

5516.01 STUDENT TRACKING DEVICES

The Board of Education recognizes students may have in their possession while in school, at a school-sponsored activity, or on a school bus an electronic tracking device that uses a global positioning system (GPS) or any other similar system. A tracking unit is a device, normally carried by a moving vehicle or person, that uses a GPS or similar system to determine and track its precise location, and hence that of its carrier, at intervals. The recorded location data can be stored within the tracking unit or it may be transmitted to another location, including, but not limited to, a central location database or an Internet-connected computer, using a cellular, radio, or satellite modem embedded in the unit. This allows the tracking unit's location to be displayed against a map backdrop either in real time or when analyzing the tracking path later, using tracking software. A tracking unit may be a device designed just for tracking or may be an application installed on any other electronic device.

A tracking unit may also have the ability to transmit in real time or through taping electronic communications to another location. These electronic communications may be one-way or two-way audio or video communications between the student and a person with a device at another location or an audio and/or video feature that enables a person remote from the student, with or without the permission of the student, to listen-in or have voice communications with the student and/or access video through the unit either in real time or by taping such communications.

The Board of Education permits the use of a tracking unit or an application on an electronic device that can track the location of the student while in school, at a school-sponsored event, or on a school bus. However, to protect the privacy rights of all students and to maintain the school district's legal obligation to maintain confidential student information in accordance with Federal and State law and regulations, the use of a tracking device or an application on an electronic device that enables any type of one-way or two-way audio and/or video communications or taping is not permitted.

Notwithstanding, student is not permitted to have a tracking device that is a Personal Electronic Device turned on or use on school grounds during the school day or when the student is participating in a curricular or school-sponsored co-curricular activity. A student's Personal Electronic Device may only be used on school grounds before and after the school day or with the permission of a school staff member supervising the student in a curricular or school-sponsored co-curricular activity. The Personal Electronic Device should be turned off and kept in the student's lockers during the school day.

A violation of the provisions of this Policy will result in a violation of the Student Code of Conduct Policy and appropriate discipline will be imposed.
