

TENURE PORTFOLIO

Please highlight one unit or aspect of your professional career in Jericho that you would like to discuss with the Board of Education. This part of the portfolio should be representative of the work you have done during your non-tenured years and should highlight the way you have grown as an educator during your time here.

Please also include all the following in your portfolio:

1. All observations and evaluations until this time.
2. All UbD units that you developed as part of your new teacher workshops. Clean copies are not necessary. You can include copies that have your notes, based upon the tuning protocols that we used.
3. Any letters or notes you have received from administrators, students and/or parents commenting on your work. You may want to include some work that the students completed as a result of this unit.

Separate your portfolio into sections, with labels. Please make the highlight of your professional career the first section.

Once you have completed your portfolio, please make an appointment to see Ivy Sherman to review your portfolio and discuss your highlights.

Portfolios may be digital as long as all four components are included.
