Georgia Cyber Academy completed the Cognia Digital Learning Accreditation Engagement Review in 2022. Results from this accreditation indicated that GCA both met and improved standards and demonstrated noteworthy practices which provided clear results that positively impacted the school.

The Engagement Review Team utilizes the Cognia Performance Standards Diagnostic to evaluate the institution’s effectiveness based on the three Cognia Performance Standards: Leadership Capacity, Learning Capacity, and Resource Capacity. The findings for these three areas are indicated by the graphs below.

The Engagement Review Team also facilitated the Cognia Observation Tool for Digital Learning to review five major key areas of the digital environment including Instructional Design, Learning Engagement, Platforms and Technologies, Assessment for Learning, and the Digital Learning Community. In this review, GCA surpassed the scores of the Cognia average in all areas.

“GCA fosters a culture that carries out its mission and vision with an emphasis on access and relationships.”*

GCA will continue to utilize strategic data planning to identify and adjust any achievement gaps while striving to prepare all students for advanced academic opportunities in all grade bands.

*Quotes from the Cogia Accreditation team can be located in the full report found on the GCA website.
