BROAD MARKETS

The stock market continued to struggle during the second quarter. Combined with the first three months, that makes this the worst first-half-of-the-year performance since 1970. Unrelenting inflation has been the biggest economic headwind so far, as the Federal Reserve's original estimation that inflation would be "transitory" turned out to be a mistake. Through May, inflation over the last 12 months now stands at 8.6%, which is the highest reading for that statistic since the 1980s.

This inflation shock has roiled both bond and stock markets, not to mention other risk assets like cryptocurrency which is also down significantly. In retrospect, perhaps the Fed should have started raising rates sooner as they now appear to be trying to make up for lost ground. They have raised the Fed rate by one-quarter, one-half, and three-quarter percent respectively over their last three meetings, with still more increases to come. We now stand at a target range of 1.5 to 1.75% while their target rate for year end is 3.4%.

DOMESTIC EQUITY

Inflation was specifically called out as a key concern in the most recent Consumer Sentiment Survey conducted by the University of Michigan. The final reading for May was a dismal 50.0, the lowest result since the survey was first introduced in 1952. Survey respondents were not optimistic about business growth, with 79% of consumers expecting bad times in the year ahead for business conditions.

On a positive note, jobs growth remains consistently strong. Per the Bureau of Labor Statistics, the U.S. economy added 368,000 jobs during April, 384,000 in May and 372,000 in June. The total number of unemployed persons is now down to 5.9 million and the unemployment rate is 3.6%. Both values stand slightly behind pre-pandemic levels of 5.7 million and 3.5% respectively.

INTERNATIONAL EQUITY

Hopes for a quick end to the conflict in Ukraine appear to have been unrealistic. While Russian advances have generally been halted, the prospect of them calling off their invasion any time soon is unlikely at this point. The net result is a relative stalemate which will continue to cost both money and lives for the foreseeable future. A diplomatic solution could still be on the table, but both sides seem very far apart.

China is mired in another Covid-19 outbreak, with roughly 200-300 new cases in the last several days as of this writing. Beijing and Shanghai had finally reopened in June after being locked down for much of April and May. Currently, there are a total of 11 Chinese cities with some sort of restricted movement. Per Ting Lu, chief China economist at Nomura, the impacted regions comprise roughly 14.9% of the country's GDP.

FIXED INCOME

Bond funds saw another quarter of relatively large losses, given what is typical for the category. Interest rates, which heavily influence bond prices, continued to climb during the last three months. Even inflation-protected bond funds were not immune to losses, as that category lost 5.12% during the second quarter.

The resulting yield curve has changed dramatically from 12 months prior. This demonstrates a significant shift in bond-market sentiment during the last year. Most of this shift has taken place over the last four months, as inflation was suddenly recognized by both the market and the Fed to be more permanent than the Fed had originally predicted.

RECOMMENDATIONS and MONITORING DECISIONS

▶ Vanguard Interm-Term Treasury Adm

Ticker: VFIUX

Fund Category: GI

Custom Decision (ongoing)

Vanguard Intermediate-Term Treasury fund will flag for manager tenure but the fund is not on the Watch List. Effective December 31, 2021, Gemma Wright-Casparius, sole PM of the fund since 2015, retired from Vanguard. Brian Quigley and John Madziyire were added as co-managers in November 2021. Mr. Quigley has been with Vanguard since 2003 and Mr. Madziyire since 2017. Both are part of the Global Rates team at Vanguard. Brian Quigley manages the Vanguard Short-Term Federal fund and is also a portfolio manager for the Vanguard Core Bond fund making him well equipped to co-managing the Intermediate-Term Treasury fund. Vanguard takes a collaborative approach to their fixed income offerings, encompassing their top-down Sr. Investment "hub" coupled with bottom-up sector research satellite teams. Given the experience of the two newly named managers and the collaborative nature of the fund and process, the Investment Committee decided not to place the fund on the Watch List. We will continue to monitor the manager change.

▶ Virtus Ceredex Large-Cap Value Equity R6

Ticker: STVZX

Fund Category: LV

Custom Decision (ongoing)

StanCorp Investment Advisers recommends removal of the Virtus Ceredex Large-Cap Value Equity fund as of Q2 2022 due to performance. For 2020, security selection in materials and energy dragged on performance. In 2021, an overweight allocation to and security selection in industrials weighed heavily on performance; security selection in technology and financial services balanced the fund. Year-to-date, the fund has suffered from broad allocation and security selection issues; security selection in industrials, basic materials, and healthcare contributed significantly to the underperformance. On November 1, 2021, longtime dedicated-analyst Jennifer Grass joined lead-PM Mills Riddick as a co-manager of this fund. Over the years, this fund has reduced its portfolio holdings from 100 securities to around 40. Further, the fund has continually shifted closer to mid-capitalization securities, finishing Q2 2022 with over 40% of the portfolio residing in the mid-cap blend investment space. The recommended replacement is the Putnam Large Cap Value fund due to consistent long-term performance and style purity.

