Scholarship Incentive Program

### 6650.1 SCHOLARSHIP INCENTIVE PROGRAM

In order to best support the District's efforts in raising the bar for student achievement through the elimination of the D grade, the District shall develop a scholarship incentive program for National Honor Society students who offer peer tutoring services beyond their required National Honor Society service hours. The scholarship incentive program would allow the District's National Honor Society students to earn scholarship dollars, towards the college of their choice, for tutoring their peers on an as needed basis. National Honor Society tutors would earn \$10.00 per hour for every hour they tutor when signed in and supervised by school personnel. In addition to this incentive program ensuring that students in need of additional support have that support available to them, it will also offer our high achieving National Honor Society students recognition and support as they work towards their own goals and build their future.
