

| Name                   | Credits  | Duration            | Prerequisite |
|------------------------|--|---------------------|--------------|
| World Geography (9-12) | 0.5 Credit Elective Course   | 18 weeks (0.5 year) | None         |
|                        |  |                     |              |
| Objective:             | To obtain practical geographical information about the world's countries, regions, cultures, and environments.             |                     |              |
|                        |  |                     |              |
| Goals:                 |  |                     |              |
|                        | Student will be able to understand the basic division of Geography by using 5 common themes.                               |                     |              |
|                        | Student will understand how to use maps and other geographic representations, tools, and technology to report information. |                     |              |
|                        | Student will understand and classify internal and external forces shaping the Earth including water and landforms.         |                     |              |
|                        | Student will understand the innovation and spread of culture throughout the world.   |                     |              |
|                        | Student will be able to connect common cultural traits in different regions including ethnicity, language and religion.    |                     |              |
|                        | Student will understand the various types of government and economies throughout the world.                                |                     |              |
|                        | Student will explain the factors involved in world population trends.  |                     |              |
|                        | Student will be able to understand and label landforms, resources, vegetation and human interaction in the world.          |                     |              |
|                        |  |                     |              |
| Tools:                 | Google Earth   |                     |              |
|                        | Teacher created presentations on each region   |                     |              |
|                        | Consumable political and physical maps   |                     |              |
|                        | Articles and readings from multiple sources.   |                     |              |

| Geography        | Common Core Standards   | Day 1                            | Day 2                    | Day 3                         | Day 4                          | Day 5  |
|------------------|---|----------------------------------|--------------------------|-------------------------------|--------------------------------|--|
| Unit 1-Australia |   |                                  |                          |                               |                                |  |
| Map Skills/Intro | <ul style="list-style-type: none"> <li>• SS.912.G.1.1: Design maps using a variety of technologies based on descriptive data to explain physical and cultural attributes of major world regions.</li> <li>• SS.912.G.1.2: Use spatial perspective and appropriate geographic terms and tools, including the Six Essential Elements, as organizational schema to describe any given place.</li> <li>• SS.912.G.1.3: Employ applicable units of measurement and scale to solve simple location problems using maps and globes.</li> </ul> | Introduction                     | Five Themes of Geography | Latitude and Longitude        | Reading a map                  | -Quiz<br>1.