▶ American Funds Europacific Growth R6

Ticker: RERGX

Fund Category: FG

Custom Decision (ongoing)

The American Funds Europacific Growth fund was added to the Watch List at the end of Q4 2021 due to performance. The fund underperformed its peer group in 2018 and 2019. During 2020, the fund performed well with security selection in consumer cyclical, healthcare, communication services, and technology driving performance; security selection in industrials and financials detracted. In 2021, security selection in healthcare and technology weighed significantly on performance and an underweight allocation to and security selection in industrials also hurt; an overweight allocation to Latin America and security selection in Japan further dragged performance lower. Year-to-date, the fund outperformed the category average, security selection in Latin America, health care, and basic materials along with an overweight allocation to energy drove performance. We will continue to monitor the fund.

DFA US Small Cap I (DFSTX) Small Blend

As of: 06/30/2022

Fund Objective

The investment seeks long-term capital appreciation. The fund, using a market capitalization weighted approach, purchases a broad and diverse group of readily marketable securities of U.S. small cap companies. A company's market capitalization is the number of its shares outstanding times its price per share. Under a market capitalization weighted approach, companies with higher market capitalizations generally represent a larger proportion of the fund than companies with relatively lower market capitalizations.

Vanguard Mid-Cap Value Index Admiral (VMVAX) Mid-Cap Value

As of: 06/30/2022

Fund Objective

The investment seeks to track the performance of the CRSP US Mid Cap Value Index that measures the investment return of mid-capitalization value stocks. The fund employs an indexing investment approach designed to track the performance of the CRSP US Mid Cap Value Index, a broadly diversified index of value stocks of mid-size U.S. companies. The advisor attempts to replicate the target index by investing all, or substantially all, of its assets in the stocks that make up the index, holding each stock in approximately the same proportion as its weighting in the index.

Removal

As of: 06/30/2022

Fund Objective

The investment seeks to provide a high level of capital appreciation; current income is a secondary objective. Under normal circumstances, the fund invests at least 80% of its net assets in U.S.-traded equity securities of large-capitalization companies. U.S.-traded equity securities may include American Depositary Receipts ("ADRs"). The subadvisor considers large-capitalization companies for this purpose to be those companies that, at the time of initial purchase, have market capitalizations generally within the range of companies included in the Russell 1000® Value Index.

T. Rowe Price New Horizons I (PRJIX) Mid-Cap Growth

As of: 06/30/2022

Fund Objective

The investment seeks long-term capital growth. The fund invests primarily in a diversified group of small, emerging growth companies, preferably early in their corporate life cycle before the companies become widely recognized by the investment community. It may also invest in companies that offer the possibility of accelerating earnings growth because of rejuvenated management, new products, or structural changes in the economy.

DISCLOSURES

FOR ONE-ON-ONE USE ONLY

Any recommendations in this report are made with respect only to funds for which StanCorp Investment Advisers, Inc., acts as an ERISA section 3(21) or 3(38) investment advisory fiduciary.

Information for funds for which StanCorp Investment Advisers is not acting as an investment advisory fiduciary is included in this Quarterly Monitoring Report as a courtesy, and its inclusion does not constitute investment advice by StanCorp Investment Advisers or its affiliates. StanCorp Investment Advisers is not responsible for making any recommendations with respect to the inclusion or removal of any investment option that it subadvises or is issued by an affiliate.

Actual results may differ from the performance shown herein. Average annual total return figures include changes in principal value, reinvested dividends, and capital gain distributions. Returns for periods less than one year are not annualized. For funds less than one year old, the Since Inception return figure is not annualized and represents an aggregate total return. Returns presented are net of underlying fund expenses and gross of any recordkeeping or administrative fees charged by Standard Retirement Services which generally include any fees, as applicable, for investment advisory services provided by StanCorp Investment Advisers. These fees would reduce returns. For example, if the gross annualized return for a mutual fund were 6.5 percent, 8.0 percent, and 7.5 percent, for the three-, five- and 10-year periods respectively, and the fees charged to the plan by The Standard were 1.0 percent, the net of fee return for the same periods would be 5.5 percent, 7.0 percent and 6.5 percent, respectively. Additional information about any fees charged by or payable to StanCorp Investment Advisers may be found in the Form ADV, Part 2A. For each investment, this overview also provides a benchmark which enables you to compare the performance of the investment with a broad based securities market index created by Morningstar. Broad based securities market indices may not always correlate well to an individual option. Investments cannot be made directly into an index.

Overall ratings are provided for the specific share class shown. Different share classes may have different ratings. Morningstar rankings represent a fund's total return rank relative to all funds that have the same category. The percentile ranking is based on the fund's total return percentile rank relative to all funds that have the same category for the same time period. The highest (most favorable) percentile rank is 1% and the lowest (least favorable) percentile rank is 100%. Morningstar rankings do not include the effect of sales charges.

