

iPad Users Checklist for Creating an iTunes Account

Step 1 - Download and install iTunes (<http://www.apple.com/itunes/download/>) on your computer. If using a laptop, you will need to ensure that you are connected to our network via network cable (not via wireless) since the iTunes download is pretty large.

Step 2 - create an iTunes account without using a credit card

- Double-click the iTunes icon on your PC's desktop.
- Click the "[iTunes Store](#)" tab in the iTunes source list, and scroll down to the "Free Apps" section in the iTunes window. Click the "FREE" button on any of the applications listed in the section.
- Click the "Create An Account" button in the pop-up window in iTunes and click the "Continue" button.
- Select the box next to the iTunes license agreement, and click "Continue."
- Type in your email address and a password for the new iTunes account. Type in a security question, and type the answer to the question in the blank field below the security question.
- Select the drop-down [menu](#) next to the "Month" and "Day" section to select your birth date, and click "Continue."
- Click the circle next to "None," and enter your mailing address in the appropriate field. Click "Continue."
- Open your email program to view the email message sent from Apple, and click the link in the email message to verify your account.
- Type in your email address and password in the iTunes Sign In window, and press the "Return" or "Enter" key to sign in. Click the "Done" button to complete the free account setup.

Important - Once you have your iPad, synch your iPad to this iTunes installation, it is important that you use only that instance of iTunes for any future "synching" of that iPad.
