a large number of students did not take the exam, state assessments **are not representative** of the state's student population and the results **should not be compared** statewide or by statewide subgroup, or with prior year's results.
 - District and school level performance data, as well as the number and percentage of students who tested and did not test, are available for 2020-21. **However**, depending on the percentage of students that took the tests in a given school or district, the school and district's results **may not be representative** of that school or district's student population.
 - Although the greatest care has been taken to ensure that our data are up to date and accurate, New York State Education Department (NYSED) is providing these data as is. These data are what we believe to be the best available data based on data submitted to the NYSED by public school districts and charter schools throughout the school year and available for verification by districts until the close of the state data warehouse in late August. School district superintendents certify data is accurate in September. NYSED is not liable for any inaccurate data.