Past performance does not guarantee future results. The value of an investment will vary so that an investor's shares, when redeemed, may be worth less than their original value. Fees and expenses

will decrease investment returns so investors should take them into consideration prior to investing. Gross expense ratios represent the Total Annual Operating Expenses for the fund and do not reflect any fee waivers or reimbursements that may be in effect at the time the expenses are calculated. The net expense ratio reflects the expenses being charged by the fund at the time the expenses are calculated after taking into account any applicable waivers.

Asset allocation and diversification do not ensure a profit or protect against loss in declining financial markets.

Hypens appear in data columns to indicate that data is not available.

CUSIP, Net Expense Ratio and Turnover Ratio for Group Annuity investments pertain to the associated underlying mutual funds.

Some investments require a delayed import and will be available approximately 45 days after month end. Therefore, some of the data may be empty or outdated until it is available.

Peer groups are comprised of all of the funds that match an investment's category as classified by Morningstar. Morningstar Category identifies funds based on their actual investment styles as measured by their underlying portfolio holdings over a three-year period.

Based on Morningstar data, the system calculates data points on: Product History; peer group rankings for Calendar Year, Standard Deviation, Alpha, Treynor Ratio, Sharpe Ratio, and Expense Ratio; and all peer group rankings for money market funds.

Morningstar reports Manager Tenure at the fund portfolio level, while Product History is listed for the fund share class. As a result, more recent share classes may have much longer manager tenures than the reported Product History.

Net Assets reported in this report may be current as of the end of the month prior to the end of the quarter or the end of the last month of the quarter, depending on when net asset data was made available to Morningstar.

Alpha, Beta and R-squared statistics are calculated using the best-fit index as determined by Morningstar.

Morningstar groups mutual funds and exchange traded funds into different fund universes, although the same category types are used in both universes. Rankings are done within the separate universes, so that mutual funds are ranked with other mutual funds within the same category, and

DISCLOSURES

FOR ONE-ON-ONE USE ONLY

exchange traded funds are ranked with other exchange traded funds within the same category. As a result, a mutual fund and an exchange traded fund that share the same category are ranked relative to different peer groups.

Funds that focus on certain sectors may involve a greater degree of risk than broadly diversified funds. In addition to the risks associated with equity investing, investments in small and mid-cap companies and narrowly focused investments typically exhibit higher volatility and are less readily marketable than investments in larger companies or more diversified strategies. Similarly, international investing involves certain risks, such as currency fluctuations, economic instability, and political developments. These risks may be accentuated in emerging markets. Real estate investment funds are subject to special risks, such as tax law changes, and general economic conditions that may affect the value of the underlying real estate assets. Funds that invest in bonds are subject to certain risks including interest-rate risk, credit risk and inflation risk. Derivatives are subject to a number of risks, such as liquidity, interest rate, market, credit and management risk. A fund investing in a

derivative instrument could lose more than the principal amount invested. The principal value and investment returns of mutual funds, money market funds and stocks are neither guaranteed nor insured by the U.S. Government. Indices are unmanaged, do not incur fees and cannot be invested in directly by an individual.

Employers and plan participants should carefully consider the investment objectives, risks, charges and expenses of the investment options offered under the retirement plan before investing. The prospectuses for the individual mutual funds in the group annuity contain this and other important information. Prospectuses may be obtained by calling 877.805.1127. Please read the prospectus carefully before investing. Investments are subject to market risk and fluctuate in value.

Standard Stable Asset Fund is a group annuity product issued by Standard Insurance Company. Amounts contributed and the fulfillment of any guarantees specified in the group annuity contract are insurance claims supported by the full faith and credit of Standard Insurance Company. Standard Stable Asset Fund is neither a mutual fund nor a bank product and is not insured by the FDIC or any other federal governmental agency. Standard Insurance Company provides and periodically resets a guaranteed crediting rate for Standard Stable Asset Fund. However, plan sponsors may instruct Standard Insurance Company to reduce the crediting rate in order for Standard Retirement Services to reduce certain administrative fees for plan-related services. Your plan's crediting rate may be lower than the guaranteed crediting rate once the reduction has been applied. Past interest rates are not indicative of future rates. Standard Stable Asset Fund may not be available in all states.

Information on Standard Stable Asset Fund may be obtained by contacting your Standard Insurance Company representative.

If the plan sponsor selects The Standard Stable Asset fund as the cash equivalent investment option for the plan and instructs Standard Insurance Company to reduce the crediting rate as described above, the Annualized Returns for the fund as shown in this report is net of that reduction.

Please refer to StanCorp Investment Advisers' Form ADV disclosure brochure for additional details. StanCorp Investment Advisers creates general asset allocation models for use when providing investment advisory services. The allocation percentages to the asset classes in each model are set and updated, as necessary, based on certain assumptions made about market conditions, the rate of return for each asset class, average internal fees and expenses of an investment option, etc. No specific investment option was considered when setting the allocation percentage of each asset class. Therefore, the allocation percentage for the cash/cash equivalent

sleeve of each asset allocation model does not take into account any specific investment option selected or whether the plan sponsor has instructed the issuer to reduce any crediting rate. Consequently, investment results may vary among investors using the same asset allocation model and the same investment options.
